Murdered at 17 Christine Conradt

In this suspenseful and romantic teen thriller based on the “can’t pull your eyes away” series on Lifetime, one girl discovers that trusting the wrong person could have deadly consequences.

Pretty and popular, seventeen-year-old Brooke Emerson is the envy of her classmates—and even some of her closest friends. But while she seems to have it all, Brooke has never felt so lost.

Ever since she sustained a head injury during a cheerleading stunt the previous year, she’s suffered from a disorder that causes her to fly into uncontrollable, sometimes violent rages. As hard as she tries to keep it together, she finds herself in danger of jeopardizing her seemingly perfect life.

It isn’t until Brooke meets Jake, a handsome and charismatic stranger, that she feels like she’s found someone who not only understands her, but accepts her for who she is. As tempting as it is to get swept up in the romance, she can’t help but feel like something in their relationship isn’t quite right.

When her best friend is brutally murdered, Brooke has no choice but to depend on her new love...especially because she's worried that *she* might be the killer.

Emily says

Brooke is a normal teenager until a cheer injury leaves her with frontal lobe trauma. After, she has a hard time containing her anger, leaving her prone to fits of rage on those close to her. This is made worse by drinking while on her medication. She meets a guy who seems absolutely perfect, but shortly after becomes super sketchy. After passing out a party, she wakes up to find her best friend dead. She spends a short period of time thinking it was herself in a blacked out fit of rage, then soon finds out the truth was way more sinister. I couldn't put this book down. When they take the helicopter to NY, it made me think of the 50 Shades series for some reason (which I love). I called Jakes sketchiness after he showed up at school like a total stalker. I just thought he was abusive, so the twist with him was much appreciated. It was sad that Maddie and Brooke ended on such bad terms since they were such good friends, but in these situations I guess you don't have much of a choice. The only bad thing I found with this book was a missing word in a sentence. About halfway down the page on page 265 it says "I am so in love you, Brooke Emerson." Not a big deal as you can clearly understand what is being said. Overall I thought the book was very well written, and it kept you drawn in wanting to know what happens next.

Baily Classen says

I love this book so much. It definitely hooked me and I felt so many emotions reading this tying into my own life. The characters were amazing and i felt a real connection with all of them.

Emily Morris says

I loved this book, honestly adored it. It has a great plot and such a suspenseful and thrilling ending. I found this quite enjoyable and finished this book within two days. You will absolutely fall in love with the story and characters, its a shame there couldn't be a second. I recommend this to all mystery/suspense lovers!

Jaimie Frasche says

I didn't even want to put this book down! It had a grip on me from the very first chapter, read it in 2 days!!! It made me want to watch the movie just so I can compare!

Kate says

No wonder this book was turned into a lifetime movie...
