Thomas says

A series of short articles and stories.

Jamie Belanger says

This is almost like reading two different books. I was convinced I was going to give this book a 2-star rating based on the first half. It starts with a collection of legends about an Irish hero named Cuchulain. Many of the legends have tons of internal references, and the text quite often tells you to (see page 17) or (see page 22). This makes the first half of the book feel like it was slapped together.

The second half of the book is devoted to Arthurian legends, and has a much more coherent feel to it. The stories flowed well into each other. Basically, the second half had the same level of polish I had come to expect from the other books in this series. The internal artwork was excellent throughout, even in the lackluster first half.

In summary, I'd give the first two chapters of this book a 2-star rating, and the second two chapters a 4-star rating. If you start reading it and get annoyed, just skip to the Arthurian section instead of abandoning the book completely.

Charles says

This was my first encounter with the myths of Cú Chulainn. Still has a warm place in my heart.

Athena says

My review for all of these books in this series is the same.

Time-Life has once again done an outstanding job putting together a series. From cover to cover they are thoughtful, beautiful books. I'm starting to sound generic, but it's true.

I'm a DK fan, I like white backgrounds and side notes with clear sections for every subject. This series has none of that. What they do have is an old book feel. Timeless artwork, thoroughness, and very well written makes these a must on my occult/paranormal bookshelf at home. I've been collecting the series slowly over several years and still have a few books to go. I refuse to go on amazon and buy them. It's all in the hunt for me. There is no subject they have left untouched. I highly recommend them.

David says

Not too bad. Some beautiful pictures and some very familiar tales.

Mark Austin says

I loved stuff about knights when I was a kid and this one hit the spot exactly.
