Danny and Liv are back...

Danny loves Liv. He knows he loves her more than she loves him because she ran without a word when she saw their future mapped out before her. He knows he will never love anyone like he loved her and this time he doesn't think he can move on.

Liv loves Danny. She knows she loves him more than he loves her because he broke her heart in the worst possible way, right when things were falling into place. She knows she will never love anyone like she loves him and this time she doesn't think she can move on.

They needed a second chance because they just weren't ready for their first, but when events changed everything between them, they discovered they were just human after all. Now Liv and Danny have to find a way to survive being hurt by each other.

They doubted, they underestimated and they did believe the worst, but only because they were too young the first time and too vulnerable the second time. But now they have changed and if they are not the same, surely things can only turn out differently?

Ok. Here we go. This story didn't start till half way through the book. Then it was just rushed. Everything happened so fast. Liv got more likable but Danny seemed to turn into a big mushy woman. I love nice guys and he really was. It just wasn't believable. He was a bit over the top. The first book was way better. I had a hard time finishing this one. Liv and Danny were so overly sweet it was making my teeth hurt. I love books about second chance loves. This one just fell short for me.

This was a sweet little series.
I really enjoyed it.

SPOILERS Look, I would have given this book 4 stars at the least had the author not created such a twisted situation. I was never really comfortable with Jen and Danny's relationship. She wrote them to be too intimate as friends in my opinion with all the alone time together, all the hugs and snuggling, the kissing on the lips, the fact that Danny admits that had Jen asked him to stay in the US then he would have because he didn't want to leave her, and the it's topped off with Danny helping Jen conceive a baby!! WTF!!!! I swear this was the most twisted story ever. I can totally see Jen being preggo and rubbing her belly and thinking of Danny, not Scott! It's sick and I would have been so much happier had Kerry Heavens made Jen go through an anonymous donor or had there been some kind of tit for tat arrangement with Max & Charlie. This book was good except this whole Jen situation just pissed me off and made me angry for having wasted my time reading a book that had me screaming "What the hell is wrong with these people!? Jen and Danny are weirdly obsessed with each other." I felt horrible for Scott, esp during their breakfasts because once again Danny and Jen worked the kitchen together making breakfast with a perfect rhythm and flow; like they were a couple. Freaking bollocks I tell you. BOLLOCKS!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

3.5 stars

Ok well, Liv worked my nerves for much of the book and then Danny turned into a sniveling little bitch. No, seriously he started sounding like a total chick. I had to go back a few times to make sure I was really reading his POV.

And then he did the sweetest thing for Liv's birthday (I think this was around 75%) that I started to melt which was frustrating because I was all prepared at that point to hate them. So Danny goes back to be swoon worthy and I end up being a pathetic girl and falling for all the sweetness. I feel like I just lost all my dark & twisted street cred!!

So 3.5 stars just because I loved the last 25% of the book. DAMN YOU DANNY!!!

Without spoiling anything—of course—I'll just say that Danny has made a place for himself deep in my heart. Being Human and Still Human are highly recommended, must-read books.

Derna says

Wow!!! I don't know what to say, but Kerry Heavens has done it again, I loved Just Human, but I have to say Still Human just blew me away Kerry has knocked it out the park with this one, and as I write this review nearly 24 hours later I'm still smiling, still thinking about this book, and The Drifters song's 'Some kind of wonderful' is still stuck in my head much to the annoyance of my work colleague this morning who at one point shouted **'enough already stop singing that bloody song'**.

I don't want to give away any spoilers so seriously all I'm going to say is you must 1 click this book, and read the continuation of Danny and Liv's story after Just Human it doesn't disappoint. I read most of it with the biggest smile on my face and even did I happy dance at one point.

"We should be together, we should have always been together. I never should have left you twelve years ago" ~ Danny

I was such a fan of Liv and Danny in the last book, and Liv is just amazing in this one. I didn't think it was possible, but Kerry has made me I love Danny even more. The things this man does to win Liv back, to prove she can trust him, and his love for her are just swoon worthy. Danny Morgan will always have a special place in my heart.

"Why do you think I've never settled down? Losing you before was the worst experience of my life, and now I'm living it all over again. Except this time I'm not quitting. I love you too much" ~ Danny

Still Human had everything that I love in a book and more, second chance love (or possibly third in this case), true love, epic love, romance, passion, super hot steamy sexy moments, happy tear jerking moments, swoon worthy moments, laugh out loud moments, and oh yes! Let's not forget the dirty dancing references you know I loved them Kerry.

