From Reader Review Legends over Generations for online ebook

Ronak Gajjar says

ARC received from author for an honest opinion.

Imagine yourself in situation:

And then all of sudden your desk is way to clearer with just stack of few papers neatly arranged with all the necessary and factual data in the order.

Reading this book gives exactly the same contentment feeling!

Categorized under listed topics:

- **Human Rights**
- **Science**
- **Politics over History**
- **Art & Literature**
- **Conclusion** - (**The best part according to me.)

The slots convergence is really easy to steer through with. Author has easily covered:

- Historical facts
- Causes that lead to certain events
- To the straight point essentials
- Certain limited interwoven timeline for each individual mentioned
- Distinction in mentioned categories
- The very known facts with few more details
- Few unknown and attention-grabbing facts
- Selected individual's quotes
- Selected individual's signature
- The particular slot for - **Legacy**
- Influential ripples caused along the 18th to 21st-century era
- The inserted justification for picking categories
- Detailed adequate informative

Few of my favorite quotes:

When a woman is talking to you, listen to what she says with her eyes.

– **Victor Hugo**

The more sensitive you are, the more certain you are to be brutalized, develop scabs, never evolve.

Never allow yourself to feel anything, because you always feel too much.

– **Marlon Brando**

We shape our buildings; thereafter they shape us.

– **Winston Churchill**

Nobody can hurt me without my permission.

– **M. K. Gandhi**

Normally going through non-fiction is kind of tough for me but I literally floated through pages of this one, it made me crave more and more to know how the shape of human settlements have varied from time to time till the date.

It is just perfectly sufficient neither more nor less in every conveyed manner.

P.S.: Thank you, Mr. Ashraf Haggag for the review copy.

I recommend it to all.

SHRADDHA MAHAPATRA says

Legends over Generations is a non fiction book amazingly written by the author Ashraf Haggag. As the name suggests it has in store about the life of 30 legends of history categorised into four sections namely Human Rights Legends, Science Legends, Politics legends, Art and Literature Legends. The best thing about this book that if you want to know about the biography of a lot of personalities in simple language, refer to this book. However, the fact about all these people is kind of well known to the world!

The book is definitely gripping because there are not a lot of books which are a compilation of such powerful personalities.

An applause to the author for giving such books their existence and providing a little tribute to such legends. I received a copy of this book from the publishing house of this book and I am thankful to them for providing me with such an informative book.

If you love history or even if you don't, you shouldn't miss a read on this book.

Ossman Ossman says

one of the good titles that highlights on great people who have shaped our lives and may thus grow better understanding of our day today life. I recommend this book to young readers who must be aware of legendary great leaders

Nick Tymothy says

A smooth read with some useful quotes throughout the entire book. However, the Author missed out on other Great leaders that should have been mentioned among them. An easy read and usable guide for more information into the lives and upbringing of the great ones who have gone before us.

Ken Cameron says

Utterly fascinating. I learned more from this book than I have in a long, long time. I cannot recommend this book highly enough. Do yourself a favor and pick it up soon!

Carlos Canas says

Great guidebook. Very useful to dip into at any section to get some daily inspiration from all time favorite legends. Especially like the highlight on the features required to obtain that level of achievement and leadership. Setting an example for our future generation, Ashraf Haggag has made an effort to bring all the key figures into one book so that we can learn and perhaps apply in some way.

Margaret Stanley says

Well selected collection of legends covering important fields. Although it is not my preferred genre of books to read I found the insights into the historical legends lives quite astonishing and very inspirational. It was also compelling to see that many of them carry very similar traits and challenges. It is an absolute must read and I will pass it on to my kids for sure.

Dave Meyer says

Interesting read with valuable tips for the future generation. Ashraf has chosen leaders from all different fields of life. It was interesting to see the similarities in hardships and challenges that these legends had to go through to become what they eventually were. He sets the book in a structured manner so that the reader can choose the person they wish to learn about. I thoroughly enjoyed it and recommend it to others.

