Unexpected Circumstances Savage7289

Isabella is a handmaid to Princess Jessica, Daughter of King Aro. When a knight from a neighboring kingdom wins his choice of bride, Sir Edward bypasses the princess and claims the handmaid instead. Isabella suddenly finds herself married to a man she does not know, and is tossed into the middle of political plots and scheming nobles. Her life is further turned upside down when she is unable to give her husband the one thing he must have.

Rated M for themes and eventual citrus, of course.

I love everything Shay writes and I'm so glad to see some Fanfiction being added on Goodreads. I've probably read equal parts Fanfiction and published materials!

An amazing story by Savage! Many of us in the fandom remember Concubine-gate and the raging debates but let me say, I'm pleased how everything turned out.

Google the video of the guy who plays Aro reading part of chapter one on VH1!

An absolutely guilty pleasure of mine. This is my second time reading it and I had forgotten how much I enjoyed this story. There is no way I can possibly be objective about this book. I first picked it up at a time when I needed the comfort and assuredness of its premise and characters. And I will probably love this book forever and am indebted to the author for writing it. How is this book not published yet?

I absolutely LOVED this story!!!! Once again I was sucked in from the beginning, desperate to find out if Bella and Edward would fall in love and live HEA. I cried a few times but the author has a habit of making me do this.

Some disturbing and graphical scenes but very well written and I thoroughly recommend this story. Read it, you will not be disappointed!

From all the Fanfiction I have read reading Twilight, this is absolutely my favourite.
