Human Geography: People, Place, and Culture

H.J. de Blij , Alexander B. Murphy , Erin H. Fouberg

Human Geography: People, Place, and Culture H.J. de Blij , Alexander B. Murphy , Erin H. Fouberg Human Geography: Culture, Society and Space challenges students to think geographically across scale and across a wide range of geographical phenomena and global issues. The authors engage the students throughout the text by posing geographical questions that encourage students to think critically about their own locality, region, nation, and world. In the Eighth Edition, the authors reformat the text to 14 chapters, provide a clear outline of key questions for each chapter, integrate their own field experiences, and rewrite the text to guide students through answers to geographic questions. The Eighth Edition includes three new chapters: "Identity: Race, Ethnicity and Gender," "Local Culture, Popular Culture, and Cultural Landscapes," and "Geographic Networks." The concepts of globalization, identity, development, sense of place, and construction of scale are infused throughout the text. The author team draws from studies in geography and across disciplines to bring a broad and up-to-date perspective on the kinds of research geographers have done and are currently doing on a wide range of human geography topics.

In the Eighth Edition, de Blij and Murphy welcome new coauthor Erin Hogan Fouberg (South Dakota State University), who brings her expertise in geography education and political geography. The author team created a new pedagogy and writing style for the Eighth Edition that make the book more accessible to students and faculty.

Human Geography: People, Place, and Culture Details

Date : Published January 1st 2006 by John Wiley & Sons (first published March 1977)

Squanchers says

Hmmm....Some of it was interesting, but at times it seemed to be too much at once. There were also a lot of typos. I learned a lot from the book, but some of it does not seem like it would help you in life much.

Ali says

I HATE THIS BOOK WITH ALL OF MY BEING!!!

Venjamin says

Taking AP Human Geography out on a whim was probably the best decision I made. I really loved the class, and this is the textbook we used. De Blij was good at explaining what human geography just is. (The human interaction of geography.) I loved how he would introduced each chapter with a story of what he saw in different countries. I also loved how organized each chapter was. Though, at times, I was lost on what he was trying to say. He could have been more clear in the Political, Urbanization, and Development chapters. Over all, this book teaches you what geography truly is.

Angela Pimental says

This is the book that made me become a Geography major!

Ravi Ramchiary says

great one

Scott says

Very great historic description of cultural development with an emphasis on geographic location. The methods involve considering how geography effected cultures and history. For example mountainous civilizations developed differently than coastal civilizations because of the differences of economic inputs and the barriers to transportation and human habitation. Overall, a great book for developing a conceptualization of humanity in various locations both over the course of history and in specific localities.
