This is a good book, showing that sometimes there's more to the situation than what meets the eye, and you should be careful not to judge people too early.

I did take a little bit of an issue with the Pony Pals wanting to go to the police, but saying they needed more evidence first. I've called the police twice on a former roommate for pot, and they didn't need me to gather any evidence. They just came and checked the situation out. So, it's odd the girls think they need more evidence when all the police have to do is just show up, and then they could see the evidence for themselves. Also, I get the pony needs immediate help, but it's odd they talk about needing more evidence while cleaning up and caring for the pony, thus destroying evidence.

Aside from that issue, though, it was a good book.

This started as a very sad book, but picked up speed and attitude very quickly. Actually, the story moved so well, I never put the book down until I finished it.

I like how the Pony Pals see someone in trouble and take the time to figure out the best way to help. OK, they make mistakes. I really would advise against the snooping they did, going onto someone else's property. Yeah, it worked out in the end but they got lucky. Kids, if you're reading this book, please take note of that fact, ok?

But getting the community involved and going to someone who can help even though the Quinns hadn't wanted them to, was the right thing to do. Kudos to them for making the right decision in that regard.

I finished reading all of the Pony Pals Series today. We do not own the complete set, but I have enjoyed reading them. They are very good books.
