## **Claiming His Alpha** Stormy Glenn

Reece Marshall isn't happy about being pulled away from his undercover assignment for the Feline Council, but one doesn't argue with a summons from an elder. Discovering he's been brought before the elder as a potential guardian to a new alpha makes him wish he was back on his mission.

Šílené Bolond never wanted to be an alpha, but forces greater than him seem to think he should lead the Blackthorn Pride. When five enforcers are presented to him as possible guardians, one stands out. Šílené's heart breaks when his offer of submission is rejected, and he realizes his dream of having a mate will never be realized.

But the forces that turned an omega into an alpha have other plans. When Reece's undercover assignment becomes too dangerous, the only safe place to go is to the pride of the one man Reece craves, but can't have. With danger and betrayal around every corner, Reece and Šílené have to turn to each other if they want to survive, and they just might find love if they can survive that long.

This book is full of all types of editing problems from typos to grammatical errors to people being referred to by wrong names, etc. In Addition there are many disagreements in character and event descriptions, like a character being portrayed as 6.8 feet at one place and as 6.3 feet in another and so on and discontinuity of charter traits and behavior patterns.

I must admit I found the beginning interesting and although I knew I shouldn't expect much from this author I still anticipated something better than this.

Second reread: Šílené is still my favorite in the whole series, pretty much neck and neck with Jude. I just love rereading this series, and particularly, this book.

Much like when I read 'Omega Born' and was interested in discovering Sawney, jumping into 'Claiming His Alpha', book seven in the series, had me curious to find out more about Reece, another Marshall brother I was only vaguely familiar with. About all I knew about Reece was that he's one of the best trackers around.

*"Fear. Pure unadulterated fear. They were terrified of a slip of a man with platinum blond hair that was spiked and frosted at the tips, fingernails painted every color under the sun, and a pink tutu over his black skinny jeans. Hamilton doubted they had even noticed the eyebrow piercings yet. He wondered how scared they would be if they knew about the piercings under the man's clothing.*

*The young man danced up to Boston and slid a pink flower into the pocket of his black dress shirt. He skipped past Clint Harper, but placed a yellow flower in the pocket of Tre's shirt and a red flower in Boone Marshall's pocket.*

*When he stopped in front of Reece, he stared up at him for the longest time. The air itself seemed to be holding its breath as the two men stared at each other.*

*Even Hamilton's eyebrows shot up when the colorful man stuck his tongue out at Reece and then danced right out the patio doors as if he had never been there, leaving five very confused enforcers in his wake."*

I pretty much fell, head over heels, for Šílené at that exact moment. How could I not? I apologize for adding such a large quote to this review, but nothing could capture this young omega, who was miraculously turned into a very powerful alpha, better than the author's own words. Reece is not all that amused by what he considers Šílené playing games with all of them. Doesn't prevent them from succumbing to their lust which

is when they both realize they're mates. Of course, being men, miscommunication abounds, Šílené leaves taking Boston with him as his enforcer. \*rolls eyes\* Men. Sheesh.

Hands down, Jude and Šílené are my absolute favorite characters in this series so far. Reece and Šílené were wonderful and I loved this story!

Alpha Aldo, the villain of the first five books of this series, may be dead, but the consequences of what he did are turning out to last way beyond the end of his life. For one, it seems that he has pulled other alphas into his sphere of influence, and they are still very much alive. Whether it is illegal fight rings or omegas who have never been reported to the feline council, his “legacy” gives the members of the council of elders more than one headache. The many sons he left behind are mostly settled, but there are a few still unmated. They have their hands full trying to bring order to the many prides still in disarray, and I can only hope that banding together as they are, at some point they will succeed.

Reece Marshall, one of the Marshall brothers from earlier books, is on an undercover assignment for the council when he gets recalled. He has suddenly become a potential guardian for a new alpha, Šílené, who is more unusual than any alpha ever before. Reece is not amused, doesn't want to be mated, and tries to avoid Šílené as much as he can. Fate has other ideas though, but even after it becomes clear they are mated, Reece resists. Šílené misunderstands, picks another man as his guardian, and returns to the pride he has won leadership over when he defended himself against his cruel alpha and killed him in the challenge. Reece has no alternative but to return to his assignment, only to find out that the sh\*t has truly hit the fan.