I have to say I was slightly jealous, okay I perhaps more than slightly jealous of the adoration between Danny and Liv. I loved how Danny and Liv grow as a couple but also as individuals in this book. How they work to try and overcome, their fears, their insecurities, their stubbornness and focus on new beginnings, always being honest and open with each other.

"I thought I would show you that we are just the same. All our crazy insecurities are bullshit, you know? We are supposed to be together and the only thing that has kept us from doing that is fear" ~ Danny

I don't want to forget the supporting characters that like before I just loved them all they really added to the

story, and showed how important friends and family are in Liv and Danny's journey.

“Now I’ve let you do this your way for a week, but if neither one of you is going to give in and call the other, then I’m afraid I’ll have to get dirty” ~ Jen

Overall I loved this book it was a brilliant conclusion to Liv and Danny story, I have truly enjoyed their journey, and I’m going to miss them, however at the same time I’m so glad that they get the happy ever after that they so rightly deserves. I couldn’t have been happier with the ending it has a wonderful epilogue that just left me grinning from ear to ear. These two are just perfect together, soul mates.

“Circumstances pull us apart before we found our voices and although we both tried to make life apart, something was always missing. We needed a second chance because we just weren’t ready for the first one” ~ Liv

As you can probably guess, I'm going to recommend you read this book, and you will understand why I'm going to have the biggest book hangover for the next few days. It's a must read, but only after you have read Just Human, so don't wait off you go, and 1- click now. I can say without a doubt you will not be disappointed.

“You told me once that you were afraid I would turn out to be just human and that I would hurt you. I told you then that I am just human and that I could be hurt just as easily. Well I’m still human... I’m still me and I know we could destroy each other. But I don’t care, because life without you isn’t worth living, ...I dare youLet me back in and you won’t regret it. ~ Danny

I’m so looking forward to reading your next book Kerry; I loved your writing style, your characters, you know how to write a great love story, and can’t wait to see what you have next in store for us.

Gwen ~the Book Diva says

3.5 " Just not my style" stars. This was a really great story just not suspenseful enough for me. A little too sweet and just plain ordinary at times. I can see how many would love it but it's just not for me. The hottness between Danny and Liv was the only thing that kept me reading. I absolutely love passionate sex scenes when love and emotions are involved and there was plenty of that! Nice story but not my style.

Still Human is the follow up book to Just Human by Kerry Heavens. In Just Human, we meet Liv & Danny, childhood sweethearts who have not seen each other in 12 years and reunite years later never falling out of love with one another. Their main problem was not distance, it was communication! Danny agreed to give up his life in California to move back to the U.K. and start a life with Liv. The book ended with Liv thinking something happened between Danny and his ex “hook-up” and returning to the U.K. Leaving both Danny and Liv heartbroken.

Still Human picks up right there. Liv has been back in the U.K. after visiting Danny and thinking she saw him cheat on her. Danny is still at home in California thinking Liv only left because she was scared to be in a committed relationship.... Again communication is still their biggest problem! I swear if there was ever two characters who needed to talk, it would be these two!

Danny refuses to go to Liv because he is hurt; Liv thinks Danny gave up on her by not trying to win her back... it's a constant back and forth between these two. Danny does what Danny always does and is amazingly sweet and romantic. I was starting to think Liv does not deserve him; he seemed to always be making the effort when she wouldn't even talk to him.

I will be honest; I did not really connect with the book until midway through the book. The book felt repetitive at times with Liv & Danny going from being in love and happy to a simple misunderstanding and they are breaking up again. I just wanted them to get their act together and TALK! Just like book one I did not feel like these two were communicating at all and it was driving me crazy. About 50% in the book changed and I fell in love with the story again. Danny and Liv's journey seemed like it was finally starting and I couldn't put the book down!

I loved the dual point-of-views again in both books. Danny is such a sweet guy, I want one! Where can I order a Danny? It was a cute book about first loves having second chances and never falling out of love. I loved all the characters, especially the minor ones who brought a little something extra to the book. it was a very enjoyable weekend read.

I give Still Human (Just Human #2) 3.5 Stars

After the major cliffy in Just Human, I couldn't wait to devour the continuation of Danny and Liv's story in Still Human! And what a gorgeously written sequel it is. I absolutely love Liv and Danny. And they have the best friends ever. They are so insecure and there are so many misunderstandings between them, that I was a wreck hoping they would both find a way to be together. Soul mates, right? Without any spoilers, I want to say that Danny is my next husband (LOVE him!) and Liv could be a great best friend. Still Human is loving and hot and sexy and romantic and has plenty of drama, too. And the covers of Being Human and Still Human are among my favorite book covers, ever. Kerry Heavens has a gift for storytelling and effortlessly switches between Danny and Liv's POV. I highly recommend getting to know Danny and Liv! You will totally fall in love with both of them.

