Gave up. No terror at all; the tone's more an overview than narrative tales. Did not suit my reading mood.

13 spine-tingling folk tales from all over the world. I loved it! Very eerie, some sad and some very gruesome! A must read for those who love scary tales.

Terror? There wasn't anything in here that I would call terrifying. I read these stories right before going to bed, sometimes reading two or three in a sitting. I didn't get a single nightmare, and I was hoping for some since they tend to give me good story ideas I can use later. But this book *did* have a lot of good stories, and I was happy to see the editor put each story in its own chapter, as opposed to the other volumes in the series where the stories often run together in a big confusing mess. The artwork was just as good as other volumes. Overall, it's hard to pick a favorite with this series, but this volume would certainly make my top three.

My review for all of these books in this series is the same.

Time-Life has once again done an outstanding job putting together a series. From cover to cover they are thoughtful, beautiful books. I'm starting to sound generic, but it's true. I'm a DK fan, I like white backgrounds and side notes with clear sections for every subject. This series has none of that. What they do have is an old book feel. Timeless artwork, thoroughness, and very well written makes these a must on my occult/paranormal bookshelf at home. I've been collecting the series slowly over several years and still have a few books to go. I refuse to go on amazon and buy them. It's all in the hunt for me. There is no subject they have left untouched. I highly recommend them.

Classic tales, elegantly told, brilliantly illustrated.

The number thirteen to me has always held a bit of horror and fear. This collection has thirteen stories that might just keep you up at night. Of course, with a Time-life book you will know you are grabbing a winner.
