Good read.

I liked the characters. Nothing I disliked. I would recommend this book to any readers who like mystery, romance and legal stories all wrapped up into one book

Not bad. Useful escape reading late at night to try to decompress from the day's tragedies

Great suspense

This kept me reading until I finished the book. I love the way the book is written. I thoroughly enjoyed this book.

Typical Deborah Hawkins novel. She seems to mature after every book. Part thriller and part romantic this is a story that will remain in your head for long.

Gar Wiggs says

Outstanding read!

I'm a fan of legal thrillers so was intrigued when Ms Hawkins' new book came to my attention . After downloading it to our Kindle Unlimited Library, I started reading and couldn't put it down. A spellbinder from cover to cover with a great plot, excellent characters and just plain good writing. I loved its ending!

I can't wait to read her next book!

Donna Alexander says

Awesome

Great story. Ending seemed a little abrupt...but overall well written. It was easy to connect with the characters and their issues. Clean reading without profanity!

Melissa Pouliot says

Deborah Hawkins has written yet another gripping, page-turning, exciting legal thriller. Once I started I couldn't put it down. She has the ability to draw you deep into the lives of her characters, with all their flaws, and the whole book is an escape into another world. I felt as if I were sitting in the courtroom, and could easily see this story on the big screen. Loved it, her books keep getting better and better.

Nancy Livingstone says

Great page turner!

I thoroughly enjoyed this book. Its twists and turns kept the reader engaged and surprised at times. The characters were well developed and believable. The story pulls the reader into the world of law and the humanity of the people who practice it. I would recommend this book for those who need an escape and who would like to walk the streets of law with its many twists and turns.

Terri Lynn says

Kathryn Andrews and her husband Tom were Harvard law grads who had become public defenders to help others but since Tom died of liver failure, Kathryn is ready to leave. Tom and his friends Paul and Steve had grown up together and were champion surfers as well as lawyers. Steve had gone into environmental law while Paul is a lawyer at a top firm. Steve died mysteriously while surfing after Tom died of liver failure from his high blood pressure med.

Kathryn hires top lawyer Hugh Mahoney who has had a career toppling corporate giants who hurt ordinary people after seeing his mom cheated at his dad's death by such a company. He and his team face a lot of hurdles even after finding out that the French company that developed the drug stopped work on it because it caused liver failure and that American company Wycliffe Pharmaceuticals had the FDA approve it and hide at least 600 deaths from it because someone is killing off witnesses and trying to kill Kathryn and destroy Hugh. The book is thrilling and packs a wallop.

Diane says

Enjoyed the book but got tired of hearing the heroine/gal lament about her dead husband and always insisting on staying in "their" cottage because she could "feel" his presence, when many other times, she couldn't! She was in physical danger, yet appeared careless and stupid. I liked the surprise of the one fellow's secret, which threaded story together more, but didn't like continuous goings-on by Hugh, the ridiculous rich guy lawyer and his vindictive wife, of whom we knew nothing. Sketchy characterizations made storyline stump along the bumpy road to any action, and the legal aspect of entire case shed interesting light on situation. The diabolical character of the president, was not unbelievable, however, again, not enough attention given to relationship (s) throughout saga. Winning multi-million dollar payout, not unheard of, but again, not quite believable either. A class action suite would have been more appropriate, given evidence found. In my humble opinion, this was an o.k. read, but I always have high expectations and appreciate good prose and character development.

Shocking ending!

It will be worth your time to read this book. Start very slow, don't give up, keep reading and it will stay with you sometime. Death of a very good lawyer, husband and friend, grieving wife wants to prove drug approved by the FDA killed her husband. Federal Drug Administration is run by lobbyists and they're all there to make money from the drug companies, corruption of approval of drugs. Innocent people are dying and people that are there to prove this are in danger. Uplifting ending will make feel good.

Sucrose

But still sweet just not always real. But more genuine than many and again redemption in several places. Do like the diversity as she tiptoes toward life.