Natasha is a Book Junkie says

"...we stumbled and fell, but something so strong cannot be wiped out in one moment."

After finishing Just Human, I literally only gave myself the time to take a deep breath and wipe away a few tears before I dove right into this very emotional but deeply satisfying sequel. It is the perfect conclusion to one of the most beautiful modern fairy-tales I have ever read and I am struggling to let go of it.

In the aftermath of the incredibly heartbreaking ending of its prequel, we find Liv and Danny desperately trying to make sense of what happened to their relationship, attempting to move on with life, their pain and anger feeding their inner demons as they both navigate through intense heartache and self-doubt for the second time in their lives.

“She doesn’t love me. She found out I was going to propose and she ran. Again.”

On opposite sides of the world, they lick their wounds with the relentless support and love of their best friends, but they are lost without one another. Both convinced of the other’s fault in their relationship’s demise, Liv and Danny throw themselves into their old lives, believing that ignoring the gaping hole in their hearts would somehow make it hurt less. But no matter how hard they try to forget one another, nothing makes their pain go away and as time goes by, it even finds ways of following them into their dreams.

Luckily, when two people are meant to be together, they eventually find a way back to each other and once Danny finds out the real reason why Liv left so suddenly, he becomes determined to win her back and never let go of her again. What follows is romance in its purest and most gratifying form – touching acts of love by a man who is willing to do anything for the woman he loves, hoping his actions would show her what she won’t allow him to say.

“Please let me back in. We have wasted too much of our lives apart.”

As much as I felt Danny’s desperation and unyielding hope in their future together, I lived Liv’s pain and I wholeheartedly understood her doubts and her misguided need for some fantasy grand gesture. There is no instant forgiveness scenario to appease us, no quick fix for a decade-long history of self-doubt and believing in one’s worse fears. Their biggest obstacle has always been their willingness to believe themselves unworthy of the other’s unrelenting love, to trust their insecurities rather than their own hearts, and that is something that time exacerbated, and only time can truly take away. Their personal journey is just as important as their shared one, the recognition of their deep seeded fears being essential to their future as a couple.

“It wasn’t our fault that we found each other so young...”

In both books, Liv and Danny are finding their way to one another, but in this book they are finally setting firm roots that no storm could shake in the future. And my heart sang page after page. This story touched every corner of my heart, made me live every scene, feel every emotion, because there was something truly real about it. The characters made sense, they were real people, with real hang-ups and real feelings. Nothing was romanticised, made pretty or forced – I got the characters, I got what drove them, what stalled them, what pushed their buttons, and what made them deliriously happy. They were real to me, and their story fed not only the romance glutton in me, but also that little girl who used to daydream in her bed at night that one day her Prince Charming would come looking for her.

Everything about this story was executed to perfection. The relationship between Liv and Danny might have been the focal point of the storyline, but their friendship bonds with their respective best friends were given equal importance, making this not only a timeless romance, but also a heart-warming tale of friendship and unconditional love. My heart is still trying to absorb the overwhelming happiness that I felt while reading this splendid book. In my mind, I am twirling on the hilltops Sound-of-Music-style, singing from the top of my lungs about this story being one of my favourite things. This is an absolute must-read.

“I tried being without you, life is nothing without you.”

I love it! I love it! I love it!

This book was soo good!! It was soo beautiful how the characters grew and how the plot became full circle.

With the aftermath of the book 1 ending, this book started with their coping mechanisms. Because of their insecurities and their past they couldn't simply deal with their circumstance. Thanks to their friends who never gave up on them and gave them the strength to never lose hope.

How Liv overcame her trust issues and how she relinquished her control freak nature to just be with Danny. And how Danny proved how serious and steadfast his love is. That he will never give up on Liv was just amazing. How they grew up. How they realized why the first two of their lives didn't work. How their friends played an important role in their strength and trust in each other.

This was a great and wonderful read. You'll laugh and cry. And just be in love. The plot was well written and everything had a reason. It all came full circle.

Alexis says

This book is like a very expensive, fine bottle of wine. It is something you don't want to gulp, guzzle and finish in one sitting. No, it's something you want to savor and completely take in and that is exactly what I did. I read the first 40% within one sitting but once it reached a certain point I knew immediately that this couple would hands-down become one of my favorite love stories ever and didn't want it to end. I loved the first book, but in no way did it prepare me for the breath-taking conclusion.

