I really liked wolf shifter Alex Lupe. Even though Lyssa Reinholt and Alex have been married for three years, due to his undercover work for the DEA, they haven't been together for a long time. Lyssa is under the impression that Alex doesn't want her in his life. She is very much mistaken and Alex must prove that to her while trying to keep her safe from a serial killer who has so far been unsuccessful in trying to kill her. Action packed from start to finish. Light on the sex scenes but clearly a romantic suspense novel. Everything Alex does, shows his love even if he won't actually admit it. This is an enjoyable addition to The Pack series.

This is the second story in the series which can be all stand alones and I enjoyed this one far more than the first. Lots more action mixed in with the talking, thoughts and emotions. I will say I'd been curious about the hero from the quick meeting we have of him in the first book, so that started me off on a good foot. The way they think and act, especially in the beginning did not go in a predictable manner which was interesting. I liked it. There were several things as far as the way things were handled on the official cop end of things which kind of red flagged in my head, but over all I was able to ignore whether they were handled correctly or not and just enjoy.

THis is not to my taste and I didn't read the book. I didn't care for the synopsis.  
I liked the look of the front cover.

I love Karen Whiddon shifter books but this one was really difficult to get into. It started off really slow & the end was predictable. Mostly, the thing that turned me off most was the fact that I found Lyssa to be annoying as hell!

Entertaining shape shifter romance - and I'm not a huge fan of werewolf stories (not much for vampires either).

Hero is a DEA agent. Three years previous, he married the heroine as part of an undercover operation. They had a physical relationship but he didn't hope for more since he's a shifter and she's a human who doesn't believe in the paranormal and doesn't know he's a shifter.

I genuinely liked the fact that the heroine was a cat person and a vegetarian - married to a red meat eating werewolf. Funny. The cat doesn't like him. Little conflicts like that make fantasy feel more real.

The heroine is being stalked by a rabid serial killer. Hero reenters her life to protect her.

What I hate with so many of these romance novels is the bickering, the heroine insists on helping, won't take no for an answer when we all know the hero will give in. So why waste eight pages of the inane dialogue?

However, she doesn't always get her way. The hero does manage to stop her from participating in the more dangerous operations and he is the voice of logic and reason when the heroine fails to see both.
