Good series

Fun and interesting characters weaving the plot in various directions. Looking forward to the 5 th book to see how the tale ends?

Erth says

love, love, loved this series. couldn't put down until all 4 books were read.

Gloriamarie says

Welcome to Archana, a world different from Earth where some of the animals are sentient and can talk. There are dwarves, elves, unicorns, dragons, and creatures brand new for this series. On Archana a good death is when one is hunted, killed, and eaten as food to nourish others. Everyone has magical abilities which are channeled through wands.

The worldbuilding is handled deftly and in an interesting manner that engages one in the character and plot development at the same time.

Michelle says

Another great adventure!

Great series

Love the adventures. A Must read. The invention of a brave new world that draws its readers in right up to the end.

Perhaps 4.5 stars. This book was darker than the others and made me feel a little bleak. I have so many questions. What is happening with Aridis? How will the dragon situation resolve? Will Thenar relent? What about Vesh and Kane and the unicorns? Gus??? Judging by the rate of publication, I'll likely have to wait another year to find out!
