The Bellator Saga: The First Trilogy Cecilia London

"This series is off the chain. OFF. THE. CHAIN. Gutwrenching, heartwarming, frightening, loving, sexy as all living hell – it's life in a book." - Kristen, Beverages and Books

"I can't recommend this series enough. The Bellator Saga is PHENOMENAL. I don't know she does it but Cecilia has created this brilliantly intelligent, sexy, suspenseful, and moving saga with both light - hope, love, and friendship - and dark - hate, abuse, and evil. Each book has a distinct feel and direction and somehow each one manages to hit you at a completely different emotional level." - Suzanne, Tied Up In Romance

"Breathtaking. Brilliant. Stunning...Reading these books is like eating a delicious and very expensive box of chocolates, each piece is unique, some sweet, some bitter but in the end you simply can't have enough...never before have I felt so inside or so connected to a story." -Dee, Wrapped Up In Reading

5+++ EPIC LOVE STARS

The Bellator Saga is among my favourite reads! This is truly an unforgettable saga unlike anything I've ever read before. It has all the elements that I love in great storytelling: *an epic love, a seriously kickass heroine, an uber sexy hero with deliciously filthy and naughty ways...*

...smart and witty dialogue, action, suspense and a plot that'll take you on the ride of your life and leave you guessing and wanting more!!

The first trilogy is this hauntingly unforgettable journey that takes you through the birth, growth and the greatest challenges of Caroline Gerard and John (Jack) Montgomery McIntyre's relationship.

Both Caroline and Jack are high profile politicians on opposing parties with promising futures. Their story takes place with the backdrop of shocking political upheaval that puts a corrupt and ruthless government in power.

Ms. London is a wonderfully gifted writer. **Her character development is multifaceted and complex - Caroline's voyage alone will knock your socks off – and the story arc is flawless and riveting!** Once you meet Jack and Caroline, you'll lose yourself in their sexual chemistry and enduring love. Their plight will become yours.

This is a MUST READ. I can't recommend this series enough!

~5 Unforgettable Stars~

~The Bellator Saga~ is a stunning series. Full of political intrigue, passion, romance, and mystery. It is unique and unforgettable! I simply cannot say enough about the intensity of this roller coaster ride! I enjoyed every single second!

~Dissident~Part 1~

"My Monty. I love you so."

Dissident is an action packed thriller with suspense, romance, and passion. It is the first book in the Bellator Saga. As the action shifts between flashbacks of the past and scenes in the present, **Dissident** is sure to hold you captive until the very end.

Through the flashbacks, we experience Caroline and Jack coming together. Caroline Gerard is a passionate Democrat making a name for herself on the steps of the Capitol. As a widow, she has spent time pouring love into the lives of her two precious daughters. She has a great support system of friends, and her life seems to be complete. However, when Republican playboy Jack McIntyre makes his way into her life, everything changes.

"Would you consider yourself a sex fiend with a sentimental streak?"

Although the two sit on different sides of "the house", together they form a friendship that quickly develops into so much more. Jack and Caroline have an intense attraction to one another, and when they come together, Caroline finds that there is still time for her yet to experience passion and love with another man. However, the road isn't smooth sailing as Jack and Caroline have much to discover.

"Just hold on to me."

"Always."

Meanwhile, in the present Caroline is battling the aftermath of a government uprising. Will she have the strength to persevere?

"This is bad. This is really bad."

"I want you to be happy. Joyful. I want to give you everything you've ever wanted."

Told in mostly Caroline's POV, **Dissident** has a perfect blend of action, suspense, and passion. The dialogue is witty, and the characters are complex. As the first book of the Saga, the main focus is to establish the conflict brewing in the government and to mark the beginning of the epic romance between Jack and Caroline. The tension from the present kept me on the edge of my seat. At every moment of horror, I thought I was going to break from the harshness of the present. And then, magically the story shifts to a flashback where love and tenderness are in full bloom. This twisted combination had me on a constant swing of emotions!

~Conscience~Part 2~

"You and me. You're my heart Caroline. Nothing else matters."

Conscience is the second book in the Bellator Saga. You must read **Dissident** to fully enjoy this read. Told again through flashbacks and the horrors of the present, **Conscience** turns up the passion, increases the pain, and the mystery of the corrupt government begins to unfold.

