Super sexy and even naughtier than Buy Me 1, if that could even be said. Buy Me 2 features the assistant/friend Mandy who we met when she worked in book 1 for the Cortez brothers. In this book we see why the events that led up to her 30 days with Charles Townsend, the “enemy” of the Cortez brothers. Well, the cover speaks a lot of words and its Vegas baby. Oh and it’s another auction, this time Mandy puts herself on the auction block. She wants to feel desired for a change and meet someone after putting everyone else first. She thought Charles didn’t like her ; there was A LOT she didn’t know about Charles.....This story had the intense, obsessive Charles secretly pining away for a woman who didn’t like that he was in love with her. I mean, come on. The entire time he had her for 30 days, he had her entire room wired with camera and sound and then he masturbated as she masturbated to thoughts of him.- Charles knew as soon as he saw her one day that she was IT for him. He did things to make it where he would have her. Not to say that he didn’t mess it he always tried to make it better. Oh he was really into kink- heavy BDSM. He tried to surpress that side around Mandy but soon , there was no rules and they just went into this feet first. I loved this story because it was deliciously great and I am enjoying meeting each couple and getting to know their freaky sides and their human, emotional sides. Charles has a side to him that makes me want to hug him- With Mandy, I felt for her.- she didn’t want to lose her “family” and when she had some stuff thrown at her, well, she just didn’t want to lose the only family she had. The twists and turns presented come but ended up working out perfectly and the HEA was great. Now I would love to see kind of story was brewing between Samantha and Leo Ramsey. Also, Tiffany aka “Miss Foxy”-she too sounds like she has a story that calls for her to find that special man at “The Auction”... You will not go wrong with this story, especially if you are looking for stories with great storylines.

Short, hot and kinky. I liked Charles and Mandy, both. The pace wasn't as fast or instant as the most recent AR books and I liked that. The attraction is there but the love comes over time (well in less than 30 days but it beats the common 1-2 days AR is typical of these days anyways!) It wasn't as crazy and OTT which made it a lot easier to enjoy. It was sexy, sweet and doesn't make you roll ur eyes too much at the crazy bits. Definitely can see a re-read especially for Halloween ;)

Wow! Charles was an OTT alpha male. Really over the top! And I liked this one better than the first book because of that. And he's very sweet!

The story was about Charles, 35 (correct me if I'm wrong) and Mandy, 25.

Mandy worked for Snake Eyes casino owned by Charles, serving out her contract of 30 days. She was pissed working for him because he figured out that he's been holding something over the Cortez brothers but did it anyway because they're family to her. They're not related by blood but they're still a family and they protect each other.

After her 30 days with Snake Eyes, she joined the Mistress Auctions and Charles bought her. She's mad at first but she soon realized that he's different to her. He's dark and very hard man but he's soft and sweet to her. And he's so possessive. Very very possessive! And I loved it! Yes, I loved how possessive he was to her.

There's a short epilogue but it's enough to see what happened in their future.

Hmm... this one didn't work for me as the first book. BDSM is a touchy subject for me. I fail to understand the whole dom-submissive thing, nor do I wish to.

I must admit I'm surprising myself. I'm ok with the ménage à trois in the first book, but a little submissive stuff cools me down. I'm ok with mild BDSM, but I have a problem with it being a part of a long lasting relationship. I cannot imagine calling my husband *Sir*.

Meh! De gustibus!

Poor Charles. He wasn't even a 'one minute man', he was a 'push in and pump' guy.

I ignored all the pre-warned cliches and OTT shenanigans and had myself a good ol, fun time!

Told in dual first person POV and standalone story in a series. I do love me a possessive alpha (no matter how cliché) however, as much as I enjoyably ignored all the OTT moments, it was hard to ignore the fact that if the H wasn't rich, good looking and so in love with the h; his desperation to own her was seriously on

the creepy-call-the-police side. We are talking about installing cctv in the unknowing h's room, cuffing her to the bed when he has to leave the room, making it conditional that she can't talk to other men or leave his side without his permission, physically hauling her back home when she tried to leave him after a misunderstanding and cuffing her back to the bed before they even had the "make up" conversation.... the list goes on.... In the book world and being in the H's head made it seem so romantic and alpha'ly possessive but in the real world..... warning lights and Jeffrey Dharma comes to mind....

Anyway, still sexy, entertaining and enjoyable to read. Would recommend to those looking for a short, smutty, tame bdsm read :)

Err... Even it's not my favorite, but I liked it. And you have to read Buy Me first before jump into this. What can I say is Buy Me 2 is kinkier but has very sweet and romantic short story.

This is about Mandy, foster sister the Cortez brothers including as their assistant. Because of some agreement, Mandy has to work for Charles Townsend the owner of Snake Eyes for 30 days. Now the contract had finished and Mandy still has unresolved feeling with her former boss. Btw, i like Mandy. She's funny, witty and charming.

Charles is the devil in business. But he couldn't have Mandy and always distanced himself with her. He's longing for Mandy since the first time he laid eyes on her. He has to have Mandy with whatever it takes. When Charles heard that Mandy will be in auction, he determined to own her.

"I couldn't ruin her with my desires. I tried every day to control the beast inside me, but seeing her, smelling her sweetness, I wanted to ruin her. It didn't matter if she met my needs, I had to find a way for it to work."

I loved the part with Halloween theme in the auction. The Cortez brothers appearance and their jokes LOL. The most surprising part is when Charles clearly Dominant and possessive bastard, he has soft spot with Mandy. His outside is ruthless businessman but inside he's tender man with loving heart. His affection and care for Mandy, melted my heart. Mandy knows that Charles is the only man she want. After denying his attraction and how asshole his attitude towards her, until Charles confessed everything to her, she surrender.

Very interesting story. The premise was really good. No plot but still nicely written. Their chemistry is undeniable and burning hot. Mandy is a virgin and never told him. Surprisingly, Charles is very soft towards her *lustly sigh*. I enjoy Charles kinky side which is very fun not dark. Kitten? Aww... Obviously, this is better than the first one. My only issue is the ending is too rushed. Everything is resolved in a couple of paragraph? Oh please just add one more chapter and adding more feeling.
