Title: The Genus Files: You Only Die Twice
Author: Dan Gutman Read by: Michael Goldstrom
Publisher: Blackstone Audio
Length: Approximately 6 hours
Source: Kewaunee Public Library. Thank-you!

It wouldn't be a summer family vacation if we didn't have The Genus Files to listen to on our road trip. On a recent trip to visit my family in Michigan, we listened to this third book in The Genus Files series and it kept my entire family interested with its great mix of adventure and humor.

Coke and Pepsi McDonald have traveled in an RV with their parents across the country to attend their Aunt's wedding only to find out she is marrying their arch nemesis. As they start their journey back home, they find themselves almost dying more than once at the hands of a mysterious Elvis impersonator. Who is this impersonator, and why do they want the McDonald twins dead?

Author Dan Gutman writes with a winning formula that keeps our entire family entertained from 12-year son Kile, to 10-year old son Daniel, and our 7-year old daughter Penelope. My husband and I enjoy the adventures as well. It's a nice blend of adventure and family humor. That is exactly the kind of book that Daniel enjoys. The book also explores all sorts of out of the way unique places in America. Daniel was really inspired by the first book and really wants to visit the House on the Rock. Luckily, we live in Wisconsin so it's not too far away. We just moved this summer and currently own two homes, so it's on our list to finally visit the House on the Rock after we sell one of the homes.

Michael Goldstrom is a great narrator and does great voices and sound effects. The only negative to this audiobook is that my family does not like when Goldstrom read the entire web addresses for google maps or each individual letter for the cipher. It's okay to summarize on an audiobook!

Overall, if you are looking for a fun family audiobook for your family road trip, I highly recommend The Genus Files series by Dan Gutman.

I thought it was good, but a little easy. It was a nice read over winter break. But overall it was good.

These are getting a bit dark. I feel like they are kind of casually killing people and not telling anyone.

It was a great book but it was to repetitive. This is basically what happens is every book. Author tells you that Coke does something life threatening. He tells you to read the previous book then explains it to you. Then they receive ciphers while trying to get killed. They always save themselves by using items Bones and Mya give them or souvenirs or Cokes shirt. Then they meat the big baddie and kill or almost kill him.

Great audiobook, although annoying to hear web addresses recited. Like the books before it, this was funny, action-packed, and even educational.

I really liked this book and I can't wait to read the next one, the author is so funny and interesting when comes to writing, when I read this book I like to change the characters a bit to make them more familiar to me, I also like to change the location and their personalities, when I read books that are easy, I feel like I don't need to think so much about the writing but as harder book I need to think more of what will happen next, also the theme is easy books are very easy to spot and are not that deep, but for harder books they are harder to find and understand and the theme is usually more deep and meaningful

Jonathan says

Continues to be awesome and educational!

Stormi (BMReviewsohmy) says

This was as much fun as the others though it can feel a bit repetitive as it's about traveling the country and looking at some weird and strange things, then eventually the two kids almost get killed and get out of it but it's been a fun road trip. I have enjoyed learning about all the strange museums and place there are in the US. I didn't know they had some of the museums they have out there...lol. The ending totally surprised me and I couldn't believe who Evil Elvis was and can't wait to check out the next one.

Both boys and girls will enjoy this fun road trip series.

If you read Genius Files #2, then started this book strait after, it is so good and has so many cliff-hangers. So I recommend this book to everyone!

David Phillippe says

This is a great book. It is full of mystery, and ciphers and action. There's lots of fun and hilarious twists. Not giving any spoilers here. If you want to know what happens, you **MUST READ**. It will have you running to the bookstore to pick up the next book in the series!

You'll want to read it twice!

You Only Die Twice is the third book in The Genius Files series. I loved this book so much that The Genius Files series has now become one of my most favorite book series ever! I especially enjoyed how the author uses his imagination to keep surprising the reader throughout the book. The main characters are thirteen-year-old twins, Coke and Pepsi McDonald.

Coke and Pepsi are brother and sister geniuses. Because of their genius minds, they belong to a secret program, and many crazy people are trying to kill them. Each book introduces a new villain for Coke and Pepsi to outsmart. The Genius Files stories always end up being a perfect combination of fantasy and non-fiction. The strange, but true places they visit on their cross-country family vacation are the reality part of the story. There were real photographs of the places, so I could see what they looked like and imagine what it would be like to go there someday.

Many adventures take place, as Coke and Pepsi travel with their parents and bad things start to happen. Coke and Pepsi use their genius minds to solve puzzles and ciphers, and to outwit all of the crazy bad guys they encounter. I couldn't stop reading this book, because I always wanted to see what would happen to Coke and Pepsi next. Every chapter ends at a suspenseful place. Little boxes on the side of the pages gave directions, so I could follow along to real places in each state on Google maps.

The McDonald family stopped at the National Jousting Museum and even the site of the World's Largest Frying Pan! I could hardly believe that there were such places! My favorite stops were the Birthplace of Pepsi (the soft drink) and The World of Coke (the soft drink). Lots of exciting things happen at those two stops. The final plot twist is the best ever! I never could have imagined how twisted things actually get. I give this book a 5 star rating. You definitely won't want to miss it! You'll even want to read it twice! I highly recommend this book for children ages 7-12. Parents will enjoy it, too!