"One day you'll pay for everything you've done."

As **Conscience** begins, Caroline wakes up in the Fed's Prison where the stakes are high. She is subjected to continuous interrogation and is forced to maintain control over her body and mind. As the physical pain increases, the emotional pain engulfs her like a virus.

"They were going to tear her apart, smash her and break her bit by bit, bone by bone and day by day until there was nothing left."

"Any harmless gnat can turn into a monster when granted access to power he doesn't need or deserve."

It is only the reprieve of her memories that bring her comfort and a sliver peace to grasp onto.

"I would do anything for you."

The memories of Jack and Caroline together left me breathless. Their relationship has matured and strengthened into an unbreakable force. The intimacy shared between the two is explosive, and the tenderness of their love had me swooning at every turn. Jack is quite the dominant in the bedroom (my kinky reading friends need to experience JACK!), and Caroline is happy to submit to any and all of his demands.

"When we get back to our room I'm going to fuck you so hard you're going to feel me with every move you make tomorrow."

Told in mostly Caroline's POV, **Conscience** most definitely brought more. More love for Caroline and Jack (and their sweet girls), more fear of the twisted government, more passion for exploring, and more intrigue. To state it plainly, this writing is smart! The plot is complex, and every piece of the puzzle is important. The relationship between the characters remains at the forefront as the backdrop of torture continues to develop. I simply could not put it down.

~Sojourn~Part 3~

"She wanted him inside her. Forever. She dreaded the thought of being without him. Without his touch, his voice, his smell."

Sojourn is the thrilling third book in the Bellator Saga. The action and terror have increased, and only one question remains, where is Jack?

"There were times when she was so blinded by pain that she'd almost forget the reasons behind it."

Caroline is in trouble. The mounting pressure is pressing her down, and it is questionable if she will be able to survive. The Feds have put her through torture and the emotional combat warring in her mind is starting to take a toll. The memories of her past, which had previously brought her so much joy, now serve as a weapon of mass destruction.

"She'd never be okay. Not with the ghosts of the past dogging her every step."

"Her memories had no rhyme or reason. No order, no predictability. They'd engulf her, choke her, pull her under."

And yet, hope still remains. Caroline's determination to remain true to herself and stand firm as a patriot of the United States is what keeps her grounded throughout the terror. As the story shifts from the present to the memories of the past, we grasp onto the love between Jack and Caroline. Their sexual desires are explored (and enjoyed) while the government is falling all around them.

"What do you say I suck your clit for a couple of hours while you practice calling me Mr. Governor?"

Sojourn is like a roller coaster ride. In one moment you are holding your breath from the pain Caroline is experiencing and then in the next Jack and Caroline are acting out their sexual desires that make even that "shade of grey" book pale in comparison.

"How about Fucking your Wife on the Dining Room Table?"

Yes! Yes, please! I think I would like that! And you will too!

"Whether he was angry or sad, joyful or indifferent. He was hers and always would be."

Told in mostly Caroline's POV, **Sojourn** was a nail biting addition to the series. I was utterly terrified of what was to come (or more accurately stated, what might not come!). The complexity of the plot continues to amaze me. The characters are developed more thoroughly through each book in the series. As each layer is revealed, my love and devotion to Caroline and Jack increased. My heartbreak for the terror they experienced became my personal terror because of the close connection I felt to them both. Additionally, there are some secondary characters introduced in **Sojourn** which brought, even more, depth to the plot. I have no doubt they will play a pivotal role as the series continues to develop.

Sojourn is by far my favorite in the series to date. It truly brought me to my knees. There were moments of tears, laughter, and heartbreak all mixed to create an unforgettable blend! Every character is critical. Every moment is unforgettable. Every choice matters. I am simply hooked on this series. My only complaint is that I have to wait a few more weeks to read the next installment. Thankfully, Phoenix will be released soon! I am on pins and needles waiting to see what happens next. I cannot recommend this series enough to my book

buddies that enjoy a challenging read full of dark twists and turns and super sexy scenes! Bravo Ms. London! Bravo!

