From Reader Review Stalkers for online ebook

Kristy Griffin says

What a great collection of Thrilling stories. I loved that they all had their own twists and no two were alike.

Linda Rimer-Como says

Seventeen short stories about stalkers makes for a very interesting read. I enjoyed this collection very much. Each story gives you the victim and the stalkers point of view.

Tonya says

I'm not one that usually reads short stories, but these were some amazing ones. It has been awhile since a book(s) have made me jumpy. I was looking over my shoulder every time I was outside at night while reading these. There wasn't 1 bad story in the bunch! All 17 stories were amazing. They range from paranormal stalkers to neighbors stalking neighbors.

Heidi says

I am not one to read short stories but after I saw the contest on facebook, I knew I would have to read this collection of stories. There are 17 in all, and all the stories have one common theme. Stalkers. Some of the stories deal with the paranormal, science fiction, or everyday life, or maybe one you would see on a television crime drama.

They are all done from different point of views (victim or stalker), and every author has their own unique style of writing. I enjoyed all of them, Some of them even have you guessing until the very end. My favorites were Powerless by Laurie Treacy, and Freezer Burn by Jon Messenger.

This collection of stories is over 450 pages of creepiness. Anyone got a nightlight I can use tonight?

Notice: This book contains some vulgar language and adult situations.

Johanna Sawyer says

Some of these stories were really spooky as crap. That dead ringer one was really freaky, and the one about the donor. I don't think they all fit the mode of stalker, but somehow ended up all in one volume. I'm not sure how to judge this as regular review format but overall entertainment value was great. A little bit of everything for the price of one. Where can you go wrong with that? I really like edgy reads and although short, these reads were very well written. I hardly ever rate an anthology above three stars!

Where do I start?!

This is not my typical story, I don't usually read this genre but it had me turning (well pressing) for the next page. It had me on the edge of my seat and the lights on. I really enjoyed this collection of stories and am looking forward to reading from all of these authors.

Crystal Marie says

I have always had a problem with reviewing anthologies, mainly because I don't know exactly what to rate them. This anthology is a prime example of that problem I have. It has 15 stories, by 15 awesome authors, but I only loved 3 of the stories in the book.

The stories that I did love were:

Every Thorn by Rene Folsom

Powerless by Laurie Treacy

Immortal Luck by Magen McMinimy

To me, those stories had something in them that made them stand out from the traditional stalker books.

There were enough twists in the stories that they kept me on my toes and left me wanting for more even after the story was over.

There were a few of the stories in the book that were just too predictable for me. Once I had started reading them, I was able to figure out what was going to happen at the end of the story.

Overall to me, this is one of those books that I think everyone will be able to find a story or two in it that they enjoyed.

I won't rate this book, since I have a story included in it, but I enjoyed reading the works of the other talented authors who are in there with me!

Tina Brimlow says

This was a different kind of read than I usually do. But I loved it. It felt real. I know there are stories about people being stalked. But the details and the characters just made me look over my shoulder a little bit more now than before. It's kind of scary knowing that people have gone through these situations or going through them now. This is the first book that ever gave me goose bumps. Loved the book but not the fear lol. If I were you I would indeed read it. You might learn something that might save you.

Pamela says

OMG!!! Awesome stories.. some were very very creepy.

Claire Taylor says

Stalkers: A Collection of Thriller Stories

17 stories all with a completely different twist on stalkers, from ghostly encounters to strangers watching from afar. I thoroughly enjoyed reading every story, and loved the direction some of the authors had taken their stories, as it wasn't the typical thing that came to mind when I think stalker. It would be impossible to name a favourite, but the collection definitely ended on a hilarious high. A collection that is well worth reading.

I received an e-copy from the authors in exchange for an honest review.

Katie Harder-schauer says

This collection of stories has been giving me nightmares since I started reading it, which considering the topic is a good thing. All of the authors put me into their characters shoes so I felt like I was part of the story. My personal favorites were Powerless, Immortal Luck, and Blog Stalker, which really is the perfect final story for this anthology. There is a great mix of blood and gore and happy-ish endings and not so happy endings. Anyone with the slightest inclination towards horror will surely be able to find at least one story in this collection that they absolutely love. The editor did a superb job with this compilation and its arrangement.

From “OMG that could really happen,” to “OMG it’s a gh-gh-gh-ghost,” to “OMG what is that!” Believe it or not, one even had a HEA!

I love short stories and this anthology of short stories is fantastic. Short stories are perfect for when you want to read, but only have few minutes, like sitting in a waiting room. There wasn't a bad story in this book. My two favorites were POWERLESS by Laurie Treacy and BLOG STALKER by Phil Taylor.

I recieved a copy for an honest review. I have to say my favorite reads are Paranormal Romance, so this was not what I would normally read. I have been wanting to read something different and this was an AWESOME Read! I love short stories while waiting for new books in series I have read to come out. If you are looking for some great short stories to get your goosebumps up... these will not disapoint! I have to say I was partial to the Paranormal stories.. but each one was different, told in different ways. I love reading books like this that has a collection form different authors. I will be looking up most of the authors for other books they have written!

Amber says

Honestly, I'm not a huge fan of scary stories, scary movies, or anything that makes me want to sleep with all the lights on, however, this collection of stalker based reads are simply amazing. I was asked to give an honest review, and I can, without a doubt, tell you that these authors blew me away. Every single story drew me in, kept me in a trance, and spit me out wanting more! My favorite being Autumn (The season where everything dies) by Elizabeth Collins. Crazy chick who wants her man and will do anything to get him. Gave me major goosebumps! I will be looking up each and every one of these outstanding authors to see what else they have in store. If you like great authors, amazing story lines, and chills up your spin, you will love this book! 5 Stars, two thumbs up, A+!!!

Side effects: May cause paranoia, looking over your shoulder, triple checking windows and doors and not sleeping.
ENJOY!
