One of the devices I especially enjoy is the alternative perspective - in fairy tales, certainly, but the authors here embrace the idea. Sometimes the story is told from the perspective of one of the primary characters, or there is a back-and-forth between one or two. Other times, the story comes from the suspect and sometimes you don't quite get the 'suspect'-ness for a bit. I also like that the FBI guys do get caught up with their suspects - these are people, sometimes more victim than criminal.

Whatever will I do when I get to the last of these?

The Unit continues to develop ideas about the gamma/beta issues. Back history is uncovered. The timeline is convoluted, so pay attention to the dates. Be sure to read earlier volumes first!

[Brady finally came out. I don't understand being closeted but I was born in 1985, I came out soon after figuring out I was bisexual and the only family member who was bothered was already fighting with me about my life. (hide spoiler)]