The Bellator Saga was such a surprise! I had been looking forward to reading it and yet, I had no idea how much I would truly adore it! It is, by far, one of the most complex plots I have ever read. If Ms. London is writing, my Kindle will be ready! **Phoenix**, I am ready and waiting! To Ms. London, I say, bring it!

The Bellator Saga: The First Trilogy is a set containing the first three books in the series: Dissident, Conscience and Sojourn. It's a passionate romance between political opposites Caroline Gerard and Jack McIntyre, and fighting for what they believe in.

The Author is new to me and I only took a chance because I've been seeing it on a friend's feed plus the covers are beautiful. I actually didn't read what this trilogy was about before deciding to read it and for it being a political suspense was a surprise. A good surprise because I never thought I'd like this one.

Politics is a concept I'd rather avoid because of the power play involved, the hidden agendas and double insinuation in words. The never knowing whether the words were spoken in sincerity or a mask to cover up what was actually intended.

But this book, as timely as it seemed with the current events, is as reflective as it is written beautifully in my opinion. This book made me think back on my views and made me reflect upon it. Of what my decisions in

the future will affect, or if I will choose a person in position because of the goodness of his/her heart or because I just accepted what the media feeds me.

This book touches other points in life, not just the political aspect or how people acts when something happens beyond our control or what can we do about it, but also of life, and relationships, be it romantically or family and friendships.

I could also say this book has made my heart stop in suspense and swelled in overflowing love. Made me fall in love, broke my heart, the struggle through life, laugh and smile and the reliving of each scenes as if it was happening to me. The pain and the blacking out of some that are utterly gruesome and unimaginable. But, everything I've mentioned is a given when you read this book.

This book has been a slow read for me because it was heavy, and light at some part, and yes, my vocabulary has been challenge. (The times I had to stop to look up those meaning. Seriously, and people thought I'm good in English. Not my first language, okay?) But all in all, this is a book I'm very proud to recommend. I can't wait to read the rest of the series and to continue to know the journey of Caroline and Jack.

(And yes, I've written the review even before I made it to the finish line. But I was close, I just had to write my thoughts before I forget them, and truthfully, I'm just being honest here.)

Should be read in order. The set includes:

The Bellator Saga: First Box Set Trilogy

In Dissident we are introduced to politician Caroline Gerard, a widow with two small children. She has a blooming career in the House of Representatives. Enter John (Jack) McIntyre, a fellow politician whom Caroline said some not so nice things about. Through an apology and a drink these two start a friendship that becomes more over time. The attraction was always there. As Jack and Caroline spend more time together, these two easily become one of my favorite couples. Their love story is inspiring and beautiful.

SO much is revealed in the next book, Conscience. And in true Ms. London fashion, we still have questions at this point. However, the way the story slowly unravels will have you on edge the entire time. As long as this book was, I never felt it. I craved the next page. Even when forced to put down the book, I often found myself thinking about reading it. The author's seductive and alluring prose is what makes this saga addicting. If this is what every political thriller, romantic suspense book is like, then sign me up!

My heart pounded through every page. Every single one. Through the declarations of love between Jack and Caroline. To the raw and grittiness that occurs. I was absolutely invested in the story from the moment it began. The writing is truly superb as the author perfectly orchestrates a story of love and hope even in the face of danger and evil. As in the first story, the romance and suspense are perfectly balanced as there are twists and turns we never see coming.

Sojourn and the rest of the books in this series has easily become one of the most unforgettable reads of my life. This riveting and compelling story gripped me. Stole my heart. And I don't think I will ever get it back. The author brilliantly feeds my romantic soul as she expertly balances the gritty life Caroline endures with romance and suspense. The scenes in this book are so passionate and sensual. You have no doubt that the love between Caroline and Jack is timeless. The ending left me breathless and in awe. My heart is so full.

Can we please talk about the last chapter of Sojourn? Seriously? Cecilia London. You MOVE me. Your words OWN me. That had to be the most intense, beautiful, tragic, hopeful romantic chapter I have ever read in my life. I found myself reading it over and over several times. And each time, the words slayed me. I was IN that moment. This gut wrenching and heartfelt scene will forever hold a place in my heart.

