Weird But True: 300 Outrageous Facts National Geographic Kids

At last, all those weird but true facts that readers of *National Geographic Kids* love so much are collected into a fun-filled book that you'll come back to again and again!

Weird But True is based on the hugely popular magazine page of quirky, fun facts that many readers of *National Geographic Kids* magazine turn to first. Why? Well did *you* know that... Peanut butter can be converted into a diamond? The world's oldest pet goldfish lived to be 43 years old? The world's longest soap bubble was as long as four school buses? On Neptune, the wind blows up to 1,243 miles an hour? An elephant's tooth can weigh as much as a bowling ball?

All of the facts in this handy book will amaze friends and family: Animals Superpowers...Chills and Thrills...Eat or Be Eaten...Mini and Mega...Wild and Crazy, and much, much more. Adjacent pages for such facts present a one-paragraph explanation of how that fact is possible or why it is so.

Wacky facts, fascinating information, and lively art combine in this easy-to-browse, casual reference book that is sure to give young readers hours of fun.

From Reader Review **Weird But True: 300 Outrageous Facts** for online ebook

Emily Leung Sui Lam says

I think this book really enlarged my horizons. It is a book with 300 outrageous facts in it. For example, girls have more taste buds than boys do and on Neptune, the wind blows up to 1243 miles (2000km) per hour. But I think the author could state more details, for example, the most overdue library book was 288 years old, I think the author should include who, when, where the record was made. Overall, this book is extremely interesting and informative and I would really suggest my classmates to read it.

#Elenaaaaaaaaaaaaaaaa says

I literally was amazed by what i read!?

Wade Schacht says

Quite a disappointment...

Diego says

The name of the book is called "Weird but True!" and the author of the book is National Geographic Kids and the total pages of the book is 208

The summary of the book is that it has a lot of weird facts, for example, a sneeze can travel 100 miles per hour also it said that owls can't move their eyeballs, it also said that if you eat too many carrots, your skin can turn orange, and that is super weird. What I think about the book is that it is weird because it has weird facts, What I liked from the book was all of the facts because I never knew about them until now, There weren't any characters in my book, I did like the authors writing because there were a lot of cool fonts like squiggling lines and other more fonts. I would recommend this book because they're a lot of amazing and weird fact in the books.

Cynthia says

I learned lots of weird and amazing stuff. I learned more about this strange and amazing world. That book is so fun to read.

Haley says

This book is full of random facts that are weird but true. I personally love this kind of book, but I also think that it really appeals to boys. It gives many facts that are almost irresistible to share and makes you want to read more. This book could be read in small groups, with partners, or when there is spare time to fill such as waiting in line to go to the bathroom. The facts can get students interested in specific topics and could be used as a way to find a topic to research further.

Madeline J. Rose says

Interesting stuff!

Lucas says

I loved this book! There are so many facts that you just want to share each one! It is a great read and some of the facts are very interesting. I would recommend this book to anyone looking for a good read!

Jim says

Hey! Don't judge me. It's ok for adults to pick up a kid's trivia book and rip through it. I learned a few interesting things I didn't know, and was reminded of facts I had heard before. It's all good. I always liked trivia. You can never stop learning. So if you are in the bookstore, one of the dwindling few, peruse a trivia book. It's National Geographic, for goodness sake, everyone loves them. It's a bit cheaply made, and you know it is basically a money-making offshoot of the magazine, but who cares. If even one child finds something that fascinates them, it is for the good, and anything that gets kids to read is a plus in my book.

Emily says

This book is full with really weird stuff in it. I don't even believe some of the facts inside the book! It even has an average amount of how many times we will shower in our entire life!

Jack Bailey says

I love these books with all the outrageous and cool facts that you never even thought of. My favorites were, cold stars are blue and that bee's can be green, blue and red.

Sophia Adams says

I loved this book because i could read and share facts with my friends, also i enjoyed this book because i have learned a lot of facts from it that i didn't know before reading this book.

Abby S says

Kinda gross but I liked it. More for boys I think but that's my opinion. Some of it was not true in my opinion but it wasent bad

Elise 🐾😋🖤🎨🐈📚😍🐕 says

I really liked this book. It has so many interesting facts in it, and I find it interesting.

Halle Bentley says

Weird But True: BOOKS 1-4

By: National Geographic

Book 1- 200 Pages

Book 2- 200 Pages

Book 3- 200 Pages

Book 4- 200 Pages

Total: 800 Pages

Informational/ Non-Fiction

Did you know that you can buy socks made from bamboo? Has it ever occurred to you that humans and slugs share more than half of their genes? Probably not right? Well believe it or not both of those facts are real. The weird but true series is packed with highly interesting facts. You can learn about food, animals, technology, outer space, humans, history, holidays, geography and a lot of other subjects. These books are easy to read and a great source of non-fiction. You will be amazed about how much you know after you have read these books.

I gave these books 5 stars because they were so interesting and I couldn't put them down. I learned so much from them! I learned that if you eat too many carrots you may turn orange, hot water ways less than cold water, the worlds termites outweigh the worlds people, human thigh bones are stronger than concrete, it's possible to smell scents in your dreams, salt was once used as money, and hamster teeth never stop growing. Of course I learned a lot more but I thought these were really interesting. I recommend these books to anyone. They are easy to read, REALLY FASCINATING, and fun. Happy reading.
