YA isn't normally my preferred genre, but I found this book, which is the first of a trilogy, quite interesting and entertaining.

When Tasmyn (rhymes with has-been) Vaughn moves to King, a small town in Florida with mysterious origins, she quickly discovers her ability to read thoughts doesn't make her the strangest kid in town. Tasmyn is being raised by loving parents who are perfectly imperfect. The overprotective manner in which they are raising their daughter (to protect her from those who would take advantage of her ability) combined with their habit of moving on a frequent basis, has unintentionally made Tasmyn a lonely, insecure teenager. In King, she meets and falls for Michael, a boy who comes from a family where the men are able to recognize their soul-mate at first sight. When Tasmyn inadvertently hears the thoughts of fellow students that convince her one of them is going to cause harm to another, she and her new boyfriend are driven to act to save the one in danger. Nell is a young witch who is determined complete a blood-sacrifice ritual that would increase her power. The kids decide not to tell anyone that Nell used witchcraft to try to murder their classmate, Amber, except for Michael's parents (who are a little too perfect) because the knife she was using disappeared and they think no one would believe them. For some crazy reason, Micheal's parents agree to keep their secrets. Nell, who figures out Tasmyn's thought-reading ability, decides she would make an even better blood-sacrifice than Amber. More danger ensues. Considering the fact that this is part one of a trilogy, there are still lots of questions remaining at the end of the story (which will no-doubt be answered in the next two books)but overall, enough are answered to give the reader a satisfying ending and a sweet love story.

Wanda Hartzenberg says

This was such a fun read. No love triangles, no excessive teenage angst only good vs. evil. Love conquering all and fun.

The two main protagonists are well adjusted teenagers with the female having a talent she needs to hide. Michael, the male protagonist is not happy with this, since he loves Tasmyn and wants to love all of her, be with all of her, and know all of her. In this she finds a confidante and an opportunity to live her life, and to use her gifts. But her gift lands her in a situation where she is in danger, mortal danger – can she use her gift to save her?

I had fun reading this book and will recommend it to all lovers of YA paranormal genre readers.

It is worth every **** star I give it and I see great things in the cards for the author.

So let me get out there that I'm not a big fan of books with witches. However, that was not the focus of the story It was a side aspect to Tasmyn's trouble with hearing people's thoughts. Speaking of whom, I really liked Tasmyn, and Michael. There were moments I found their lives/responses to circumstances a little too sweet for reality, but hey, that works too. It makes a for a light, sweet read that parents won't be worried about having to sensor for YA readers.

Content warning: Clean.

I thought this was going to be a fun ya book about a spooky town and so I kept waiting for it to BE about a spooky town. Instead it was a sappy dragged out story about two unrealistic teenagers and their unrealistic lives. Remember that Seinfeld episode where George was all like "no you're my shmoo pie!!!"? It was worse than that. "Let me mentally declare my love and devotion for you over and over Tamsyn, because I'm a 17 year old boy and I am always pure and serious!"

I read a ton of ya fiction because it's generally a fun little adventure. Usually it seems with a lot of ya fiction it's about someone taking on something bigger than themselves and finding they are better than they thought when a lot of adult fiction is someone looking inward and finding they were less. This is the first young adult fiction book that really had me grumping "why are young adult books always about young adults!?"

Also, Thanksgiving is the same time EVERY YEAR. It never "was late that November". Opening a chapter with that is just really annoying.

This book took me a while to read, and I have to say it dragged a little, but, and I know this is crazy, but I have a new book boyfriend! Michael *swoon* Wow he's one incredible guy. He's gorgeous, his personality is amazing, he's a well-rounded guy, he respects his elders, he respects Tasmyn, he's just perfect. I really hope he turns out to be as perfect as he is now.

Actually, thinking more about the book, there wasn't really much wrong with it, just the length of time it took me to read it. And even though it was so cliché, I'm so pleased that (view spoiler) I just wonder what'll go on with (view spoiler) in the next books. Might read them at some point, who knows.

I love this book! I mean the boy is like the perfect boy and boyfriend but hey this is fantasy and I loved it. I really couldn't put it down. I am eager to read the second one. Yes not really reality (with how great the boyfriend friends and family are) but we all could use an uplifting type of fantasy. Not all dark.

Tasmyn is starting yet another first day at yet another new school. Her whole life she has been able to hear what others are thinking and has had to learn to block them out. Unfortunately she ends up hearing something about a blood sacrifice and it totally creeps her out. But not even a full day in and she has already made an enemy with one of the most popular girls in school, and the earlier creepy thought gets pushed to the back of her mind. Thankfully one of the most gorgeous guys in school comes to her rescue...and he seems interested in her. Not one for talking to guys, Tasmyn is not sure what to think. Feeling a pull towards him too, Tasmyn is not sure how long she will be able to keep her 'talent' secret. And with things getting weirder in her small town, keeping her talent secret is getting harder by the second.

