Trazzak Layla Nash , Juno Wells

Jess Barnes was a rising star in the Information Ministry before she and her crewmates were kidnapped by Xaravian barbarians. She longs for her old life and friends. She can also live without bounty hunters chasing her down in every part of the universe. When one poisons her, Jess is in a race against time to find a cure for the odd condition that sets her heart racing -- made worse by the attention of sexy second-in-command Trazzak.

Trazzak likes order and rules, but Jessalyn brings total chaos to his life and the Galaxos, with bounty hunters and Alliance spies right behind her. When he starts to uncover the many secrets Jess has buried, Trazzak wonders if he should turn her in for betraying the rebellions... or get a lot closer.

Jess doesn't know who to trust, and hardly even trusts herself as she battles bounty hunters, arms dealers, and the poison in her blood. When the Alliance offers her the antidote and her old life back -- in exchange for betraying her crewmates, the Xaravians, and the entire rebellion -- will Jess choose loyalty to her friends and her growing feelings for Trazzak over her own life?

Keya Berglund says

Interesting Characters

How comparable to governments, religion or big businesses that have complete power. "Complete power completely corrupts."

Freedom Fighters and they're conquest for the right is a good read.

Badh says

Jess was the spy on her ship before all the women got sold to the Xaravians and the Galaxos. She's been trying to hide her background ever since, even though some of her friends know. Trazzak knows there is something about her, mostly because he went through the same training by the same people as she did. That means he's finally able to figure it out, after she had to meet an old contact who tried to force her into having to do one more job for the ministry and after she was poisoned by bounty hunters.

Jess and Trazzak go through a lot of rocky road, distrust, and betrayal, as well as near death while their relationship builds. I love their story, but one of the things I like the most is that they spend time getting to know each other and building a relationship. Trazzak really spends time wooing Jess and building up what they want, which is nice, much more realistic.

I've enjoyed all the books in this series and really wish that they would hurry up and write the next one!

Sue Me says

I am thoroughly enjoying this series of stories of the expanding fleet of the Xaravians. It continues the world building started in book one. They were on the ship, Argo, then. Captained by a corrupt crew led by a Captain Wurtz. He sold the females in his crew and was an all around evil guy. Now in Book 3, two of the Earth girls who helped run the Argo are now married to Xaravian officers: the Captain Vaant, and Navigator Vrix. We discovered in a previous book that Jessalyn Barnes was a spy for the Alliance, an Intelligence Officer. Now she is just a member of the crew.

They stop off at a Spaceport and Jessalyn has been told to meet a fellow Information Officer and former lover, Nathan. He shows her the huge bounty on her head, dead or alive put out by the Alliance. He says he can get the bounty removed if she obtain the plans for a new defensive/offensive weapon that would be unbeatable for any who possessed it. She wants all of her teammates bounties also removed as well as those on the Xaravians. As she heads back to the ship she is attacked by 3 bounty hunters. She kills two, but before she can kill the third he slices into her leg with a poisoned blade. Once back on board the Galaxos, she becomes deathly ill. The doctors wash her blood several times, but the combination of poisons keep making her survival less likely.

Suddenly they are attacked by a fast highly maneuverable cutter from the Xerxh. It was a Xerxh who sliced her with the poison blade. Jess sneaks out of sickbay to the control room and mans the communications station. The Xerxh won't answer their hails, but Jess speaks to them in their language and eventually respond.

Vaant, Vrix, Trazzak, second in command, are all watching her closely. She tells them she is interrupting their internal communications. She tells them that pirates and bounty hunters mainly use those fast ships. Vaant, the captain, is furious and wants to know if this attack is Jess's doing? His scales reveal the mood of the Xaravians. His are now dark red, purple bordering on black! She altered her voice and pretended to be another ship coming to their rescue. Their own other larger ship the Heisenberg was still being refitted. It bought them enough time to reinforce their shields. Jess kept disrupting their internal communications trying to create as much chaos as possible. She didn't see Trazzak give weapons control to Vrix.

Dr. Maisy and Trazzak approached Jess from behind. Jess told them to get lost she was busy. The ship jerked and Jess fell to the floor. Trazzak said "THAT'S IT!" He picked up Jess and hauled her back to sick bay. Soon the Heisenberg appeared and the cutter backed off. The crew of the Galaxos captured the ship and her crew. Trazzak took over as captain of the new ship . He thought her a beauty and was thrilled that they could now add her to their growing fleet of ships.

The book continues to be exciting throughout, with treachery and betrayal. We find out that Trazzak knew she was an Information Officer, at least at one time, as he was trained as one too, but left. Trazzak is increasingly interested in Jess and she with him. We get our HEA at the end.

I stayed up much too late reading this great adventure. I look forward to the next story in the series. Well Done Layla Nash and Juno Wells! 5 SUPER STARS!!

Angie Turner says

I truly like this series

Kayla Nash knows how to spin a tale worth reading a time or ten. Her characters are relatable and very real. I get mad when I have to stop reading to get some sleep, that's how into the story I get.

Nayari says

More and more of the world becomes clear as the books continue. I maintain that they read like television episodes, and are even paced as such. This installment felt a little weaker. The relationship was difficult to believe, with sudden emotions taking over and 180-degree reactions. I understood each character's perspective, but this is the first book where I felt they were kinda forced together for the purpose of the story. Maybe a reread will change my mind. At any rate, I am still loving the world and look forward to the next book!!!

Hollie says

This made for a decent read. I don't think it was worth the \$3.99 I paid for it though. It was a pretty typical alien sci-fi romance that I found to be overly predictable. I'll still check out some of this writers other work though.

Kathryn A. Cardona says

Great book

A good book with lots of great characters. Wonderful interaction between the characters with witty dialogue. I read this book in one day.

Kristen says

I wanted to read all of this series. I really did. But I just couldn't get through this book or the 4th without skipping on ahead. I ended up just skimming over them as they just seem to fall flat and sex scenes got weak and non exciting. The flare of "joining" was basically sucked out of 3 and 4. The first two weren't bad... but the interest dropped in 3 and 4.