Šílené was born an omega and the last thing he wants is to be an alpha. He hates confrontation, doesn't want to give orders, and hates all the fighting an alpha has to deal with. Especially one who looks slight and harmless as a human, so he gets challenged often. He is an orphan and had to learn to defend himself, so his cat is stronger than people suspect. In fact, his cat is the one who is an alpha, and he is the strongest tiger around. What Šílené sees as rejection from Reece breaks his heart, because all he ever wanted was a mate and a quiet life. But he is also not one to shirk his responsibilities, so he does what needs to be done, and tries to be an alpha against his better judgement. When he finds Reece turning up on his doorstep, so to speak, needing his help, everything changes. He has his mate – now all he has to do is survive the ever increasing attacks so he can enjoy mated life.

If you like stories about unusual alphas who are omegas at heart, if you're up for a suspenseful story full of misunderstandings and fighting, and if you're looking for an intense read that is suspenseful, hot, and touching, then you will probably like this novella.

Šílené is an omega. He reads as omega. He looks omega. But his cat is nothing but Alpha. Accepting this dichotomy is hard for Šílené the man. Then he meets his mate and things get interesting. In Claiming His Alpha, the seventh installment in Stormy Glenn's Scent of a Mate series, Reece finds the mate he wasn't looking for.

Ms. Glenn did not make Šílené and Reece's mating easy. Reece is pissed to be recalled from a job and meeting Šílené isn't in the cards. He intends to have as little contact with Šílené as possible so imagine his surprise with the unlikely alpha turns out to be his mate. But before he can do something about it a misunderstanding causes Šílené to run.

I love that Ms. Glenn didn't make it easy for Šílené and Reece. They may be fated to each other but fate is only the beginning and they must work for their reward. Reece and Šílené had to learn to trust. Both men held their emotions close but they would have to lower their shields in order to have a future together. This story was well written and the characters were believable and real. I wanted them to find a way to be together. I love Ms. Glenn's work and this was no exception. I can't wait to see where she will take us next in this series.

3.5?

This was my favorite one from the Scent of a Mate series so far ...  
and all because of a  
flower picking, pink tutu wearing Šílené  
I just ? him

I have really been invested in the running back story of this series. Alpha Aldo, dead and long buried, if not mourned, has long reaching effects to many lives. Silent and Reece are the latest to get caught in the fallout. but as is to be expected Love and good triumph in the end. just how a good book should.

## **Morgan Skye says**

Reece is an Alpha doing undercover work for the Council. He gets called from his duty to interview with a "crazy Alpha" – Silene – for a position as his guardian and possible mate. He's at first happy to think he's been rejected but when he spends some time with Silene he begins to regret that decision.

Silene is an omega human with a super Alpha tiger inside. He's been made the Alpha – unwilling though he is – because his tiger is so strong. Now everyone and their brother is challenging him based on his human appearance. He needs someone to run interference and help protect him.

When Silene meets Reece he knows they are mates because – as an omega – he can scent Reece. He knows Reece can't scent him – as an alpha – and the rejection hits hard. But when forces conspire to throw them together they manage to figure things out just fine.

I love this series! Each book is it's own story but builds on a common thread so I recommend reading them all in order. The premise is an Alpha knows his mate by the distinct lack of scent. A complication to be sure. In the first few books this is figured out by the first few couples and now – though more thoroughly understood it's still difficult to manage.

Silene is one of the many sons the last crazy Alpha made and he is a great character. He's fun, flouncy and flirty, but has a will of steel and a wicked-strong tiger to match.

These guys were fun to watch as a couple and Silene was amazing in action.

Highly recommended. 4.5 of 5 stars

Nice story. Pretty predictable but still enjoyable. I wish that Seline had continued in his position and taken to it a little more. why can't an omega be an alpha too? it would have been an interesting twist that goes against the "alpha grain"

Unfortunately.

that was not enjoyable at alllllll! And. .I totally remember loving this series. Seemed very rushed and forced .
