The Spear of Stars

The Spear of Stars Edward W. Robertson
The White Lich has conquered Tanar Atain.

Soon, he means to take the entire world. Dante suspects his next target will be Bressel, where the Tanarians have established their court in exile. The only chance to stop the lich will be to forge a fragile alliance between the bitter enemies of three different lands: Tanar Atain, Mallon, and Narashtovik.

The city stands on the brink of rebellion. Yet even if Dante, Blays, and Gladdic can unite it, they still might not have the strength to stand against the army of the lich.

One last hope may stop the coming destruction: the legendary Spear of Stars. But the weapon was lost long ago. To find it again, they may have to travel further than they've ever known.

Breathless

Thouroughly enjoy the series, been reading since The Cycle of Arwan. Although Gladdic was killed off at the end of this one he will hold a very special place in the garden of Taim. Very interesting character, to turn him to the "good" side since he and Dante shared a similar enemy was a pretty big leap. However, I really enjoyed his transition and his presence with the duo. Will be missed dearly, thank you for writing a character that could have me so emotionally fueled to write about in this message. Thank you for the excellent series and I wait very impatiently for the next chapter of The Cycle of Galand.

*Accurate rating: 4.5

So, I've finally read this novel and i loved it. I didn't give it a higher rating just because of protracted fight between the Litch and our heroes in Bressels and the way they just happen to stumble into the Realm of 9 Kings. In the next novel i'm curious the see some intervention of the gods, i think that would be rather interesting.

Not quite as good as the previous in the series. Still a solid book, but it felt a bit meandering and there were (in my opinion) too many oh-my-goodness-how-will-they-survive-this moments to be realistic. Of course, I'm writing that about a fantasy novel where there's a powerful being that is consuming people's souls and wanting to take over the world, so, yea. But you get the point.

(Audiobook)

With an entire book dedicated to the White Lich, I hoped there would be some kind of ending.

I hate to say it, but it dragged on. And I phased out quite a lot.

To be honest, I'm hoping to look at other peoples reviews to find out what happened in the book because I seemed to have lost track.

One major plot line passed me by.

The humour in the book is still there - perhaps better than ever. But it's a "LoTR: Two Towers" book really.

This was a bit of a dropoff from the previous books. Donte and Blays are still their snarky selves, which at times is humorous and at others tiresome. The battle with the white lich takes way too long. Battles with

mushrooms etc., again, way too long. Robertson could have had a much better 4 star book by trimming a couple of hundred pages. 2 more to go in the series...I hope I have enough resolve to get through.

Ciaran says

It might be because the book felt like 80% battle that I didn't enjoy this as much as the previous ones. Also 2 characters are given a sidequest to go collect a sword and are promptly never heard from again which I thought was odd.

This series is becoming slower then the wheel of time at its worst...

Wonderful story full of adventure, Magic, and my favorite characters. This book effectively moved the story forward while teaching us new things about the characters and world. While it wasn't as captivating to me as the previous book, it's still a wonderful adventure I'd recommend to anyone who follows the series

Leaves you with a let down feeling (SPOILER ALERT)

EWR is a great writer. Dante and Blays are 2 of my favourite fantasy characters, and I've read all the Galand books so far and they were all really good. EWR has done a fantastic job of world building, storytelling and character development so far. With this book, I'm kinda disappointed. First of all, the book is insanely long. The first third of the book is about preparing for the lich's attack. The rest of the book is one long drawn battle with the lich. While it displays EWR's brilliant mind for strategy and battle tactics, it gets really boring after a while. There's no actual plot or story to the book. There's an overload of swordfights and epic sorcery battles. It's only when you reach the last few chapters that new information and plot elements crop up, but by then you're so thoroughly bored that you don't really care. Blays also seems a little underplayed in this one. I'd have given this one 2.5, but the extra star is cos of the brilliance of the previous books. However, I'm still waiting for the next one to come out, cos the ending is a real cliffhanger

Another solid installment in my favorite fantasy series. I found myself slowing down as I reached the end so I wouldn't finish as quickly. I loved the battle scenes— at this point I'm really invested in these characters, so every detail was appreciated. This is a saga, it's not a story that has to be rushed (either by the writer or the reader) and if it continued on for a dozen more books I'd be ecstatic.

Michael Hames says

I really enjoyed this book. Solid mindless entertainment. The worst part is I need to wait for the next book to be released in order to see the what happens next.

Another Heroic Adventure From Two of the Coolest Rogues with "Hearts of Gold" Out There!!

Another thrilling ride with what I like to think of as "The Changer of Worlds". If you are considering reading this book, then you already have probably are already familiar with the duo and simply only need to be assured that this instalment is as excellent as all that have led to this segment. I am officially offering that assurance. If you haven't read any of the series, then by all means go back to the very beginning to the "Cycle of Arawn", and get ready to make two very adventurous friends that before you realize it have become a part of your consciousness as much, if not more so, than "actual" people my have. i have three such duos that probably impossible to chose which I really like best. Scott Lynch's Locke and Jean, Michael sullivan's Royce and Hadrian, and, of course the two created by the present author with his two miscreant heros, Dante and Blays. If you are familiar with the other equally dashing and unforgettable rogues, by my naming them all in the same class, may help you decide that you have just had a wondrous stroke of luck and have been introduced to another.

Nikki says

Turns out I am a sucker for a good fantasy buddy story. I love the Gentleman Bastards, and Ririya, and of course Dante and Blays. I know some people don't like their banter, but I love it. It reminds me of some friends of mine, only more clever. And I love how it's always clear that they love each other, especially when Dante tempers his amoral tendencies because he doesn't want to lose Blays. Really, I want this series to go on and on, and am glad that there will be at least two more.

Aside from Dante and Blays, I liked two things in particular about The Spear of Stars. The first is Gladdic. I found myself liking him, and was dreading his inevitable demise, but then I'd think back to the things he did earlier in the series, and get conflicted. I like being conflicted. The second thing I liked was the concept that the beings in one world could be the gods in another. I'm really looking forward to seeing that play out in the next volume. I hope we get to meet more than one of the gods.

Hate the end

There is the promise of more books, and I will look forward to them. But I wasn't ready for the last page, I wanted to read more without waiting, because the wait will be terrible. Every page was enjoyable until there were no more. I hate the blank page at the end.