Imane says

“No country can really develop unless its citizens are educated.”

-Nelson Mandela

I received an early copy of this book in exchange for an honest review, so I wish to thank the author for giving me a chance to read his novel.

Legends over Generations is a brief summary of the lives, achievements and importance of some of the most influential people in the history of Human rights, Science, Politics, Art and Literature. The information is captivating thanks to the brilliant writing style of the author. This is a great and quick read that gives you some insight into their genius in the context of their times. I also really enjoyed reading all the famous quotes this book includes.

Sara says

I obtained an early copy in exchange for an honest review, so I wish to thank the author for giving me the opportunity to read his novel.

Legends over Generations is a great introduction to well known figures in fields such as science, art and politics. With a simple narrative, the book allows for a quick summary on the lives of personalities like Dalai Lama, Victor Hugo or Albert Einstein. I liked how the author was able to keep a balance between them, giving all an equal importance.

The division of the book was well achieved and I liked how the chapters were divided. My favorite aspect of the novel were the quotes presented and the signature in every chapter. It was an interesting addition that made all the difference.

On the downside, if you are familiar or read extensive biographies on any of these figures you might feel a bit underwhelmed or feel like you already know the information presented. I also feel that, while the ending was nicely wrapped up, I would have liked to see a stronger connection be made with the topics presented

previously.

In the end I gave it four stars. If you would like to meet for the first time or revisit these admirable men and women, feel free to give this book a chance.

Cyndi says

A lot of information in this book. The author gave it to me for an honest review. Honestly? My mind is still reeling. I learned so many things I didn't know about interesting people who were movers and shakers. Actors, scientists, writers, presidents, etc. fascinating book!

Ninosy (Wonder Woman) says

A rich informative book that focuses on people aka legends from different fields in history who left a print in this world that has traces until our present day...

Tessy Ijachi says

Special thanks to the author for giving me a copy of this book in exchange for an honest review.

Two things I won't be caught dead reading;
A. Murder mysteries
B. Non-fiction

When I read the synopsis and found out it was about legends, I immediately became more intrigued. What better way to motivate myself about life than to read about past legends from different generations, had me thinking of ways to make an impact on the world.

This book was very educational and at the same time entertaining to read and easy to understand. There were enough but not too much details and each section of the book was divided into politics, science, literature, arts etc. Which makes it a lot easier to navigate.

One of the things I liked about this book is the fact that it's very inclusive, it did not focus on only science or just politics.

This is a great book to read if you want to learn more about legends but don't want to be bored to death.

So, what kind of Impact would you like to have on the world?

Saleem says

The book was on the list to read for few days and when i decided to start reading it i could not leave it without finish the read, it was interesting to read about the roots of great leaders of several region. I have enjoyed the read and i recommended to everyone.

Khurram says

I received an ARC copy of this book I have no connection to the author Ashraf Haggag.

This is a great book mainly concentrating great leaders of the 18th to 21st century, however there are honorable mentions of a couple of great leader/cultures or people from earlier.

The book starts are with the author stating his reason for writing this book, the takes a short/summary biography style format to person. It talk about what they were best known for, there lives/legacy's and finishes with some of there most famous quotes. These quotes were especially informative for me as I had heard many of the all through my life but never knew who they are actually from.

This is the first book of Ashraf's I have read, I must complement his writing style, because he managed to the right amount of information of each person. This made the book informative without overloading me with facts, and engaging. As soon as I finished one section I went to the next one. The proof of this is how fast I finished it. It is very rare to finish a non-fiction book in just two sittings.

I only have one complaint I have with this book is in the last section, the arts and literature legend's section. This is my personal opinion/prejudice I don't think film actors should be regarded in the same level as the others. Yes I understand acting is an art form, an these mentioned were at the top of their field, as probably more popular then the others, but I don't think their contributions changed or shaped the world. That is my only gripe.

This is a great informative and engaging book, I would recommend it to anyone who who has more than a passing interest in modern history.
