### **Velvet Michael says**

#### **Excellent storylines.**

This was a wonderful seer of books. Each one full of adventure, some hanging by your fingernails suspense with some wonderfully erotic scenes. These bad boys and the women who tame them make for an excellent read.

## Emalie says

I only read the short stories by Jennifer Ashley and Felicity Heaton, because those were the two I was interested in. (Maybe some day I will read the one by Laurie London as well).

I liked both stories I've read and I can't wait for other books by those two authors.

*This is the perfect book to entertain you with very good variety of paranormal stories with different types of worlds and characters, settings, and time periods. Well worth reading!*

**Jennifer Ashley** is a auto-buy for me and I had already read the story she had in this boxed set.

I bought it because it's also a *great* way to preview other authors I haven't read. I had not read any of **Caris Roane's** books--Dark Flame is an excellent, well layered, story. **Laurie London** was another author I've now have on my list. Her story, Warriors Heart was a paranormal with a new twist for me which I really enjoyed. Although I'm not a big fan of Angel paranormal, I did enjoy **Felicity Heaton's** Hunger. She's another author I will be watching.

This box set is well worth reading with good, well rounded short stories that gives you a taste of new authors you may not have read and all of them also write full length stories and series. Knowing their story telling style makes it much easier to buy the full length stories and investigate these series.
