Reviewing this book after winning it in a Goodreads giveaway. Thanks, Goodreads!

I initially got this book as a possible guide to help with crafting with my teens (I'm a teen librarian). After reading this, I'm less inclined to use it with my teens (mess and stains, and the fact that teens generally don't use things sparingly...) But now I think I just might use this in my own crafting! This is a guide that lays out, step by step, with clear and instructive pictures, how to accomplish them!

I did not have super-high expectations for this book, as I am generally opposed to books that are entirely project-based, but I was pleasantly surprised! Alcohol inks really are a fast, inexpensive, and ridiculously easy way to make very dramatic changes to non-porous surfaces, so I think it was fine that it didn't delve into all the theory and technique I like to see in more advanced mixed media guides. While some of the projects were obvious or simple, many were truly unique and clever and yielded spectacular results, such as the starlit cloche and the tabletop globe. Despite considering myself rather seasoned at using alcohol inks, I found several surprising ideas in here that I am definitely going to try, particularly the rolling plastic drawer tray. The "after" photo in the book makes it look like a piece of fine wood furniture when finished!

3.5 stars.

Reading this book does not do it justice. You must CREATE the art, fashion, whatever! The book explains easily how to do this, and the illustrations are beautiful and the directions direct. As I have little to no artistic ability [but totally enjoyed reading and looking at the projects], I gave the book immediately to an arts and crafts person I believe will use many if not all of the ideas demonstrated. Her joy when I showed her the projects in the book, I believe, proved me correct.

I received this book in a Goodreads giveaway

This book is great. Before reading it, I had not heard of alcohol inks. I like that it teaches you how to protect how to protect your work surfaces up front. Then it gives a variety of projects to try with step-by-step instructions and very colorful illustrations. I really like that it gives you confidence to try these projects and the courage to experiment on others.
