I liked the story, but the final was...seedy.

This is the second time to read Lenney Samuel's story. This book is good because there are lots of explanations about things involved with movies.

Sofija Sion says

It was an okay book. It wasn't special, but it wasn't a cliché. Overall i think a 3/5 is enough.

Virginia says

Bad written, stupid story... What else should I say?

Discussion question

1 In this book, the main character asked his friends and ex girlfriend to help.

Recently, did you contact with old friends or ex girlfriend or boyfriend?

Actually, I got together with old friends in the restaurant. We talked a lot for 5 hours. We talked about future and memory about elementary. It was so fun. I had a great time.

2 In this book, the man received a threatening letter. If you got a threatening letter, what would you do at first?

Maybe, I asked my mother and my father. It depends on them.

It is because that if I told police, it is very dangerous.

I can't stand reading this book and listening to the audio anymore. The sacrifices I have to do to learning English. This is the fourth time that I reread this book and listen to the CD! And I don't even like the story. This is a retold version for people who are learning English. I want to read a "real" adult book in English.

At the beginning it is fast to read but then is a little bit boring, confusing. The story is not so good, is complicated due to that there are so many characters and it is not well written: describes so much things that aren't important, repeats other things, it doesn't make you understand everything... The end is weird also, you have to join all in your own head and suppose things for understanding everything that happened and ends suddenly, like many other parts in the book, so quickly changes all. Not so bad for 1 star but not good enough for 3 obviously.

The story L.A Movie by Philip Prowse talks about an actor who has a private detective to investigate who makes a death threat against a female actor. I enjoyed reading the story because it let me imagine what will happen. The best part of the story was at the beginning of the story because I was curious to know what's going to happen next. I recommend the book for those who like to read adventure books.
