Football players s*ck.

A bunch of cocky, lying cheaters who think they're god's gift to women, just like my dear old dad. I've managed to avoid them my whole college career until now >.< I just got assigned to be wide receiver Callum Samskevitch's physical therapist.

Pro: It will be great to add to my resume.

Con: I have to see him. Every. Single. Day.

Which would be fine...if he wasn't so dang sexy...

Cal

Football is all I've got, so when Coach saddles me with some frumpy PT student with a chip on her shoulder, all I can think is *doom*. I don't have time for this. Not now. Not when my dreams are on the verge of being crushed. All that should matter right now is ball. So why can't I stop imagining what Bee Mitchell is hiding beneath those baggy sweatshirts?

Overall Opinion: This was actually better than I thought it'd be. Will it go down as one of my favorites or be one that will stick with me forever? No. But it served its purpose for me in being a light, sexy, college athlete romance. It doesn't get deep into the characters or the storyline, but it was enjoyable. I really think it would've greatly benefited from a jump ahead epilogue into their future when they were older and deeply into their relationship and grown-up lives, but that's just me ;)

Brief Summary of the Storyline: This is Bee and Cal's story. They literally bump into each other one morning, and are surprised to find out that Bee has been assigned to work on Cal's case because she is a PT student. Cal is the star football player that has injured his knee and is having a hard time adjusting to not playing. Bee has a father that played in the NFL, and has sworn herself off of football players. They dance around each other some, have some sexy times, deal with family and ex drama...but they get a HFN ending.

POV: This alternated between Bee and Cal's POV.

Overall Pace of Story: Good. I wanted more in the end (when do I not?!? ;D), but otherwise it flowed well and I never skimmed.

Instalove: No. I felt like hey had sufficient time to develop feelings.

H rating: 4 stars. Cal. I liked him. I felt like he really cared for the h, and he was sweetly protective too.

h rating: 3 stars. Bee. I felt really bad for her circumstances with her parents, but I also had some frustration with her pushing the H away at times.

Sadness level: Low. No tissues required.

Push/Pull: Yes (view spoiler)

Heat level: Moderate. They have good chemistry and scenes.

Descriptive sex: Yes.

Safe sex: Yes. Mentions of std status and birth control. No mention of previous practices that I remember.

OW/OM drama: Yes (view spoiler)

Sex scene with OW or OM: No

Cheating: No

Separation: No

Possible Triggers: Mild (view spoiler)

Closure: This had ok closure, but I really wanted a farther jump into their future and see them as a secure couple. I'd call this a HFN ending.

How I got it: I got it on loan through booklending.com

Safety: I'd say this is probably Safe for most readers.

Ok so this book was a big miss for me. Main issue was everything was BEYOND rushed, I mean I've read books with insta-love that went at a better pace. There was no development of the characters and the "problematic" plot twists just came off as highly unrealistic or even slightly believable. Bottom line is, for me this was a big fat no, sorry... But not really

This book had a lot of potential but the h ruined it for me. I got tired of Bee being so spineless when it came to her father. I also got tired of her constantly assuming all football players were not worth her time because of her past experiences. She came across as pathetic to me and it got old quickly.

It took me a while to finish this book, which is not a sign of a really great read. It was kind of boring for the first 60% and then suddenly there's an asshole father (is that a prerequisite in NA to have an asshole dad?) and a totally psycho ex-gf and the story veered off in a completely unexpected but not entirely welcome direction. I really liked the heroine but I wish the story had been better for her. She deserved better.

What a fun read.

Here we have Bee and Cal. Bee is a PT student who gets Cal assigned as a case for one of her classes; and Cal, a cocky football player, struggling with an injured leg that could potentially end his football career before it even starts. On top of that, Bee has a big distaste of football players, after watching her dad treat her mother and her pretty crappy. So, to say that these guys had hard start would be an understatement, lol.

As the story advances, we not only get to know these characters more in depth, but also understand more where they came from, particularly with Bee. Man, her family was a piece of work: a Dad so narcissistic, it's a wonder he didn't marry himself; and a mother so hard not to judge tbh, but even though I understood her reasons for staying with that ass, it's no reason enough to treat her daughter like she was less-than in her (not so) perfect life.

Loved their time together, it was fun and just what they needed, helping each other bring the best in the other. I also loved that they didn't let the drama keep them apart. They both had insecurities that sometimes they let come to the surface, but not enough to end their relationship.

There was also a bit of a drama, and oh what drama. Jeez, this guy needs to seriously start screening the people he hangs out with, 'cause talk about a wack job.

The ending was perfect, 'cause not only it's HEA, but also leaves the door open to more, I can't wait for these guys to do awesome in the future. I'm also looking forward to reading the next book in this series and what new characters we can meet.

All in all, a great start of a new series.

Thank you to the author and Frog Prints Publishing for providing an ARC in exchange of my honest opinion

Didn't like Bee.

Unnecessary drama.

No time to get into a relationship with them. Everything was just too quick.

I have always been a huge fan of Christine Bell since I read her first book - Hell, I am an actual character in on her books! LOL But Christine just has a way with her writing that makes me feel all mushy and gooey when I read her books and I love it!

Score is the first book in her newest series, Skin in the Game. It's a NA sports romance and Christine definitely starts this series off well.

Bee is a PT student who's in her final year of college and has to do some "hands-on" if she wants to continue on to medical school. Cal is the star wide receiver who injured his knee and who is also assigned to Bee.

Bee and Cal are two different people when it comes to college life. She sticks to her books and getting good grades, where Cal barely passes and is there on a football scholarship. These two couldn't be more different if they tried. Their chemistry isn't instant but it's the way they interact together that keeps them coming back. It's like the itch can never be satisfied enough.

I loved the way this played out and how it wasn't instant. Cal proved he was nothing like she expected. And Bee showed him that good girls know how to have fun too. I really enjoyed the way Christine had this all fall into place and even added the bump near the end - I was expecting something to happen, but not that. Very nice addition. And the humor in this was the perfect added touch - it made everything feel more natural.

I am looking forward to see what Christine brings us in the next installment.

I liked this. It was a quick fun read. I really liked Bee. And I liked Cal a lot too. The storyline wasn't original but I still really enjoyed it so that's a win in my book.

Kate says

I started this book just because i wanted to check safety and make it to-read, but ended really enjoying it and after awhile i was grinnig like shit.

This is your typical college book where the hot guy meet the plain-jane girl.

Bee is PT student who is assigned to Cal, the hunky football player who cant be more different than her, and even that i dont like these wallflower heroines i dont mind Bee, yes, she had some self-conscious problems but hell, with parents like hers, who wouldnt? Her father is cheating bastard who treats her mother like crap and of course he was football player so she doesnt think of them much.

And Cal... he is definitely on my book-boyfriends shelv, he was just sweet and amazing (and hot, lol).

The plot is what you are expecting, you know whats gonna happen next but i wasnt disappointed at all. It was just another resting college book you will enjoy and i love Cal and Bee together, they were perfect, it wasnt insta-love and you have there some development first. The end is more open so i guess there may be another book about them in future and if so i will gladly read it.
