Tia says

I liked Bella and her adventure with her two mates. However I just don't feel the novel was all it could of been.

Sloane says

My main problem is the lack of development with the friendship that led Bella to the woods in the first place. Her friend's boyfriend only wanted Bella to accompany them to act a nature guide to the two couples. The men even packed her a small tent when the sleeping arrangements were supposed to be men and women in separate tents. I personally would never make my friend sleep by herself in the woods. He's a complete jerk! He blames her for his lack of preparedness. *Spoiler* After she's been missing for days and they find her at home, he jumps on her case and her friend just lets them!! Then she leaves with him without knowing anything about what Bella had been through. I wanted her to confront her friend by the end of the book and that never happened. I feel like there should have been something said. The relationship was pretty good and I liked the little surprise (although I wish it was said how Bella knew stuff; I guess wolves can detect gender from the womb...I didn't read the first book.)
