### **AnnieM says**

It is a great read! A must for anyone who has a rescue dog that poses so tricky traits. My boxer/pit bull cross has a fear of loud noises, men, cars, trucks and much, much more. We are making great headway, but weather and travel have stymied our dog obedience classes.

I have read the Dog Whisperer books and they are good, but often he doesn't address some of the same issues I'm facing. I found this book very attainable and readable. After a short time trying to integrate some ideas I have seen some improvement.

I love this book so much I'm buying a copy for myself and my library. I still love Cesar's books, but feel this one has a place right next to them.

Highly recommended.

### **Chris says**

Pat Miller doesn't shy away from what makes "Do Over Dogs" so difficult to work with but easy to love. Her philosophy of positive behavior therapy is present throughout the book. What I loved was the actual tips on how to work with or train a do-over dog. I also loved how the book ended with people sharing their own experiences with rescue dogs, because after reading the book and struggling with my own new addition, I really needed that hope. Everything will turn out okay if I just keep working at it, and it may take a year or more to get to a point where we won't have to worry.

---

### **Alyson says**

As usual, Pat Miller delivers amazing insights in this book. Pat's training methods (socialization, clicker training and positive reinforcement) are tried and true - on malleable puppies and dogs with unfortunate pasts.

---

### **Lisa Eirene says**

Great book. I skimmed and hit the highlights because it was a library book and I think it's worth buying!

---

### **Rescue Me! says**

Noted dog trainer Pat Miller shares many great tips for training a "do-over dog" - a dog that's been rescued,

found as a stray, or has developed behavior problems.

---

### **Kristin says**

For those of us who have adopted dogs from the shelter or other rescue organizations, this book gives a detailed and honest look at some of the problems you might face. There is also a ton of useful information, practical advice and training tips. My favorite part, though, was all of the stories of real "do over" dogs at the end. I had to get out the box of Kleenex!

### **Peg Thon says**

I love the way Pat Miller thinks and I love the fact that she never gives up. Just with I had read this before I botched up a rescue by introducing her into the house the wrong way. Well, you live and learn and thanks to this book, I will be much better prepared!

### **Mary Nelsen says**

Pat Miller's contributions to the field of positive dog training have always been leading edge and extremely helpful to dog guardians. Do Over Dogs is no exception but especially timely for the many folks who are rescuing and adopting, now. Have to add very quickly that this book will also be helpful to someone who needs to rehabilitate some behaviors in their long term dog which could still be problematic. The ideal reader would be someone contemplating adoption as the suggestions for handling introduction to the household and capitalizing on the honeymoon period would be great to have under your belt on day one! Of course that will not be the case with most readers and the book still holds a wealth of suggestions and ideas to help. Loved especially hearing the suggestion that if the dog is startled by and afraid of the sound of a clicker that another sound such as a mouth click can be used to mark a good behavior that has earned a treat.

### **Alex says**

A comprehensive overview of the most common problems encountered with "do-over" shelter dogs. Every issue mentioned was given a brief overview of potential solutions without being bogged down with intricate protocols.

A good read for a new trainer or an owner who is maybe for the first time experiencing a dog with "issues".

My favorite part with the brief discussion on genetically predisposed OCD behaviors in certain breeds as well as the then and now stories/testimonials highlighting the progress of a handful of reactive dogs.

Owning two rescues with a handful of issues themselves it is always interesting to read behavior profiles of other dogs in similar positions.