Captivating and thrilling, this story will hold on to you. And not let go. This author is extremely talented. Brilliant. She is a master of words. The story is told in the present as well as a series as flashbacks. The

author effortlessly transitions between the two. She is very strategic on how she places these time frame. The writing is phenomenal. The author easy takes you to places as a reader I have never been. I am weaved through the pages of this story and feel every single emotion endured by her characters. She not only places you in their hearts, but she allows you to understand their souls. And everything they stand for.

Why aren't we talking more about this book and series? Isn't this what reading is about? To challenge us? Push us out of our element? To make us believe, to hope, to dream. To love? Fiercely and whole heartedly? What a thought provoking, profound, and brilliant series. To the author. You left me in pieces. Shattered. But I'm trusting the process. Knowing that someday, somehow my heart will be made whole again. Words cannot express how much I am in awe of this entire series. I cannot wait for what is to come.

Dissident: Book One

This book starts off with two people trying to get to Canada, it is not clear exactly what is going on but only that there are one male and one female who are married and trying to escape. This introduction intrigued me and as I kept on reading the following chapters, there is a lot of mention of American politics which to be honest really confused me but that didn't stop me from enjoying the story. The book jumps from the past to the present and vice versa.

Caroline in the future is recovering from an attack on her life, the people who are trying to help her are seemingly disappearing one by one, and it is not clear why. There are many questions to be answered and not many answers, however I could not stop reading. I honestly have not been this attached to a book for a long time.

The past is based on Caroline moving on from the loss of her husband and Jack who is really sweet and strange at times, wanting to be with Caroline. I'm being purposely vague as I honestly think you should go into this book and saga blind.

There is a cliff-hanger but luckily the next book is out, so off I go to read that one.

4 stars!

Conscience: Book Two

Conscience unlike Dissident, features a lot of more of the present chapters. Jack and Caroline are happily married but they know that something is not quite right. Caroline is determined to get to the bottom of it however she is doing it on the quiet to avoid suspicion.

I have to say I've enjoyed the intrigue, finding out what is going on but the scenes in the 'present' times really hurt my heart. There are some gruesome bits and I cannot explain how much that hurt my heart.

I read them one scene and I actually felt physically sick at it. That is a testament to the author as not many books can make me feel that kind of emotion. I've devoured this book and hated real life stopping me from reading it. I cannot elaborate but knowing that what is going to come whilst reading this book is so hard because I just want to make it all better for the characters. I want me a Jack, he's so caring and loving, he's

so sweet.

Murdock, well the less said about him the better as far as I'm concerned. I do not want to spoil it so I'll say no more. I'm off to enjoy the next book and then be sad until the next 3 books come out.

The ending of this book does give me hope but at the same time I'm seriously scared to hope as I literally don't think this saga will end happily. Cecilia please, give me a happy ending because these characters deserve it!!

5 stars!

Sojourn: Book Three

This book is different from the first two in the sense that you get to see Caroline and Jack in their marriage. You get to see their happiness pour off the pages and yet amongst that there is political unrest and sense of doom.

This book brings in Jones, Crunch and Gabe who I fell in love with straightaway as they know they're in danger if they get caught yet they're still going ahead with it. They're anti the government and so after a while they make moves to get in touch with the rebel movement. I'm gonna say this, please please don't let anything bad happen to these guys, they've wormed their way into my heart and I want to wrap them all in bubble wrap so they don't get unnecessarily hurt!

The one thing I love about this book is that despite the fact it is a story it is so believable. I'm a bit sad that we don't get Jack in the present day or even a glimpse of what he's doing but I can understand why Caroline has to take centre stage. It gives the reader more tensions and questions to be answered. I have so many questions!

Are the children alive? Is Jack alive? Is there going to be a showdown with Jack, Caroline versus Santos and Murdock? (please let this happen!)

The ending is a cliffhanger but not a cliffhanger that makes me want to scream and throw my kindle across the room.

I'm eagerly anticipating the next book!

4.5 stars

Overall for the trilogy: 4 stars!

