"Now I'm going to ruin you."

I found the way out.

Yet, Ivy doesn't know it. Haven't been able to tell her.

My plan is incomplete. Possibly flawed. The exit from this room is almost in the palm of my hand.

But there's no telling what truly lies on the other side of that wall.

How the hell we'll survive escaping this place.

How damaged we'll be.

Jamie's life is in our hands—one wrong move from us will be her end and yet, I can't afford to let that stop me.

Fuck no.

I'll forsake their lives without so much as a blink to get us out. Their blood on my hands I'll wear with pride.

To survive I'll kill every last one of them.

It's time we finally escape.

We'll die if we don't.

So we are back with Noah and Ivy, they are still being kept in some weird place full of rooms and evil. In this installment we are treated to both Noah and Ivy's POV which I liked and to keep things more interesting both Noah and Ivy get out of that room, but not for anything good I should add.

Now that Ivy and Noah have figured out who their captor is I was kind of hoping for more answers, of course that didn't happen I only have more questions. Who is the male 'master' that their captor answers too? Should I have picked up on who it is? Well I didn't. I did find that this one had heaps more going on which made for an exciting read.

Poor Noah, I felt really bad for him as the captor's played their sick games on him all the while keeping him doped up on whatever the drug is they give him. The part where Noah was running through the dark halls trying to find Ivy, had my heart in my throat the whole time. As usual the sex was hot and intense.

This series is seriously messed up lots of blood and freaky characters, there is no way you can get bored. For me this series is very unrealistic which I usually don't like but I am really enjoying in this series.

OMG!! That's just super mean ending it like that, I **NEED** want the next book so bad right now.

“Forget hatred. Forget loathing. This is something way beyond that. An evil in my heart so vicious I can't help but be frightened by it. I want her blood on my hands almost more than I want to be with Noah right now.”

I went into this book looking for answers. Will they escape? Will they get revenge? Not all my questions were answered but this book draws you in and you have no choice but to play the twisted psychological mind games.

Noah and Ivy are still at the mercy of sick and deprived individuals. They are looking for a way out of this nightmare and still holding on to hope. But what will the cost of freedom be?

This series is a “whirlwind of dark emotion”. Right when things looked the worst, BAM....what???? Oh my god!!! That ending!!! What just happened and what is coming next? I cannot get enough of this series. If you like intense dark reads this one is a must.

“My heart races with newfound excitement, hope, and bloodlust, but just as last time, my expression remains flat.”

"Everything's a game. Survival of the motherfucking fittest."

I pulled through to the end of the series folks. (is it the end... who knows...)

Did it pay off? No.

Will I get those couple hours of my life back again? No.

Do I regret it? No.

Although the Voyeur series went on a downward spiral for me, it got a lot of 4 and 5 star ratings from people that I trust on here. With reason, I can see where the love is coming from - the premise of this series is hot and it pulls you in right from the start. I really don't regret reading it, because there is nothing like it out there. That is the true origin of creativity and I'm grateful I got to experience it.

On To The Nitty Gritty

The love was intense in this addition. It was practically palpable off the pages, it truly lived up to the climax that readers were waiting for. However, that was the only good facet of this book for me.

“Bring her back or I’ll burn this entire place down.”

My jaw aches from how hard I’m gritting my teeth. Even I can’t deny the volatile danger in my voice. “Is that a threat, Mr. Barker... You are in no position to—”

“It’s a motherfucking promise.”

Here's a confession:

I really did not know what the fuck was going on half the time. There were new but not introduced characters added, there were dramatic changes in tone and mood, there was shit happening that I didn't know how it lead up to that shit happening. No to mention, the whole middle section of the book - I was lost. Completely.

So in a way, this rating might be based on personal fault. However, the last two books in this series didn't hit any highs with my review scale... So I'm thinking, I'm okay with being the evil neutral here.

There was a critical plot point in the story, that not only did the characters brush over.. but this happened right after:

"My pussy throbs at the friction."

(view spoiler)

I had so many of those ?!?!?!? moments, that I ended up putting off this review, until after I cooled down from all the ?!?!?!?. So this review that you're reading here, is actually Alex, after a couple of days of inhaling and exhaling.

So after another session of drugging poor Noah much to his distress awakens to find his Ivy missing. Vanished. Left the building. And the gates of there prison are now wide open to play.

So as Noah is going nutty searching for his love there are still so many questions to be answered.

Who is the familiar masked male?
Why is this happening?
Will they make it out of this nightmare alive and together?
And that finale is it real or just another sick torturous game to mess with there psyches.

Noah and Ivy, I will be praying for you both.
After finally connecting you need and deserve a happy ending.
Just keep your pants zipped for now you need to concentrate on escaping not shagging.

If you are like me and followed the this amazing series from the very beginning, then you know just like me that Damaged is finally....Finally going to give us a few answers.

