So great, I love those stories!

Robin Stevens says

Top class school story - lovely stuff once again!

Katy says

The maths struggles were fun but I didn't really enjoy the super shady teacher.

Αταλ?ντη Ευριπ?δου says

A bit predictable and overall inferior to the previous two books in my opinion, but an enjoyable read nonetheless.

Another great title in the series. The plot was really gripping as usual and I enjoyed the bit of detective work that's done towards the end. School drama is very well-depicted and even though the resolution is a little too easy to be believable, there's also a grown-up feeling in this novel that comes from the great continuity between books and the simple but good writing and characterization.

Deborah says

Another great story, as Rebecca and co enjoy the summer term - their last term in the Junior house. And even though I've read it lots of times, I still always get a bit anxious about Rebecca's maths exam. It's all pretty stressful for Rebecca but there are still plenty of positives - it is, in every way, a much sunnier book than the one before.

We are also introduced to Robbie, and tennis, for the first time - although only briefly. There is so much focus on them in the later books that it's easy to forget how completely unimportant they both were at the start!

Caroline Clancy says

read with my daughter

Andrea says

The self-serving actions of an unrepentant scoundrel achieve a positive result. Who'd'a thunk it?

Charlie says

Another enjoyable read in this interesting series. Definitely a series I'll be recommending, though it's not a favourite.