This BELLATOR SAGA Box Set comprises of the first three books in series: Dissident, Conscience and Sojourn. It comfortably falls into a variety of genre types including contemporary romance, thriller, suspense and adventure. It's also steeped in political context and has beautiful scenes of erotic romance. Presented in the third person narrative the themes weave through the story transporting the reader to the fascinating, amazing, corrupt and frighteningly realistic world of Caroline and Jack. The world depicts a corrupt state that's fallen into disarray and illustrates the brutal far reaching consequences for all. **The overriding aspect and the thing I absolutely adore about this story is the love and all consuming relationship between Jack and Caroline.**

Politics is not a subject I'd usually warm to in my reading matter but in THE BELLATOR SAGA it's perfectly tuned and a crucial, intrinsic part of the story, driving the action and suspenseful nature of the piece providing gravitas, grit, adventure and the most important aspect.... LOVE. Without the political theme Jack and Caroline's worlds would never have collided so please do NOT let the political aspect deter you from reading. I'm an avid romance fan of thought provoking writing and stories that develop and grow and this series ticks all my boxes! I highly recommend investing time in this series and becoming involved with Jack and Caroline's story.

5 Epic Stars

The Bellator Saga is an amazing story that is still ongoing. The First Trilogy is comprised of Dissident, Conscience and Sojourn. This journey is one that is not easy but it is a journey that will completely move you like no other. It revolves around the political scene. The events taking place are events that could happen in this crazy world we are living in. It is intellectual, it is thrilling, it is a mental trip, and it is also a beautiful love story. The journey of Caroline Gerard and Jack McIntyre is one of epic proportions. While their journey is still ongoing, these 3 books will take your emotions on a roller coaster ride of mayhem and magnificence.

While the last book ends in a cliffhanger, it is one that will leave you satisfied and it will leave you a longing for the next book in a good way.

ARC received from author via blog tour

SPEECHLESS!!!!

runs to corner of mind to curl up and recover

Hmmm...

This is gonna be one interesting review, I think, and a loooong one at that (I won't even go into how long it took me to write this one)... There's so much to say and so many emotions to convey... Should I do this in chunks? Do I do it as a whole? Where do I even start?!?

This came highly recommended by a friend here, and now I know why. **If I can give this book more than 5 stars, there is no doubt that I would!** I haven't felt like this about a book in a while, honestly... And considering the amount of books I read, I sometimes feel certain stories are a dime a dozen, so for this book to leave me gobsmacked at the end is quite a feat. And to think this is just the first 3 trilogy!!

Let's start with the series title, "The Bellator Saga". Bellator means "warrior", in Latin. In and of itself, it's got oomph, don't ya think? And within this trilogy are the books Dissident, Conscience, and Sojourn. These titles alone definitely give you an idea of what you will be in for. Very clever!

This is the story of Caroline and Jack (Btw, very Kennedy-esque, eh? No? Just me?) This is their journey told in third-person and from Caroline's perspective. It moved between flashbacks and the present alternately. So while I feared for the things happening currently and my anxiety level remains high, Caroline and Jack's love story was unfolding thru the flashback and I was falling in love with them and couldn't help but get all hot and bothered along the way.

They're both politicians on the rise. Their first encounter was far from congenial but from that first encounter grew a friendship which blossomed into more. And in a way, you can say they live happily ever after. But as their relationship solidifies, there are things happening in the country, things that both Caroline and Jack can't ignore and because of that, sacrifices have to be made, actions had to be taken.

If I can quickly sum up my take of each book, this is how it would look:

Dissident : lays a good foundation for what's to come. You get to know Caroline. You start getting glimpses of what's to come down the road, esp for Caroline. You see Caroline and Jack fall in love.

Conscience : is the hardest to get past thru. While you continue to get flashback to see how Caroline and Jack's relationship progress, you get more of what's happening in the present, what was happening to

Caroline, to be exact, and it wasn't pretty at all. Cecilia did not gloss over any of the atrocities and it was brutal to read.

Sojourn : shows how Caroline is starting to recover. But there's much more to be done. Caroline and Jack on the one hand continue to be solid in their relationship as you read thru the flashback.

One the one hand, I personally am glad that I got to read this in its entirety as I think it enhanced the emotions reading the 3 books within it one after another. But on the other, now here I am, about to ramble, to try to express how much I **LOVE** this series...