Kandle wrote a very convincing love story between 2 teens. Yes it's a love at first sight romance, but I love her whole take on it; with it being something of a family affair. I don't want to give that part away, but it's really sweet and very romantic.

I absolutely loved the storyline...what's better than a girl who can hear other people's thoughts and ends up turning using that gift for the greater good? With things going crazy in the small town of King, Tasmyn has her work cut out for herself. But thanks to some great characters, Tasmyn is not alone in the fight.

The only problem I had, which is just a personal issue mind you, is the use of witchcraft. I am not hugely fond of witchcraft stories, but with that said, I enjoyed it and how it all ended. And really it wasn't satanic at all in nature, so it didn't turn me off at all. I am still looking forward to more of the series and more of Kandle's writing.

Fearless is the start of a great series that is perfect for any YA reader. It's clean and simply romantic. I enjoyed it and hope you will take the time to read it too.

Well I didn't find this book very exciting and will not be continuing on with the series.

I guess I like a little chase in my romance books :)

Also I really could not stand her parents....I think that secluding her from the world and making her feel bad about having friends is just as bad as someone trying to use her for her powers. They even went as far as to make her feel bad about herself after she saved others lives...idk...I think her parents are idiots.

Etienne says

Not bad written, actually the writing was a bit better then what I was expecting. But the story... way too many clichés for me and also very teeny/girly! I'm clearly not the targeted public here, and I think that some teenage girls could find something good in it. But it's still a very generic, see a million time kind of story. I'll go with 2,5/5.

I won this book from a contest on Facebook that Willow Cross was having and I feel like a major winner of this book by Ms. Kandle. What a fun story this was for me to read. I wish I had won it sooner to have the opportunity to follow this author.

The story is about Tasmyn. She has been moving non-stop in all her years it seems. It's been very hard to have friends because of the constant moving and because she has an ability to hear people's thoughts in her mind. The first day of school she has a run in with Nell and she can't figure out why this girl dislikes her so much because she hasn't even had a chance to do anything to cause it. In the hall while having words with Nell, she meets Michael. Michael has already changed her life. She is finally getting friends and now has a boyfriend, something she never thought possible. He sends electric currents through her with his touch and

she can confide in him her abilities that she was never allowed to share with anyone else. There's a secret about the town she lives in and he has heard it. One of the girls that Nell has befriended seems to be in trouble and Tasmyn knows the anxiety it is causing her but can't tell her she knows. Can Tasmyn save this girl? Are the things she is hearing just rumors or is there truth to what is going to happen? Is there something more to Michael than Tasmyn knows? Very exciting story and well written. Great job Ms. Kandle on this book. I plan on reading more of your work.

I really toyed with my rating, and finally landed on 3.5 stars. On the one hand, the story moved well, the characters were well drawn, and it was pretty well written. On the other hand: I hate insta-love. It's just not believable in my book, unless the author makes it believable, i.e., give me a reason to believe it. In this case, it didn't work for me. But for those of you who believe in love at first sight with no cosmic explanation...go right ahead and disagree with my thoughts and rating, cuz you'll love this book!

So, like I said, this book was actually well-laid out, the plot moved fairly well (though started extremely slow...I'm all for the slow build-up, but sometimes things gotta move along, ya know what I'm sayin'?), and things were very descriptive. You saw, felt, smelled, got all the senses going.

Tasmyn is like-able, and her growth is what's to be expected from a teenage girl with over-protective parental units. I like how she took control over her life in the end. Atta girl! Loved the bitches, I could just picture those mean girls raging through the high school halls. The science teacher was deliciously mysterious and creepy.

Michael, her insta-love connection, is a nice guy, works hard, struggles sometimes in school with some subjects (which I liked, no one can be too perfect, otherwise - gag!). Another well-drawn character.

Here's my problem. Everything was insta-good. Tasmyn and Michael? Insta-love. Tasmyn and his parents? Insta-love. The good things here were that her parents weren't so quick to jump on the love caboose with Michael, and his sister wasn't down with the whole gee-she-can-read-your-thoughts-but-don't-worry-she-works-real-hard-to-not-listen-but-hey!-no-promises-there sitch. Good for her. Can't have everything be too easy! LOL

Other minor annoyances:

1. If her parents are so freaking over-protective, the first, and I mean FIRST, thing they'd do is buy her a cell phone so they can connect any time. Not buying the fact that she didn't have one.
2. The set-up at the end was obviously a set-up. But Michael had his phone turned off...who does that? No teenager I know, so this was an obvious hurdle the author threw in to get us to the main event.
3. There's something going on with the insta-love connection, since it seems to be a family trait on Michael's side. I would have bought this whole thing if there was something behind that, and maybe there is, but it's never touched on.
4. The wrap-up was kinda quick.

