Went on a reading binge after discovering Singh and read all the currently released books in the series. Of the six books out, four focus on Elena and Raphael. The last two books (#5 with Jason and Mahiya, and #6 focusing on effects of the Cascade) were my favorite. I wasn't a big fan of the romance in book #1 and skimmed most of #4 (Dmitri's story - I am super not a fan of "reincarnation" romances) but was curious enough about the characters from the short stories to keep going. Fans of Patricia Briggs and Ilona Andrews will probably like this series. Be prepared for graphic violence and sex (easily skippable without detracting from plot - just flip ahead 2-3 pages each time) 3 stars.
