I won this book from the goodreads giveaway. it was pretty good. I found it sort of simple to read. it did leave the ending for a follow up story.

Nada Loughead says

In the genre of Steve Berry/Dan Brown, what if Hitler spawned children who carried on his evil purposes? Liked the two main characters - the story does have some dark moments but the writing keeps you engaged. I won a pre-published version which drove me a little crazy - god bless editors!!

Lisa Foster says

Adolph Hitler, the name just by itself commands your attention and many books have been written on what if ???

ADolph and Eva Braun survives and hides out. Do they continue their experiments to get the perfect Nazi soldier in Hitler's image or are they running for their lives?

This story is based upon one Nazi hunter who died and his children who finds out what he did as a living and how much money he had of millions of dollars and gold bars. They realize they just didn't know their father and what to know his history and finish his missions. Luckily, money was no object to finance d their tips but dang is their and the story will keep the reader intrigued!!
