## **Star Viking** Vaughn Heppner

Earth's last Assault Troopers become Star Vikings, raiding alien worlds.

In the third book of the Extinction Wars series, the Emperor of the Lokhars declares a holy crusade against the last humans, promising to finish what he started. Years ago at his orders, the Lokhars nuked the Earth and sprayed it with a bio-terminator.

Creed has begun raiding alien worlds for more starships and the tech needed to clean the radioactive Earth. But how can his handful of cruisers stop the approaching armada?

If Creed hopes to save humanity, he'll need to unlock the secrets of the Forerunner artifact he brought back from hyperspace. Then, in a race against time, he'll have to risk everything on a desperate raid into the heart of the alien empire.

#### **Recommend for summer reading!**

I am still recommending this fantastic series for summer reading. Vaughn Heppner is my summer author for reading. A fan.

### **Harry McCudden says**

This is an exceptional saga. I rate it very highly.

#### **Another Imaginative Book in an Imaginative, Swashbuckling Series**

More please!

This is the third of three, so far. All are highly worth reading.

Vaughn has done a great job furthering his saga of the Galaxy's Orion Arm. He's entertainingly interwoven the past deeds and future fates of multiple races, focusing on humanity and our swashbuckling, ballsy, aggressive nature as the key to the defeat of ancient evil and uniting alien races who've been at each others' throats.

Speaking of the entire series, his encounters are wonderfully constructed, varying from shoot-em-up action, plain-talking mocking, dramatically hilarious, tough-man confrontational, and brutally vengeful. It's been a series of great reads!

He has a very good handle on editing despite leaving his books so affordable; he's struck a good balance between production and costly time spent on catching errors. The errors that remain are minor, and in no way hinder understanding or the pace of his prose.

Thanks, Vaughn! And please clean up the loose ends for us in another book or three!

I really enjoyed this book, and looking forward to the next installment.

An excellent story with Commander Creed getting lucky as hell (and a little skillful) and leading what is left of humanity into galactic leadership role. He ends up uniting a fractured race and helped to bring shunned race back into a position of honor. You can't feel too good about humanity as the key resources we bring to the table is deceit, disrespect, boldness and thievery or piracy or simply being vikings.

Towards the end of the book, Commander Creed has to look at internal problems. We see the restarting of troubles that are very much in the news today.

The series provides all that is needed for success... a hero to focus on, his team of doers, internal and external antagonists, problems to solve and solutions that might not be exactly what was expected. It's a story you can sink your teeth into without having to become a physicist, military strategist, or political scientist. Perfect depth for entertainment.

4.0??.

## **Benjamin Gearhart says**

This is the third book in the Extinction Wars series and I place it above the second one in the series mostly because it weaved together hints of revelations from the other prequels and solved mysteries that has come up in the other novels (not all, but most of them) and finally revealed the origins and secrets of many of the races.

I will now start on the fourth book in the series, but honestly I see no real way it will be as fulfilling as book 3...but then again, I didn't expect this book to be as satisfying as it was, so who knows?

## **Mike Nemeth says**

Vaughn Heppner's "Star Viking" ushers in the return of Commander Creed, a no-nonsense, blunt-speaking, alien-enhanced warrior who is the only chance of humanity's survival. Earth is devastated and those who are left either live on orbiting freighters or as a band of surgically beefed up soldiers under Creed's command. The third novel starts with three Lokhar priest-like assassins going after him by blowing themselves up. He's injured but not exterminated as they'd much prefer. And he's angry. Turns out even his allies amongst the race of alien tiger bipeds, Dr. Sant, turn against him now that the Shi-Feng have targeted him for death. Heppner has created a truly vast canvas of alien cultures, and he knows how to generate conflict to get the reader turning the pages. Creed knows the name of the artifact, which turns out about as valuable as a used car that doesn't run. But he's good at using resources. He convinces Holgatha, the computer that is the massive and heavily fought over artifact, to join him in raiding a planet important to the Purple Tamika faction of the tiger-race Lokhars. And he even tries to get the Starkiens, who look and smell like baboons, to join with him. They resist, thinking like all other aliens that humans are beasts. But I can't help but love anything Heppner writes. It's very macho and all about adventure. And I hope he pushes deeper into the

humans' alliance with N7 and his androids with the next book.

#### **Awesome adventure**

These series are full of exciting adventures for the human race. Most intriguing is humans are known as beasts. That's a twist alright. Enjoy as I did. On to the next book.

### **Chris N Hartfield says**

Heppner did a great job pulling together the many threads in this series. He seems to have matured in his writing skills. He provided a tense and satisfying ending. I also enjoyed the enemy characters, finding them believable and credible. I definitely recommend. It's a great read.

### **Luke Darling says**

Awesome...onto the next one!

### **Monica Bizier says**

#### **Good read**

I felt like playing poker with the lowest amount of chips at the table and trying to survive...a good underdog story.

### **Lindy says**

#### **Great finish to a wonderful series.**

Again I enjoyed the series and this last book therein. The alien characters were not so alien with such bizarre names and motives that they caused the reader confusion. That made the books understandable and easy to read and enjoy. Great book!

This continues the story of Commander Creed. If you haven't read the previous two books in the series, then go back and do so. I can't remember Commander Creed's first name but it doesn't make any difference because that's all he ever calls himself. He also says his name on about every page of this book! Any time he

---

meets a new alien, they want to know who he is. So, it's "Commander Creed" and that explains everything. Creed is one of a very few humans left in the galaxy but he is determined to ensure that humans are going to rebuild after the Lokars destroyed Earth.

Creed and his followers, those who survived the near total destruction of Earth, have just returned from a terribly costly battle with Abbadon and the Karg. Commander Creed now has in his possession a very valuable and rare ancient relic. The aliens view these relics as religious artifacts that definitely don't belong in the hands of humans who they consider barely intelligent animals.

The first group to try and take the artifact away is the Starkiens, an race of intelligent (supposedly) baboons! Starkiens are nomads who contract out to other races to fight or otherwise ensure deals and agreements are kept. They want the artifact to give them some semblance of importance within the galactic community.

Of course, Commander Creed isn't about to let them have it. Nor is he going to let anyone else have this artifact. Even though he has very little defensive capabilities since their recent fight left them pretty much wiped out equipment-wise, he uses what he has and that is his wits to convince the Starkiens to go away.

Now all he has to do is stop the Purple Tamika from coming and taking the artifact and they are much, much more powerful than the Starkiens. So, Commander Creed and his bunch with the small assistance of the artifact, begin to raid other planets in order to gather starships and military supplies and equipment. Their first raid (he calls his guys "Star Vikings" because they are like ancient Vikings raiding other villages) is highly successful and it is against the Purple Tamika which really makes them mad if they were capable of getting any madder at Commander Creed.

The rest of the book is all about Commander Creed being a brash and arrogant SOB to everyone. That's how he gets things done. He carries a .44 cal pistol at his side and he doesn't hesitate to use it no matter where he's at. How he manages to survive some of his exploits is beyond me. It is really a wonder that none of the aliens he's met so far haven't vaporized him.

This is a good story although it can get a little tiring listening to, "...my name is Commander Creed.", all the time! I think it should be changed to Superman and leave it at that. The book is well written with good editing. I can see a possible continuation but I'm not sure how that would be written.

## **Htb2050 says**

This book was just amazing. Dives right into the action and the writing is great all around. Some of the jokes made me laugh out loud. I wasn't expecting that at all when I started reading this book.

The story kept getting better and better every page. I read it all in one sitting after around 40%. You won't be disappointed. ? ????