Ivy and Noah are still being kept, still being watched, still being made to do the most depraved and intimate things to each other. But this time they have an audience. Whereas before they knew that only one was watching, now they have a whole audience to entertain.

They are both now finally aware of who took them to begin with. Even though they both don't voice it, they are both hoping they can use it when they escape and feel freedom.

But now there is a new player. Someone who watches their every move. Someone who likes to order them to do things.....He's calm, collected and dresses like a man with power. But his face is always hidden.

So why is it that both Ivy and Noah see him as familiar?

Why is it that both Ivy and Noah seem to know him, but they just can't remember from where?

Who is he?

And why is he playing the game with the evil monster that pierces both Ivy and Noah's soul with demands that even we as people just simply cannot imagine?

Who is this duo?

And what do they want?

Can Ivy and Noah survive the depths of hell?

How far can they be pushed before they break both physically and emotionally?

What happens when the monsters decide to change the game and keep both Ivy and Noah separated?

Who's blood will spill?

Who will lose their mind?

Who will be victorious?

Guys again these amazing ladies have given us another grueling installment of the Voyeur series. Twisted, dark, raw and gritty, my mind is still trying to catch up with what I just read. These girls have consistently given us a mind manipulation with this series and Damaged has delivered yet another torment of the mind.

I absolutely loved it.

But be warned....The ending will leave you.....Hmmm what would be the best way to describe it.....

Completely tormented psychologically!!!

Damaged is INTENSE. My heart was pounding the entire time! And that ending.... Gah!!! I can't wait for whatever happens next!

Nadia Debowska-Stephens (Obsessed by Books) says

Book four in this series continues the story but adds little to the plot. Gaining a Master, as well as the Mistress who they both know recognise, Noah and Ivy are still blind to the bigger picture only aware that they are players in a game that end in their deaths. Knowledge is power but they are too drugged to actually plan how to escape, too caught up in the allure of each other to actually prioritise the situation and the impact events have on them. This series started off with so much promise and yet I have to admit I'm half hoping they both just die, as I have lost all hope that they can take the masters down and end the game once and for all. It's escalated from a woman who hates them out of envy to a well funded organisation with enough power to have its own army and its clear this isn't the first time this game has been played so I struggle to see how they can defeat them which makes Noah's threats empty and in vain. Book four delivers more threats, violence, torture and sex. The premise is still good and different but the pace lets the series down and the lack of answers is frustrating. That said I'm not giving up as I really want to know what happens and who and why... my only fear is I won't get the answers to all the questions.

A three star blood and sex read.

Damaged is the fourth book in The Voyeur series by Elena M. Reyes and N. Isabelle Blanco. Every installment of this story has held my attention, excited me, and made me crave more. This one was no exception!

Noah and Ivy were kidnapped and locked naked in a room where they have been repeatedly drugged, starved, witnessed their loved ones die horrific deaths, forced to perform sexual acts for an audience, and had their minds tortured to the point of near insanity all under the orders of a disembodied female voice coming through speakers where they are being held. While they may not see the woman in charge, there is always a host of strange and terrifying people that help to carry out sinister acts at her behest.

This segment of the story was slightly different from the others. Noah and Ivy didn't spend the majority of their time in one room. They were out of their cell for most of the book, but what they found outside of it was just as unsettling as what they were subjected to inside.

Our characters finally get to see the woman behind the operation, and she is exactly who Ivy thought she was. The surprising thing is she's not alone! There's a masked man that has been a part of this whole thing the entire time! His identity remains a mystery, but I have a few ideas as to who he might be. I'm anxious to see if I'm right! As unexpected as that was, the most shocking part of the story actually happens on the very last page. I'm not going to tell what it is though. You have to read and find out for yourself. Muahahaha!

Damaged is a well written dark romance full of suspense, steam, and a whole lot of crazy! The authors' writing never fails to draw me in on the first page, and I always read these books straight through. They're impossible to put down!

I've been having my mind toyed with along with Noah and Ivy since the beginning, so I couldn't be more excited to be close to the conclusion! I'm dying to know the answers to all of my questions, and I'm praying I get to see them make it out of this alive! If you like your romance with a side of psycho, this is definitely the series for you!

Natalie The Biblioholic says

WOWZA!! The situation for Noah and Ivy is more intense than ever. Now that they know one of the players involved, they've got to use this knowledge to their advantage. But what edge do they really have when they're surrounded by crazy? What do they do when everything they've suffered through and will continue to endure makes them question their own sanity?

With no weapons at their disposal, no clothes, and with them constantly being drugged up all the time, I'm extremely curious as to how they'll get out of this. Someone they both care about is still in danger and if they don't continue to pretend to play the game, another life will be taken.

However, this particular installment gave me hope. With the way things have been going it could be false hope, but I'll take it. Once again, these authors tortured my mind in the most beautiful of ways. I was completely drawn into the torment these characters were put through and while I'm rooting for some sort of happy ending, I'm enjoying the sweetness of the dark ride to get there.
