## From Reader Review Darkbane for online ebook

### Clodagh says

This has been on my to-read list for three years. \*Yaaaawn\*  
Come on, this is my favourite Isobelle Carmody series!

Edit 18/2/15

It's been almost four and a half years. Still waiting.

28/5/16

5 and a half, coming up 6 years. At this stage I don't care how shit it is, I barely even remember the first two books anymore so I won't be able to compare.

---

### Naomi says

Grrrr! Hurry up and release already!

---

### Fia says

Oh yay, I just love waiting 11 years between sequels...

---

### Daisy says

"published in 2016" -2017 status

---

### Ashley says

Saw a recent comment from the Mistress of Neverending Waiting on a forum today that she's aiming for it to be out 2018 sometime. So that probably means it won't be out til maybe 2020? Why not add a couple more years to my 12 year wait. Sure. Why not.

Set reminder: check in 3 more years.

### Morgan Tonkin says

17 years and  
counting.....  
.....

## Grace says

Grr. Carmody is really getting on my nerves. Release a book already! I'm sick of waiting!