"I tried being without you, life is nothing without you."

If you have not read the first book, stop reading this review and go one-click Being Human stat! Ok, where were we? Oh yeah, this book literally picks up where the first one left off, Liv and Danny separated after what has become the BIGGEST misconception. Liv is back in the UK and Danny is in California both wallowing. She left him for what she thinks she saw, and he thinks she left him because she didn't want to be with him. Their whole relationship was built on second guessing, over-analyzing, and last but certainly not least, insecurity. It isn't until Max, Jen, and Connie kick them both into high gear do they realize that they can't live without each other. But, can they both let go of the past and finally be able to move into the future?

"We needed a second chance because we just weren't ready for the first one."

Like I said earlier, Liv and Danny have officially become one of my favorite couples of all time. I think a large reason for this has to do with Danny. Liv is so independent and when she literally needs his help after she is injured he is there to help and nurse her back to good health. He makes it impossible for her and me not to finally realize that this is a once in a lifetime kind of love. Then when he finally has her back...oh my goodness, I don't even want to spoil the good stuff and hear me when I say there is some serious GOOD

stuff! Ms. Heavens did a phenomenal job with giving the reader a front row seat to their relationship. The small details (trees, tattoos, shoes, to Dirty Dancing) from their budding relationship back when they were kids up until the very end was fantastic. It is 100% evident from this book that soul mates exist and that Danny and Liv are the epitome of that word.

5 smashing stars!

Amanda Nemec says

I had a few issues with this book. The first of which is there are a lot of errors in it that could have used a good editor. I think my biggest issue with this book is that I really disliked Liv for the first half of the book. She was selfish, ridiculous and hurtful to someone who was the love of her life, even after she found out that the whole thing was a huge misunderstanding. Instead of torturing the poor guy for half a book, she should have been apologizing profusely to him for being so rotten. I really do think that while this book was written to make women swoon over Danny, it was a lot of beautiful fluff that could have been condensed into the first book and made that one a really good standalone.

Fien says

2,5 Stars

Even though I wanted to love this book I couldn't embrace it entirely. For the first half of the book I was really annoyed with Liv. But I love the way Danny handles everything and how he keeps fighting for her. I also love the strong friendships in this book. But in the second half of the book I lost some interest. I love happy endings and all of that, but this was too much of it for my liking. I don't need a long description, just a brief epilogue would have been enough.

Oh my. This one is just perfect!!!

About the book:

Danny and Liv are back...

Danny loves Liv. He knows he loves her more than she loves him because she ran without a word when she saw their future mapped out before her. He knows he will never love anyone like he loved her and this time he doesn't think he can move on.

Liv loves Danny. She knows she loves him more than he loves her because he broke her heart in the worst possible way, right when things were falling into place. She knows she will never love anyone like she loves him and this time she doesn't think she can move on.

They needed a second chance because they just weren't ready for their first, but when events changed everything between them, they discovered they were just human after all. Now Liv and Danny have to find a way to survive being hurt by each other.

They doubted, they underestimated and they did believe the worst, but only because they were too young the first time and too vulnerable the second time. But now they have changed and if they are not the same, surely things can only turn out differently?

“You told me once that you were afraid I would turn out to be just human and that I would hurt you. I told you then that I am just human and that I could be hurt just as easily. Well I'm still human... I'm still me and I know we could destroy each other. But I don't care, because life without you isn't worth living...”

This is the most beautiful quote in the book (for me). I just can't explain why, but it is.

Rating 5/5

First of all, you can't read this one if you didn't read the first book, Just Human (of which you can read review [here](#)).

While I was reading this book, in my mind I kept seeing rails which I cross every day on my way to work. And then I figured why. Their life is one big journey.

Just Human ended in mess. Liv run away from Danny back to UK (if you want to know why - READ THE BOOK, I'm not telling :P).

Liv is in fear. She can't be broken again, but she loves him.

Danny is in fear. He thinks she run away because she found out about his plans for their future.

This book is about forgiveness and trust and friendship.

Can Liv trust him again? Can she trust herself and her feelings?

Again I can only quote myself: “I like every second of Liv thoughts and fears and how she reacts on everything.” I don't know why... but I'm like her, full of fears and doubts and not always optimistic (if ever?). And Danny is so great that I'm in love with him. He's my new book boyfriend so back off ladies he's mine! :D

I can't explain why I fell in love with this book. It's just great. It's full of love, lust, forgiveness, great friendship and overcoming every obstacle in life. I hope that one day this book will be on my bookshelf with Just human as well.