Overall, the book was good, just a little too many coincidences and obvious in the plotting phases.

Fearless by Tawdra Kandle
Published 2012 by Hayson Publishing

Fearless is a paranormal romance set in present day Florida, combining contemporary high school scenarios with witchcraft and ESP. The author does a good job creating interesting characters and settings, and setting up a world of characters to start this series.

Tasmyn is a high school junior, new to her school and to Florida in general. Her family moves around the country a lot, both for her father's work and to keep her unique abilities a secret.

Tas can hear other peoples thoughts and feelings, and her parents fear the ability will land her in some government facility. While their paranoia might seem a little overblown, the mindreading does seem to keep landing her in trouble quite frequently.

Right from the start, she meets a boy, Michael, whom she can't keep the secret from. He's inexplicably drawn to her and their relationship is a whirlwind affair of insta love for both of them, which gives her an instant ally and insight into the strange insular community her family has moved to.

Founded by carnie folk years before, there are supernatural and mysterious elements afoot in the town, as well as witchcraft. Tas gets herself embroiled in a mean girl scenario with the head of the popular group, with her mindreading skills giving her strange visions of what the girls are planning.

This is the first book of a series about these characters, but frankly I won't be reading more of them. The storyline held my interest inasmuch as I wanted to read to the end, but the plot twists were predictable and the insta love was not all that believable. For someone who has spent her entire life hiding her gift and not having any friends, Tasmyn jumps into this new world of boyfriend full disclosure pretty quickly. Her parents also don't react how I would have expected, if they've spent their entire lives hiding their daughters talents. Interesting read, but in the end not as satisfying as I would have hoped.

Melissa Haggerty says

Fearless was such a wonderful young adult paranormal romance. I have always enjoyed love at first sight stories and this one was definitely no exception. Tasmyn (whose name I just love, by the way) struggles so hard with her gift of hearing others' thoughts. I enjoyed reading through her turmoil over right and wrong when she heard thoughts.

Tasmyn and Micheal's relationship was a joy to read. I loved their first meeting, with Tasmyn being so

drawn to him, and from his thoughts we can tell he is being drawn to her. Their relationship may move very quickly to those first statements of "I love you" but it was never lacking in substance. To many they may seem to be just love struck teens but Kandle does an amazing job of showing how real their love is for each other.

Nell made a wonderful antagonist! She was so mean and hateful that it wasn't hard to find a true dislike for her. Her thoughts were very dark, and as they became more dangerous it made the book so much more suspenseful. When I learned Nell's full story, although I still disliked her, I began to feel some sympathy for her.

Ms. Lacosta is a person who has left me wondering. She started so much of the trouble in this book. She may never be right there doing it but she is the person who seems to instigate so much. I wonder what happens with her. I suspect that she will go on to cause many more problems...

Tasmyn's bravery in this story is wonderful. She has to choose to trust Micheal with her most important secret about hearing others' thoughts. She also has to learn to trust other people as the book goes along. She shows so much courage when she goes after Nell to save first Amber and then later to save Micheal. Tasmyn is a protagonist that people will fall in love with and be cheering for.

I loved this book. It was a very enjoyable and suspenseful love story. I would recommend this book to anyone over 14 years old, mainly because there are some darker areas of the book. I cannot wait to read the next book in this series!

Jordan Erika says

Fearless is actually a wonderful story, so why did I give it a 2?

To get to that wonderful story, you have to read about a hundred pages that will put you to sleep. About ninety percent of the first half of the book is only dialogue and it's bad, cliché dialogue at that. Once Tas meets Michael, the only thing they do for 100 pages is profess their love and trust to each other over and over again, in almost the same words really. It just goes on page after page, and I was literally about to fall asleep because it was so boring. I put it away and went back to it the next day, which made it slightly more bearable to wade through the stuff.

However, if you can force yourself through those pages after they FIRST say they're in love (or just skipping it will work since there are only a few little details in there, and they're of minimal importance anyway), it can be a good story. I certainly enjoyed the last half of the book, at least.

You can pretty much guess what is going to happen in the first twenty or so pages, but I think Nell has a good backstory that adds a nice difference than other stories. I found myself liking Nell the most since she was the character that remained most constant, next to Michael's parents.

Tas's parents are wishy-washy there at the end. They say one thing and freak out, but then the next second it's like they change the whole personality we've been shown for the entire book. It wasn't realistic at all.

The book really should have ended very quickly after the detective talks to Tas. The whole process of introducing Tas to Michael's sister felt out of place or was just done wrong entirely, and it ruined the climax by carrying on too long. By the time I'd finally reached the end, it felt like I was already into a second book that ended abruptly after 30 pages and nothing happening.

I'm going to read *Breathless* once I let this one settle. Kandle seemed to hit her stride (mostly) and I'm hoping it continued into the second book.
