Capital Crimes

Stuart Woods

Capital Crimes Stuart Woods

Will Lee, the courageous and uncompromising senator from Georgia, is back-now as President of the United States-in this fifth book of the *New York Times* bestselling series that began with *Chiefs*.

When a prominent conservative politician is killed inside his lakeside cabin, authorities have no suspect in sight. And two more seemingly different deaths might be linked to the same murderer. From a quiet D.C. suburb to the corridors of power to a deserted island hideaway in Maine, Will, his CIA director wife, Kate, and the FBI will track their man, set a trap-and await the most dangerous kind of quarry, a killer with a cause to die for...

Judy Green says

UNC+

Denise says

Capital Crimes by Stuart Woods is an intriguing read about prominent conservative politicians being targeted and murdered. It was an interesting, easy read book that kept me intrigued until the last chapter. 3.5 stars

Lane says

A good fast paced story in the series. It lost a point in the ending as the story seemed to die and we are left hanging. Maybe the next book will fill in the blanks.

Judith says

Kept my interest because of the characters... well developed and believable. Scary because of the skills the folks of the FBI and CIA seem to possess! ?

John Sklar says

Another great story with great characters. I love the twists and turns and could not put this book down. In fact I read it in a day. I'm beginning to be sad that there is only one more book in the series. These are great books but.... I have read the Stone Barrington series and that has tipped me off as to some of the action... still great stories.

Valerie says

This is book 6 of Stuart Woods', Will Lee series. Stuart Woods has done it again; he's put out another top-notch book. There's plenty of action, and a host of new characters; hopefully they'll carry on to the upcoming books. Enjoy!

Maggie says

It's fun reintroducing yourself to how story lines started.

Debby says

If I wrote "spoiler" reviews, this review would be on fire! No kidding! I HATED the "surprise" ending of this book that much!

From the narration of the book jacket, I heard the book had a fantastic "surprise" ending, so I'm really excited to read this book. From the very beginning, the book is riveting, great story, very suspenseful, great characters. It gets to a high point in the story, the "bad guy" appears to get away again and I think, "What's going to happen next?. Ohhh this is going to be good"...right? Then within 15 minutes (remember, audio book), the book ENDS! I'm listening and a loose end that I'd been waiting to see how it would be resolved is dealt with and then I hear...Acknowledgements. WHAT???? THE END???

Stuart, did you wake up one morning and decide you were tired of writing this book and decided to just end it and turn it into your publisher? Seriously! I mean, come on! This isn't a "surprise" ending; unless you consider running into a brick wall popping up out of nowhere and hitting you in the face a "surprise"! Your ending of this book is really more like a "take a few pages to tie up any loose ends in one big knot and call it a day"....surprise ending!

Before listening to the end of this book last night, I would definitely have given Capital Crimes a 4-star rating/review as I was thoroughly enjoying the story. However, the "out of nowhere" ending spoiled the book for me! I'm being kind giving it 2 stars.

Linda Roberti says

Whoa! Pre-meditated murder without a doubt. Character has a lot of hate and the essential skills needed to commit his "perfect murders" so to speak. Scary, his own government trained him. Even though I abhor murder there is a dark side in me that admired his skills including those to avoid being caught. I hope this type of character is in stories only (I know; I'm not that naive but I can dream can't I?). My next book will be Heat by Mr. Woods. Supposedly it's a "Will Lee" book. I'm still searching for the book detailing how Will Lee's wife becomes President. Can anyone help me out with the book's name?

Greer Andjanetta says

A good mystery story featuring well-known (by SW readers) characters and the always entertaining and readable writing style of SW. The end of each story by this writer always leaves the reader wishing the story would go on.

Dr. Thomas Wasser says

Another frustrating read by Stuart Woods. The premise of the book is great! Its the cast of characters that is far fetched and uninteresting. Love the whole FBI characters thing, and the way that they carry out the investigations although I wish Woods would have consulted with someone to find the correct names for the

levels of individuals etc. but the read is a good one up and until you get into the whole Will Lee/Kate Rule thing. I understand its a carry over from and up from Chiefs (which was Woods best book in my opinion). You could really just skip over a lot of the -- in White House -- stuff. I'ts pretty painful.

Its a lazy read and you can't really go wrong with it. It will hold your attention, but there are many situations where you will just have the "oh please" response to things. Easy to see why this line of books just didn't continue but I picked the book up at a book fair for a buck so... It was a good break from the Stone Barrington series.

Still if you like Woods, I would recommend Robert Cries (the Elvis Cole, Joe Pike series. John Sanford's series of Virgil Flowers and Lucas Davenport. And I'm also liking David Rosenfelt (or Rosenfeld) the Andy Carpenter series.

Charlotte Guzman says

I give this book a 3 1/2 stars. Picked for my Mystery Book Club it was a light , quick read. Stuart Woods always writes a good story and this one was good. It kept me wanting to read and who was doing all the killings. You know who did the killings about half way through but then there was the big chase scene at the end and the quick ending. Who was really the cause of all the killings? To be continued I say.

Nicole Diamond says

If it has one star I liked it a lot

If it has two stars I liked it a lot and would recommend it

If it has three stars I really really liked it a lot If it has four stars I insist you read it

If it has five stars it was life changing

Ellen says

Teddy Fay is in Washington D.C. killing conservative political figures.

President Will Lee and his CIA wife, Kate Rule Lee, try to catch him, but he flees to his hideaway in Maine and escapes through a tunnel from his basement and flies away.

He blows up his plane, and everyone believes he is dead.

Ashlee says

Once again I found myself without a second book when visiting family. My grandfather, an avid Stuart Woods fan, was kind enough to lend me a book. Being from the DC area, I naturally picked up Capital Crimes. The book wasn't too bad and I found myself flipping through the pages near the end tied up in mild suspense. I was considering borrowing another Stuart Woods book right before I read the Author's Note, which appears in the back of every Stuart Woods novel that I checked on my grandfather's bookshelf. After reading his "note" I have chosen to stop my Stuart Woods journey right then and there. While the guy has been successful in his writing ventures he makes sure to illustrate himself as a pompous diva. With his elitist attitude to top off the cake, I've decided that I can do without the fluffy dialogue, political suspense novel.
