## **Talonridge** Heimdall Thunderhammer

Durbin the young mouse saved the forest of Verdancia from a horde of savage rodents. Then he helped Clove find the hidden Elemental's temple where she received the second spell in her quest to become a geomancer. But in the process, the group lost their trusted guide and ally. Durbin must now take the lead, knowing only that their next destination is the vast fields of Korel where the legendary rabbits who protect the critters of the land will help them find the third hidden temple.

But when they arrive in Korel it is not the rabbits who are there to greet them, but a giant hawk intent on killing the five forest critters. The group is rescued by a clan of hedge hogs who tell them of the curse that has befallen Korel, where the hawks have defeated the rabbits and enslaved every critter of the land.

Together they devise a plan to free the enslaved critters and defeat the hawks. But before them lies a mighty task, as they must climb to the palace at the peak of the giant mountain Talonridge. And many questions remain; Where is the hidden temple that contains the third spell? What secrets do the hawks of Talonridge protect? And what has happened to the brave rabbits who once ruled the land?

Talonridge is the second book of the Magefable Saga which follows Durbin and Clove as they journey around the world to gain the powers of a geomancer—a mage with the ability to control the elements. On their journey they must survive terrible tyrants, ferocious predators, and the harsh elements of nature.

## From Reader Review Talonridge for online ebook

### Erik This Kid Reviews Books says

The adventure started in book 1, MageFable, continues! Durbin, the mouse protector, Clove, the mouse mage, Morro, the slinging hedgehog, Reverie, the songbird whose singing has great effects, and Bailey, the squirrel warrior, are back in their quest to bring Clove to all of the Elementals so she can become a geomancer. They go to find a temple for one of the Elementals at Talonridge. There is a problem though – Talonridge is ruled by tyrannic hawks. The friends pledge to help the enslaved critters while defeating all of the hawks and getting Clove her magic power. But, sadly, the heroic critters are greatly outnumbered!

I loved the first book in this series (MageFable) because it reminded me of Redwall by Brian Jacques, but I also thought the book was unique in its own way. Talonridge didn't disappoint me! This book has a great plot that kept my interest. The action and adventure is great for any age. I love how all of the fighting isn't gory or graphic, or too detailed. That makes it better for younger kids. Durbin is a nice character who you come to know pretty well. Clove is an awesome character and you get to care a lot about her. The black and white illustrations are done well and are a great addition to the story. They have a cartoon-y feel to them and I like to see what the characters look like. I think Mr. Thunderhammer is a great author who writes this story well. I can't wait for Book 3!

\*NOTE\* I got a free copy of this book in exchange for an honest review.
