One of the lest interesting L.L. I read till now. There is no continuity in the story. A little bit Dalton Bros, a little bit Indian wars. The guy Fingers is funny. But that is all. And well, it's the first time (I think) we can see L.L. without his usual cigaret.

Lucky Luke is the sexiest cowboy, ever! I was fangirling over him for so many years, and well until forever. Hahaha

Unlike most of the Lucky Luke series, which often spoofs individual Western movies, this one is more of a spoof of a crime caper comedy called "Hold That Blonde." In that film, Eddie Bracken plays a kleptomaniac who steals without being consciously aware of it.

Make that character a stage magician, and he becomes Fingers.

This story has plenty of the slapstick comedy that makes Lucky Luke stories delightful, but somehow the story is just a little too full of clichés. The Daltons have slipped a little too far into Three Stooges territory in this one, but also are just a plot device for dragging Fingers into traditional western crimes. This again mirrors "Hold That Blonde," where Eddie Bracken's character uses his kleptomania to thwart gangsters by stealing things faster than they can.

Even Lucky Luke's horse only gets a couple of good lines in this one.

The piece of straw [instead of his usual cigarette] in Lucky Luke's mouth looked like it may have been a late revision, as the straw sometimes stops before it reaches his mouth. Still, it's a nice change.

Definitely way better than the last one I read. Though have never been a fan of Fingers.

Akhirnya ada juga yang mampu menandingi kecepatan tangan si koboi kesepian ini. Kocak juga lihat wajah LL saat tahu senjatanya sudah berpindah tangan tanpa ia sadari.

Biar bagaimana, namanya juga kisah, jagoan ya harus tetap jadi juara dong pada akhirnya.
