Veronica's Dragon Ruby Dixon

Resonance.

It's a given on the ice planet, forced upon you by the parasitic symbiont called the 'khui'. With resonance, a guy and a girl are paired up because they'll make great babies. It's a survival mechanism necessary for this sparsely-populated world we're stranded on... and romantic, in a weird, alien way.

Everyone expects resonance to happen when twenty newcomers are dropped onto the frosty world. I doubt anyone expects the gorgeous, golden god named Ashtar to resonate to someone like me, though. He's fierce. Flirty. Powerful. Disgustingly handsome.

I'm... not any of those things. I'm bland. Boring. Clumsy.

But resonance seems to think we'd be great together. And Ashtar does, too...

The *Icehome* series features all of the adventure, humor and community you've come to expect in the *Ice Planet Barbarians* series, but it stands on its own. You do not need to read the other series (or be caught up) in order to read VERONICA'S DRAGON. I do recommend reading LAUREN'S BARBARIAN to get the full experience. Enjoy!

Cute as always!

We have a golden dragon here instead of a big blue barbarian! Yeah!

He's a little different than our usual hero in these stories. He's still all mate, but he's also very alpha and he has difficulties understanding why he need the tribe when he's big, strong and has his mate with him!??

He's a little confused, but Veronica, very patiently, explain the why to him!

As I said, very cute!

I am in love with Ashtar. He is so adorable. Got to see some more familiar characters from Ice Planet Barbarians. Going to move into Willa and Gren's story. I'm curious about those two.

What an amazing story. I loved how Ruby Dixon took a Drakoni and placed him in the Ice Planet timeline...talk about getting your cake and eating it too :D

Veronica was always looked over and never stood out. Now she's the mate of a sexy dragon-man and she's got a pretty awesome "gift" as well.

It was certainly a joy ride.

I enjoyed it very much. Their first meeting and Ashtar's arrogance & swag made me aww! They main characters balanced each other perfectly. They were very likable too. I also enjoyed the progress of New arrivals. What I didn't like was the way author introduced secondary characters Willa and Gren. (i think it's their book next).

They stood out like thorn. I have also noticed that I almost never likes they way author portrays next book characters as result I have skipped some books in series. They come out as ungrateful,selfish and totally not likable. Like in previous book Marisol slapped the heroine Lauren when she tried to help, like clair snapped at keira in other series for showing concern and again when Asha tried to seduce Keira's hero etc.. etc!

Still epilogue was a gem and I will definitely recommend this to everyone.

I now understood Ruby's trick...Even though she writes about a couple at a time, she provides little bit about

another couple...so you'd finish this and then start waiting for the next one, almost immediately...such a tease!

I loved this. I mean think about it, if you are struck on Ice Planet, what would you need? A dragon! of course.

This was fun and new! Because you have Cootie, resonance with Dragon mate stuff, fire, psychic mental link and healer thrown into mix. bit overwhelming but easy to follow through since I read IPB exclusively. I am not big a fan of her Dragon series but it wasn't a problem here since Ashtar was stolen from his planet when he was barely 8 or 9 and don't remember much of his home planet, just as well....

Veronica was likable character. She was nothing special, as per her, and I am sure we ladies can relate to that. It is just as well that she turned out to be Healer since our new tribe needs a Healer - all too convenient but I am not complaining. I really liked Veronica and Ashtar separately and together...waiting for the next one...

I've only read two books by Ruby Dixon and unfortunately neither worked for me. I think in these types of books you have to love equally or just as much the females. I never seem to have a problem with the males but the females in the two stories I read were very annoying so I had no interest to read anything else from this author until Veronica's Dragon. After seeing so many awesome reviews I had to read it and Ashtar didn't disappoint, he was awesome. He was a wonderful mixture of sweet, innocent, possessive and very sexy. Veronica was just as awesome, I loved how patient and understanding she was with him. I definitely want to read more in this series and I'm looking forward to Willa's book.

This book was so good. Whenever I read this series or the original I get swept right back into the world. I love how this author always finds ways to make these two series new and interesting and never old or tired. The hero was just what I was hoping for and more. It was so interesting to see how the healers work and think, I had never thought too much about it but in this book we really get to see how it all works and I thought it was really fascinating. I can't wait for the next book in this series and the twins books. Honestly every time I read these books I am excited and anxious for the next books to come.

Ruby never disappoints. Ever.

Taking place in line with Lauren's Barbarian, not necessarily having to be read in adjacent to it, this story started off with a total hoot. Because... Ashtar.

Immediately upon waking from his stasis, he smells humans. Not just any ol' humans. But unmated females. And I bet you can imagine what ensues from there.

More like Ashtar trying to flirt.

Yes, his attempt at seducing our dear Veronica is outstandingly hilarious and all so perfect. Totally in line with any other possessive male aliens we've come across. And it never gets old.

Ashtar knows what he wants and how he wants it and when he wants it to happen.

And the reactions from both Veronica and the other blue aliens had me on the floor. I just loved everything about him. How blunt he could be. How oblivious he clearly was to anything in respect to human "mating rituals." It was all just perfectly perfect.

Not going to say a whole lot but, **DRAGONS, ALIENS, HOT STEAMY RUBY SMUT SCENCES.** Not even remotely sorry for having enjoyed the awkwardness that was Gren and Willa.

No matter what the primitive mesakkah say about 'resonance' Ashtar knows that Veronica is his mate. He has been a slave all his life and has never been allowed a female, but now he has Veronica in his sights, he plans

on making her his. He does not need any help especially from interfering blue aliens, he is a champion of the arena and a mighty golden dragon, he can survive and protect his mate all by himself. Veronica can feel the beautiful golden man's gaze on her...she doesn't quite understand why. Not only is she plain, she has a well earned reputation for being dangerously clumsy as well. However, he insists she's his and resonance seems to agree.

I have been so excited for this book! Not only are we back to the ice planet, we also have a little bit of a cross over with the Fireblood Dragons series as well. You don't need to read the Fireblood Dragons series to understand the book though. Ashtar just happens to be the same species as the heroes in that series, only his life has taken a vastly different path. Instead he was captured by slavers as a child and has been fighting for his life in the arena ever since and when he reaches the ice planet and told he is free, he doesn't quite believe it.

I loved Ashtar, although he has been raised in a fairly technological advanced society, years of fighting has given him a primitive edge. He's also stubborn and suspicious, testing the boundaries with the sa'khui to see if they aren't lying about his freedom. It's cute but also a little heart rending to read. He instantly hones in on Veronica and much like the heroes in Dixon's Ice Planet Barbarian books, he makes his interest adorably and at times hilariously obvious.

Veronica was a 'plain jane' type heroine, something that I like. She isn't as pretty as some of the other girls and she is definitely the least graceful so Ashtar's interest baffles her. However, Ashtar is hard to resist. So although she does have her insecure moments, she, like any sensible girl with a sexy golden god who's as adorable as he is hot, gets down to it. They made a great couple and I loved seeing them come together. It was also interesting to see them both find their place on their new home with both the original characters from IPB and the newbies.

A great book in the series, as I now come to expect from Dixon, it was super hot and super sweet with a few laughs chucked in. Now gimme the next book!

Ruby Dixon is a wonderful storyteller!

I know that this series, Icehome, connects with the Ice Barbarian series along with the Corsair series, but now I am excited to find out that it is also within the world as her Fireblood Dragon series! I also curious as to the puzzle that the girls remember different years when they've been taken. But I'm sure Ms. Dixon already had it planned out how to explain this mystery. I can't wait to read more of her books to find out if there is an overall arc to all of her series!
