## **Africa ABC** Gladys T. Kenfack

K stands for Kilimanjaro. Featuring a fun and educational adventure through Africa, this alphabet book is perfect for young readers and preschoolers. They will be exposed to new vocabulary, increased global awareness, and exciting exploration of the African culture. Older readers can appreciate the geography as each spread reveals a fresh perspective on the different countries within the continent. As a social enterprise and to encourage local job creation, Gladys' stories are illustrated by local artists in Cameroon, the place where she grew up. A glossary at the end of the book provides interesting facts about Africa.

### Monty J. says

An alphabet of discovery... I really liked this book. Great graphics - calming backgrounds - spaciouly laid out - with lots of care and consideration - and equally well balanced - not to much - not to little. I like the thought process of each letter. Each letter of the alphabet shows a place within Africa, like Timbuktu - for instance ( yes - it does exist) and an object or animal of interest. There are also numbers from 1 - 9 - with colorful images to count along - with a Glossary and a Did you know? section - full of interesting facts. An interesting and educational way to not only learn your alphabet - but to also learn about the geography, people, animals, fruit and vegetation of the great African continent. Well done.

Good book for littlies or anyone who is interested in Africa. A bit of geography for older kids as they learn the countries in Africa and where they are. Introduces some new words as well as familiar ones. Alphabet, counting, geography and some fun facts. Works nicely.