The storyline alone gives you such fodder for contemplation. Cecilia categorized this as an erotic political thriller. I couldn't agree more. This is romance, yes; romance layered with heat, suspense, and action. There's also a dystopian feel to it that feels contemporary at the same time, especially considering the times the Americans are in at this very moment. It's fascinating in a disturbing but also inspirational way.

The prologue alone hooks you right in. Immediately, the questions begin. Immediately, you feel the suspense. Immediately, you get a sense of the strength of the characters.

The characters alone give a lot of room for good discussion. After everything I'll write, I don't think I'll be able to cover everything I want to, which goes to show the care that Cecilia took in developing them.

I love how Caroline and Jack are on equal footing. Both are smart and intelligent, passionate in their beliefs albeit not always coming from the same side, have very strong commitment to their civic duties, and confident with and despite of their personal insecurities. Caroline with her feminist inclination, surrounded by similarly strong friends, embodies, in my mind, what young girls should aspire to be. And Jack is the man that a woman like Caroline deserves. So what you get then is the ultimate power couple.

Their times together are impressive, witty, and explosive. There's something to be said about the maturity of these characters. There's a formality to some of their exchange that just seems fitting but also very heartfelt. While pretentious if taken out of context, it's appropriate, for lack of better word. And as much as I almost want to say that things moved at a sluggish pace at times, I also realized I needed to read them all to get a full sense of their story. I suppose my anxiety didn't help in that I just want to speed things up.

And with all the things happening, not only did I fell in love with Caroline and Jack, but I became just as enamored with Caroline's friends. My heart broke over and over for Caroline and her friends the way things were unfolding in the present. The brutality was hard to stomach at times. I was getting just as angry and impassioned. I seriously hope one character will get his comeuppance in the hands of both Caroline and Jack.

Considering how this book ended, which means it's the end of *Sojourn*, you know their fight has barely started. No matter what's in store for Caroline and Jack, they've already made their marks in my mind. I bet I will cringe, I will swoon, I will be anxious, I will be smiling, I will be a lot of things, and none and all of that will matter because I'm already sold right from the prologue, and I just want to be taken thru their journey in all its glory.

My, my, my I think this is one of the longest reviews I have ever written! Yet I feel like I can talk about it some more. But I won't. I've subjected you enough to my ramblings...

I say just friggin' read it!!!!

(Pls note that I also own a copy)

The amount of love I feel for this saga/author is impossible to translate into words but I'll try ...

In order for me to enjoy the book, I only really ask for two things: originality and great writing. With this saga, Cecilia London delivers both. **BIG TIME!** One of **THE** most original series I've read, possibly **EVER**. The writing is exquisite and the story only gets better and better with each book. I am so happy to see that the author is staying true to herself [and to the story] throughout the series. It would have been so easy to say "POOF! and everyone lived happily ever after!" but **EPIC** love stories are usually told via **EPIC** tales and this is exactly what you get with The Bellator Saga. If you are the type of reader that doesn't just enjoy the destination but also appreciates the journey that gets you there, you will absolutely **LOVE** this series.

This trilogy is currently on sale for **only .99!** That's **THREE FULL LENGTH BOOKS + BONUS MATERIAL** for less than a cup of coffee!!

Book 1-3 of 6.

Blurb, book 1:

“I will always be with you...”

Rising Democratic star Caroline Gerard hasn't had an easy year. After losing her husband, she is raising two small children alone while trying to navigate the tricky and sometimes shallow halls on Capitol Hill. A string of nasty speeches has her scrambling to apologize to any number of candidates, including newly elected Republican Jack McIntyre. Falling in love again is the last thing on her mind.

Jack McIntyre might have a reputation as a playboy, but he has his sights set solely on his new colleague. Can he break through Caroline's grief and capture her heart?

Told mostly in flashback and set against a chilling fascist backdrop, Dissident is a rollercoaster ride of political intrigue, passionate contemporary romance, and undying love.

Books in The Bellator Saga should be read in order:

Book 1: Dissident

Book 2: Conscience

Book 3: Sojourn

Book 1-3: The Bellator Saga I-III

Book 4: Phoenix

Book 5: Rhapsody

Book 6: Triumph
