Kill Switch Gordon Bonnet

Choose a Side.

When high school teacher Chris Franzia comes home on the last day of school, he finds two FBI agents waiting for him. A string of seemingly unrelated murders has left them baffled, and they can find only one commonality. All five victims shared a college class with Chris thirty years earlier... and now he may be next.

Struggling with the sheer impossibility of the situation, Chris's skepticism fades after a series of failed attempts on his life makes things deadly clear. Thus begins a harrowing cross-country race, forcing Chris to put together the pieces of his past while staying one step ahead of his mysterious assailants. Can he make the connection in time? And will the deadly picture of reconstructed memory be worth the price of knowing?

From Reader Review Kill Switch for online ebook

David Huelsmann says

I kind of like Science Fiction but having been avoiding it for many years cause I kind of overdid it when I was younger. This book has an element of Science Fiction at its core but it is also about remembering events from 30 years ago and government interference. Stick them all in a mixing bowl and this book is what arises!

Bob Silverstein says

Another hit by Gordon Bonnet

I'm really enjoying stories by this author. This was the 6th book of his that I've read and pretty much enjoyed them all. I've noticed that reviews on this book are all over the place. I too noticed a few things in the story that defied logic, like why didn't Chris ask so-and-so question when he had the chance. But, I'm very forgiving if I really like the story. The ending was kind of neat, merging with the story line from "Signal to noise". If I hadn't read that one first, it never would have clicked. Stephen King and several other authors use this writing device as well. All in all, I would recommend this book to those interested in mystery/SciFy.

Greer Andjanetta says

An entertaining mystery, easy to read and a plot that keeps the reader interested. A slightly weak ending, as if the writer wanted to finish up in a hurry and get on to something else but overall well worth the time spent to read it.

Margaret Wray says

This is not a bad book by any means, but sometimes the plot was confusing and you got lost along the way. The main character is just your average person and gets caught up in his past history and is trying to find his way out.

Tony Jay says

Lazy or Clever?

I think, whenever I read through to an unfinished ending, that I could write like that every time. In fact at school I could always write a piece of fiction and finish on time for any schedule. The trick was the awakening of the character to realisation of a dream.

The tough part of creating a worthwhile story is not the first page but the last. Anyone can start a story but only only a good author can end one in a satisfying manner. I think about this every time and I calculate

whether it is a worthy finality or an irritating enigma.

Occasionally it is a worthy enigma and this just scrapes in under the wire in the last few slightly predictable lines. I greatly enjoyed the pace and the mystery, the central character was slightly dim for a teacher but he's a biology teacher so that's normal (yes I'm a teacher) and he gets there eventually. It's a fun read and kills time beautifully.

Jack says

Do you remember what happened thirty years ago in a particular class in college? I'm not sure I remember 30 minutes ago, but then, I don't have two FBI agents meeting me in my driveway to help jog my memory. Thus high school teacher Chris Franzia spends the last day of school before summer break. A string of seemingly unrelated natural deaths has brought the FBI to his door because they were all in the same class. And then things escalate quickly.

The characters were fairly well developed. The story moved along quickly. And the sense of being lost and alone carried through the entire book fairly well. Paranoia plays pretty well.

My favorite part was Chris meeting Reverend Joe and growing to respect him. Religion often gets a bad rap, sometimes deservedly so, but there are people who attempt to be the best example they can be. We're all only human, even if we don't always act like it.

The first half of the book is utterly fantastic. The rest of the book was good, but, understandably, was unable to maintain that ratcheting tension and probably didn't need to. But it was an extreme change.

Well worth reading, though. Very good.

Vinutha says

Chris Franzia gets home only to find FBI waiting at his doorstep... Sounds interesting?? Such an explosive start & it got me hooked immediately. But half way through this thriller the narrative loses its steam...It had all aspects mixed from paranormal to FBI to motivational speeches... By the fag end of the book I was as exhausted as the lead character was...The end was a total disappointment & throughout the book there were sub plots that was left unfinished... Overall giving it 3 stars for the racy first half

Lynda Kelly says

I packed this up at 34%. It started well but then veered off into fantasyland and became too unbelievable for me. The drunk Chris happened across at a motel knowing all his business was that one step too far. What a shame.

It was awful for him not having a clue who he could trust and who was possibly sent after him to kill him but making random strangers suddenly aware of everything happening was too bizarre. I let a couple pass thinking that perhaps there was a way they might know all his business but I couldn't accept it happening yet again.

There were the odd errors. This sentence read all wrong- "...out of a deep, dreamless sleep by the his cell phone ringing" then "had mythological feel" lost a from the sentence, and "to living room" lost the. I

wondered too if he was sponsored by Save-A-Lot since he'd mentioned them 3 or 4 times when I gave up on it !!

A pity it just crossed that threshold from black or white into grey areas as it did for me.

Jen says

Kept waiting for it to get better, but it didn't. Not really. And the ending felt very anti climactic. You have no idea who to trust and everyone is hiding something and you don't really learn why everything that happened happened. Kind of disappointing. But at least the dog lived.

Michelle Loves Books says

I enjoy this type of book. A suspenseful mystery that pits the "average Joe" against the bad guys, with the good guy staying one step ahead of being killed by his wits and lots of luck. There's a girl thrown in the mix to keep life interesting and to add a bit of a romantic thread while not being over the top. A fun read with some plot twists to keep you guessing.

QueenJ Reads says

Going into the story, I wasn't quite sure what it was.

Based on the synopsis, it sounded like a mystery and I like mysteries so I took the plunge and found myself thrust into story in the realm of sci-fi and the paranormal.

The story of Chris Franzia, the high school teacher whose life changes when he's approached by FBI agents at the end of the school year, was an interesting one. As I've stated before, I do enjoy seeing what characters do when out of their element. He's a pretty average guy who, among other things, finds out that that his some classmates are dead and also ends up getting his house blown up.

If this kind of thing whets your mysterious/paranormal appetite, you might like this work.

While the plot is crafted realistically—despite its category—and developed enough to the point where I could see where the author was going, there were times where it felt a little like rambling and I wanted to know more about these aliens that figured into the story.

Nevertheless, I was gripped enough to keep reading.

If you're a sci-fi fan or you're looking for a good mystery or sci-fi story to pass the time, I'd recommend it. It's a good, solid story.

4 out of 5 stars!

Jodi Bennett says

I really enjoyed the first 4/5 of this book. Everything kept moving along and a good pace. The characters are great and very believable especially Reverend Joe and his wife. This is not really a book about aliens, at least not in the usual sense. That part seems just out of reach. The ending was sort of a let down for me, but I like the questions it brings up. I am definitely going to read more of this author.

Tulay says

Paranormal!

Always stayed away from paranormal, conspiracy and vampires type stories. Finally tried to read at least one book, to find out was I really missing something? Know I definitely know this kind of plots don't entertain or teach me something.

Patricia says

Unsatisfactory ending

I was drawn in quickly and enjoyed the first three fourths of the book by the believable and strong plot; however, the ending was very weak and disappointing.

Walter Scott says

One man finds himself in the center of the bulls eye when two government agencies battle each other as one goes to any length in order to maintain control over a priceless secret discovery, and another one is on a killing spree as it tries to take it for their own.

This is a fast-moving thriller with a likeable main character (and his dog, named Baxter). Chris Franzia is running for his life.

The story also invokes the paranoia that drove the original X-Files (but is much, much better than recent attempts to resurrect the television series).
