Solving Damian Dermite Christopher Francis

How would you stop the most feared bully in school from humiliating your new best friend?

An impulsive 11-year-old boy named Alex Thomas has a simple solution: you hurl your left over pizza at him. Although it does mean he will have to spend the sixth grade finding clever ways to escape a vengeful bully. Alex soon discovers that hiding in the boy's bathroom, stinking up the cafeteria, pulling the fire alarm ,and running away are not the answers. When he finds himself standing with no clothes on in front of the entire school, Alex quickly realizes things have gotten way out of hand. With help from his brother, and a calculated plan in place, Alex faces his greatest fear...and finally solves Damian Dermite.

I won this book through a Goodreads giveaway.

I really don't feel like the characters were developed enough for me to really care about them but besides that, is a great easy-to-read book that many kids can relate to in their life.

If you are an adult then "Solving Damian Dermite" will bring you all the way back to middle school, with all the bullies, the struggle to make a new friends, the first crush and all the special people that will reserve a place in your heart for a long time.
