Herman Strickland is a die-hard English professor and self-professed nerd who lives and breathes science fiction, history, and rock and roll. As he meticulously tracks his daily activities in journals and battles a chronic health issue, he tackles the grammar and language problems of Colorado youth and attempts to make a difference in their lives.

Thanks to Alfred P. Handleman, his long-time friend who makes it his mission to keep him in line, Herman manages to remember most of his students' names and somehow endures his troublesome physical ailments. One night when the threat of a tornado causes Herman to seek cover in his bathtub for the night, he passes the time by reflecting on a past filled with life lessons and a surprise encounter with his niece, Jade. But it is what happens after the tornado passes that will change everything in Herman's life forever as he receives a shocking diagnosis.

Teacups and Sandstorms is the tale of one man's journey through life as he fights a silent battle with Crohn's Disease with help from a rather entertaining group of friends.

Novel received courtesy of Goodreads.com giveaway

I tried to read this and just couldn't make myself go any further than 30 pages. It's the story of two older gentlemen who are in their 70's and have been friends since college. One of them has Crohn's Disease and tries to hide the disease. He smokes pot to help control his disease. When the two are together they talk to each other using bands and song titles so that nothing they say makes any sense. On top of all that, the editing is terrible.

I honestly couldn't finish this. I normally try my best to finish books no matter what but this year I'm trying to make room for good books and this just didn't work for me. It was slow and dull. And given the content I found it hard to find a good time to read it. It just didn't work for me.
