Skipped a lot of this. It just didn't appeal to me. Think I'm going to stop buying these kind of books.

First two books in this series started off super hot and then fizzled in 3&4. I would barely call this BDSM.

Absolutely brilliant for erotica/romance. This is a series of 4 short stories, that flow through together well. In the 1st story I was a bit lost as to the who & why Claire receives this appointment invitation with The Doctor. But as I read on that question just seemed to become irrelevant.

Following the excitement Claire was feeling, hit the nail on the head & I found myself feeling it with her. Quite awe inspiring at times to be put in those situations. To be totally dominated by someone, even to a point that they just watch you being taken by someone else, whom she had & still has no clue who they were. Wow try not to think of that too much.

Then the story becomes even more interesting, Claire realises that she has feelings for The Doctor. More & more deeper these feelings become, she starts to investigate who he is. Cedric Durant, is The Doctor. We still don't know why & who started this off, but the drama soon starts to unfold.

There is more to Cedric than meets the eye. There is a painful past & there are other people involved in trying to keep them apart, but for what reasons. Claire decides she could either recede back to her old self or take the bull by the horns, so to speak & bring this love to a climax. Unconventional, but so is most of this story, she has come so far.

The final section reveals so much & sense is now being made of who, why & where etc. I love the so called interaction with her family, they at this stage finally notice her, but have no clue as to what's going on or any control over it. Yet she has no resentment in any of this, just love & so much love for Cedric.

Very hot & steamy erotica, maybe not to everyone's taste, but erotica is not always romance, hearts & flowers. Cedric loves Claire in return, even though he has his demons of the past that he battles with. Cedric might dominate Claire & own all of her, but he reveals in return that she does in fact own all of him as well. Nice blend of BDSM, Romance & Drama to end with Love, well done.

I was a huge fan of every other Chloe Cox book that I had read, so I thought that I would give this a try. Maybe it was because the story was weird or it was different from anything I have ever read. But I just did not like it. I really tried. I read through to the end but it just did not do anything for me. Sorry Chloe!

The first two parts of the story are pure smut (yum!). The second two parts are more psychological and relational. I enjoyed the whole thing but so many questions I have were never answered that I am left feeling wanting, which may be the author's point. Still recommend if you are into the topics explored.

#### **Great book**

One of the best books I've read in a long time. I would recommend this book anyone. I think I re-read this book about 20 times.

Come inside, Claire.” If I were Claire my feet would be rapidly hitting the pavement in the opposite direction. The fact that she didn’t attest to her dismal state. Depressed, alone, unemployed, and living at home with her parents is the state of Claire’s thus far unproductive life. When she suddenly receives the mysterious black summons, she has no clue what it means or entails. Why she responds to it is probably just as much a mystery as it is to the reader. What possesses her to submit to the spurious exam is beyond my comprehension.

Call me old fashioned. I believe in love and have experienced lust but it has never been about control. I think any intimate actions between two people should be a shared experience and on an equal footing. I have no doubt that some people desire to be mastered and others to dominate their sexual partners, otherwise books like Fifty Shades of Gray wouldn’t make it to the best-seller lists and publications such as this wouldn’t be written. It doesn’t do a thing for me. I read it for the same reason a mountaineer climbs a mountain; because it’s there. The one star I’ve awarded is well deserved. “

Babies in the bargain: 5 stars. Enjoyed the story and the chemistry between the 2.

Rights name, wrong man: 4 stars. Started we'll but got a bit bow red at the end. Maybe too similar to the other story.

No more lies: was an OK read but again similar story line to the previous 2. Emotions are not always believable and the heroine goes too far in seemingly sacrificing herself for her daughter without reason.
