## Fill In The Blank

*Rachel Vail*

### Fill In The Blank Rachel Vail

Tommy and Zoe have been friends forever. Being with Zoe is like being with one of the guys, only better. She likes to play sports and doesn't mind getting dirty. But lately Tommy's friends have started teasing him about being in love with Zoe. It's so ridiculous. Still, when Zoe asks him who he likes, Tommy suddenly realizes there is only one name that would fill in the blank...

### Fill In The Blank Details

## From Reader Review Fill In The Blank for online ebook

### Ro. says

Es un muy buen libro recomendado para adolescentes entre 13 y 15 años.

---

### Kristina D'Antonio says

I don't understand why I like to read these little books for preteens so much, maybe my 13 year old self wants a little attention too. The truth is that I've been reading this series since I was little, and I'll most likely keep doing it.

The only thing that left me with a rare taste in the mouth is the so inconclusive ending. It even drives me a little sad. Things should not be like this (I think in another book in the series the problem is clarified, but I'm not sure). But well, it's a cute book. Something that any girl would love.

---

### Jamie says

Deliciously dramatic!

When I was younger, I only had two books of this series, and after my sister took a serious interest in it, bought the rest off of abebooks.com. It's a well-rounded series, and although it may be repetitive to look at one situation from several viewpoints, I think it's a good thing for pre-teens to do, to begin to understand what's going on with their classmates.

Let's be serious here. I just like the gossip!

---

### Camila says

This is the first book someone gave me (I read other books before, of course, but thus was totally mine and it made it special). I pretty much believe I was like 8 or 9 years old in that time and there's no way in heaven to say how much it changed my entire life. Tommy Levit and Zoe Grandon are my childhood heroes and I'm very grateful at them and Rachel Vail for letting me read a book with this amount of quality so I felt motivated to keep reading books. I guess you could say this book made me basically the book addict that I am today and I swear I can't write enough "thank you's" to it. It's brilliant. A piece of art.

---

### Zelda Ber says

with this book I fel in love with reading. I got so obsessed that I.would read.them 50 times in a month. if you are a parent.First thing.you need to do is give your kid this series to read. the best way for them.to start to read.books.
