## **The Legend of ZERO: The Scientist, the Rat, and the Assassin Sara King**

This is what happens when, in the chaos of an alien apocalypse where the all-powerful galactic empire of Congress has laid the smackdown on Earth for breaking its universal laws on genetic experimentation, the world's smartest human (sort of) swears to obey the galaxy's greatest assassin (definitely) on Wednesdays through Mondays, if she will give him Tuesdays in turn. It is a 85,000-word kinky romantic adventure from the Legend of ZERO series where Rat and Sam struggle to survive the Apocalypse (and each other) before they meet up with Prime Commander Joe Dobbs and the human genetic experiments that he's taken under his wing. One of a series of 8 novels and novellas created to fill the gaps between Books 3 and 4 of the ZERO series, if you're a lover of military sci-fi, space opera, first contact, apocalyptic adventure, or science fiction of any sort, sink your teeth into this one and enjoy!

## **The Legend of ZERO: The Scientist, the Rat, and the Assassin Details**

Date : Published January 13th 2016 by Parasite Publications

## **From Reader Review The Legend of ZERO: The Scientist, the Rat, and the Assassin for online ebook**

### **Ruthie Van alstine says**

Love this series, the book is great but I want to hear what Zero is doing in addition to the great story about his brother.....

---

### **Jason Gossell says**

#### **Sci-Fi doesn't get more fun than this!**

5 Stars for the purely enjoyable story.

I can't stress enough how much I am loving the Zero Universe. Great character depth with plenty of twists and turns. Sara King is what writers of fun Sci-Fi should strive to be!

---

### **Eric says**

Ok but below-average fiction on all counts, except in degree of derivativeness...

---

### **Todd Gutschow says**

#### **Great continuation of the series...**

The final chapter of this book was worth the whole series. I wasn't happy with book 3 and how it seemed the author was portraying humans as nothing but raping and pillaging savages. It was my hope that in book 4 there would be an explanation to this...and I believe there was. Either way, book 4 was a savage read and the end chapter had a chiller reveal that the author pulled off to great effect.

---

### **Ian says**

This was a fun read. Slade getting some print time is well worth the read. The experiments were defined more and a peak at the meta plot was unveiled.

Well worth the read.

---

### **Leather says**

To be completely honest I disliked two chapters in this book. (The one with the AD&D scheme, too long, and the one with the lab's ghosts) All the other chapters were awesome, as incredibly good as usual. It's the best scifi universe i have read for a very, very long time. The characters are great, the plot is incredibly rich, incredibly smart, and the humour is omnipresent. Can't wait to read the next one !

---

### **Daniel Havens says**

I absolutely love these three, and this book is just like candy to a baby...Give me more please!!! Cannot wait for the next Zero book and to follow these three into the next chapters.

---

### **Pablo Giambelluca says**

This is not a spinoff... this book has a lot of what I feel is important information to know before reading the next book in the Legend of ZERO series. I loved it from start to finish and it has a lot better pacing than the last one. I feel taking this out from the next book and making it standalone was a good decision although something should be done to inform people that reading this is IMPORTANT for continuity. I don't want to spoil but there is a heap of information you can get from this book.

Now the waiting starts for the next book... while I'm waiting for that I started SPIN from Robert Charles Wilson and I'm enjoying it quite a bit.

---

### **Brian Remmerde says**

I was so engrossed by all the books from this author that I couldn't stop, I read 3 novels and 2 novellas by her in one month then 2 novels in another series from her the next month! I haven't read a science fiction author this fantastic, this exciting and non formula since the greats like Azimov and Clarke. You never know what to expect from her, just when you think you have the plot figured out, she throws in a curve that comes out of nowhere!

She doesn't go by the numbers, there isn't always a happy ending but you will be sacrificing your children and skipping meals to make sure you can buy the next novel in the series! Read this book, read the others, you can dko them in order or not, they're that different, that new, that enthralling, you won't regret it!

---

### **Jim Kratzok says**

#### **Amusing story.**

This novella has a lot going for it. Action, snarky dialogue, mutants, and violence enhance the plot. The end of the world is a minor threat hanging over Slade and Rat's heads. Somehow I don't think it will be a problem.

---

## **Patrick Barnes says**

### **Engrossing**

The book takes the series along all sorts of new turns, with the question of human extinction still open. There are new characters introduced and the power struggles are more complicated. The various forces determined to extinguish humanity are merging and the humans who can prevent extinction are beginning to merge also.

The book is fast and the characters, old and new are becoming more better known to the reader. They are also changing as they interact. The story is very interesting.

---

## **Kevin says**

Loved this little "detour" from the main storyline because it spent some quality time with great characters who may not have otherwise been featured so prominently. Highly recommend.

---

## **Chris Paul says**

### **Zero books are awesome!**

I love character driven books! From sci fi to fantasy, for me the story is all about the characters and getting to know them, not necessarily if the or when the good guys win. Sarah King does this with expertise. Of course plot and setting are important but I love to know the characters as if they were my friends or enemies. I picked up Legend of Zero through Amazon unlimited and haven't looked back. In fact even though I got to read the series for free I went back and bought the books so I could always keep them in my library for re reading.

If you like Hitchhikers guide to the Galaxy, The Wheel of Time, Dune, Star Wars, V, The Dark Tower...you should be able to love and appreciate Sarah King. Happy Reading!

---

## **Marisa Beltran del rio says**

### **Wow!**

Absolutely thrilling! I first found Sarah King with this series two weeks ago and she's jumped to the top of my favorite authors list. Her books are compelling, tear jerking, and laugh out loud amazing. The characters worm their way into your hearts and I'll be burned if Congie dialogue hasn't tried to come out of my mouth in daily conversations. Find a chair, a mug of your favorite brew, and don't bother making plans for the rest of your day - you're not going to want to put these books down.

---

## **Barbara Brownell says**

## Oh my G

Once again. This woman intrigues the living daylights out of her books. I started off with the alaskan series. Then on a whim because they sounded so far out of what I would normally read decided to read outer bounds then went looking for her other books. And Zero was the next set. I am now chomping at the bit I need to know I NEED the next book.... Please Miss Sara have mercy....
