## Solerra the Lost Woman Jonas Lau

In Zymaria, a land now ruled by a malicious sage, there is a small town still untouched by the evils. Turik, a twelve year old boy abandoned by his parents, resides with his Grandpa. Turik and his grandpa live a simple existence, farming a small plot of land until Turik is old enough to be taught the only trade his grandpa knows: hunting. When Turik finds an egg following his first hunting trip, its hatching provides Turik with a trusted friend and a world of trouble. When the dragon he befriends is discovered, they are sent on a long journey. Turik becomes haunted by a woman in his dreams. He feels drawn to this woman as he begins to wonder if she is the key to his success. Turik will have to choose whether to put his quest on hold to find the lost woman, or continue without her. Will Turik like what he learns along the way and will he become the leader Zymaria needs?

## From Reader Review Solerra the Lost Woman for online ebook

### **Florence says**

I really enjoyed reading about Turik. This fantasy novel had real characters that feel like someone you could meet in real life, as if the story could really happen! The dragon's presence was beautifully described, as was the woman in the dream. This is a lovely tale and highly recommended.

### **Amanda Kern says**

#### **Good start**

This is a good start to the series. I only gave 4 stars because a couple of places I got a little confused. Otherwise I say bring on the next book.

---

### **Marcus Williams says**

#### **Very exciting!**

Turik is one of the most compelling characters I have read about in a long time! The book is well detailed and never fails to be dull. If you have never read this book I urge you to read it. I will defiantly be buying the next book tomorrow and continuing this series! Great read.

### **Alicea says**

Trick question! Everyone likes dragons, magic, and talking wolves! Luckily, the book I'm reviewing today has all 3 plus myths, sword fights, and turnips. (I think the turnips must have a significance to the rest of the series because they keep reappearing.) I'm talking about Turik and the Lost Woman (Turik Saga Book 1) by Jonas Lau. This is the first book in a series for middle grade readers although that shouldn't put off readers of other ages. :-) Turik is your typical 12 year old who is trying to become a sage, save people from evil forces, and fulfill ancient prophecies. No biggie. I resisted the pull of this book until about 3/4 of the way through because I was determined not to get sucked into another series...I failed. (In fact, I decided to support the author by buying the second book in the series, Turik and the Elven Queen.) If you're a fan of adventure stories, the Viking era (there are no mention of Vikings but I keep picturing them for some reason), and magic then you really can't go wrong here. Lau is an imaginative writer and while the plot tends to drag in places it really picks up after the midpoint and barrels right through to the conclusion. I defy you to finish this book and not want to learn what happens to all of the characters. (Will we get to see Bernard again? What's the deal with Noam?) Solid 6.5/10 for this one.

PS I was sent Turik and the Lost Woman by the author, Jonas Lau, for review purposes. This has in no way altered my opinion of the book. XD
