### **Bonded In Blood** L. Ann , L. Gene Brown

Taz I' Ane – arrogant, irreverent, womanising – Heir Apparent to the House of Nikaris, the largest and most powerful House in the Vampire Nation.

Morganna Satori, top of the chain of the world's deadliest and most feared assassins – as lethal as she is beautiful.

Two people who couldn't be more opposite. And whose only connection to one-another is a torrid one night's stand in Las Vegas, six months past.

Now they have been thrown together to investigate a string of grisly murders, perpetrated by what appears to be a homicidal mad man in control of a savage army of children.

The question is not whether or not they can survive their seemingly impossible assignment. But whether they will survive each other.

## From Reader Review Bonded In Blood for online ebook

### Ramona Plant says

I really enjoyed Soul Bonded by L. Ann. This book was written by 2 skilled authors that have a very natural writing style. The book has a great pace to it, but is a little bit slow in the beginning where it focuses mostly on the main characters Morgan and Taz and kind of leaves you guessing what the actual story is about. You are given hints and will look forward to the actual story. Once the authors really dive into the nitty gritty of the plot the pace picks up and it is a really difficult book to put down.

Taz and Morgan make for very interesting characters that the authors develop especially in the first part of the book. The enemy is fierce and very hidden for quite some time. The plot of this book is very unique and different which I find is difficult to do when writing about Vampires, a topic that has been covered in numerous books.

This book could have used some editing since there were a few errors like misused words, missing words and so on. Also some of the paragraphs don't have a nice transition and you are kind of thrown into it. Thankfully it is not difficult to figure out what is going on.

As I said, this book is very enjoyable and different. I will keep an eye out for the next one so I can find out what happens next. And not to worry, this book can be read as a stand alone since it concludes in the end and doesn't leave you with a cliff hanger.

I have received this book from the author for an honest review. (LoP, Lovers of Paranormal)

### Jana LaPelle says

#### 4 1/2 Stars...

Not your typical vampire book. I really enjoyed reading Bonded in Blood. The two main characters Taz and Morgan both quickly drew me in with their snarky banter and obvious attraction to one another. Then there was the whole murder mystery that threatened to out their supernatural world to the humans that has Taz and Morgan working together to uncover the sinister truth of who or what is behind the murders. I was honestly engaged from the very beginning. So why 4 1/2 stars? I did get a little confused on the vampire hierarchy. Maybe I just didn't clue into it or I missed a piece of the puzzle in my read, but that in no way takes away from the overall story line. Bonded in Blood is engaging and unique and is definitely worth checking out.

### Debbie says

#### 4.5 Stars

Intense, witty and wickedly entertaining!!!

Sometimes my cover whorish ways pay off! Yep, this cover had me stopping my scroll with a quickness, the blurb got me clicking and the story paid off in spades. I'm ecstatic that I took a chance on these new to me

authors. They delivered well written, action packed and interesting book with a refreshing take on vampire society.

Taz and Morgan, the two main characters, were wildly entertaining all on their own, two strong independent and powerful personalities whose actions and dialogue were great fun to read. Now don't get me wrong, this book wasn't all fun and games. It has a dark and sinister underbelly that had me struggling, at times, to read the pages between the fingers plastered over my eyes. These vamps aren't your sparkly variety, they most definitely bite! Though not for the faint of heart, these authors did a great job offsetting the more macabre moments with action, romance and humor that provide balance to the story.

On to book two.

---

### **Ruth Miranda says**

Well, I really enjoyed reading this novel. This was pure entertainment, and it tries to be nothing other than that. The pleasure I derived of reading it was akin to that of watching an episode of Supernatural, it's all for the fun of it, for the enjoyment. Not a book to make you question the meaning of life, nor one to have you at tears, but a story packed full of interesting events, fast paced and with characters that - thankfully - are far from perfect. In fact, both the MC's are annoying as hell, insufferable, flawed, and that's what makes them so good. They're not perfect, and it is so refreshing to read less than wonderful characters who happen to have been given a certain amount of responsibility and end up effing the hell up like most of us, but making up for their miscomings. Again, I say, this is not a book filled with depth and meaning, this is entertainment industry at its best. If that's what you're looking for, then jump right in because you'll sure get what you asked for.

### **Gemma Cameron says**

Bonded in Blood starts with a dark and gruesome prologue that leads into a very exciting story.

This book follows Taz and Morgan as the play cat and mouse with their feelings for each other, whilst trying to solve the mystery of the nasty goings on and fighting enemies determined to get Taz. Unlike some modern vampire portrayals these guys are far from fluffy and lovey. They are strong, independent, powerful and passionate making for an explosive relationship. They develop with the story allowing the reader to see their vulnerabilities and understand them well.

There are many side characters to the story, appearing just enough to let the reader know there is more to them and for them to want to see more.

The plot is original with a number of twists that left me agape and wondering what the heck was coming next. I don't wish to mention spoilers but believe me it's worth the read for the twists, turns and shocks that ensue.

The book has an epilogue that connects with the prologue, tying up loose ends where many books don't. I thought this was a nice touch.

If you want cute and fluffy this book may not be for you but if you want powerful and passionate with strong characters and well described scenes then you will love it. There is humour, friendship, love and a small

mishap with a sports car to mix in with the twists and turns of an original vampire story!

I can't wait for book 2!

---

### **Shelly Reynolds says**

"This was a mistake."

"No mistake feels this good, Anna. And, if you insist on this being a mistake, it's one I'm happy to keep on making."

This was my first read from these authors and this one has me scrambling for book 2! I am a fan of anything paranormal, but it has to be done right. Not all PRN stories can hold my attention. This one definitely did! I didn't want to put it down!

Taz I'ane is a player. A cocky, disrespectful bastard. He's also in line to inherit the House of Nikaris if he ever decides to follow the rules. Being in charge of the biggest and most powerful House in the Vampire Nation means he'd have to settle down - with a mate. Not happening. Until SHE turns everything upside down.

Morganna "Morgan" Satori is beautiful, petite and deadly. One of top assassins and Necuno - not quite human, yet not quite Vampire. She's been steering clear of Taz ever since their one-nighter in Vegas. Well, she shot him that night, so....

There will be no avoiding him any longer now that they are being teamed up to figure out who is behind a series of gruesome murders, most of which leave their victims shredded and drained of their blood. When a too-convenient video surfaces indicating that these murders are a personal message to Nikaris, Taz and Morganna have no choice but to face this enemy head on.

As a bonded pair, they are stronger. But are they strong enough to come out of this alive? Will this madman and his army of blood-thirsty children destroy them, or will Taz and Morganna end up destroying each other?

This was the perfect blend of horror and hotness. The crime scenes are deliciously grisly and bloody. And Taz and Morganna have so much sensual tension, it emanates off the pages! Their relationship is contentious at best, but the banter is great and the sheet time is steamy! The story kept me on my toes and I wasn't sure if anyone was going to survive!

I'd highly recommend this one! Going to grab book 2 STAT!!

---

### **Vanessa Charles says**

Great beginning!

I was glad I grabbed this book. I really enjoyed the story especially this take on the popular lore. I like the banter and angst between Taz and Morgan"Anna". I will absolutely read the next book. If your looking for something different and lot of action both in and out of the bedroom, give this book a try.

---

### **Craig Newman says**

Moves pretty good. Doesn't bog down in heavy descriptions. Gives you enough to let your imagination take over and build the story in your mind. Very good pacing in story and dialogue. And with an intriguing approach, makes it a worthy read.

---

### **Emma Mills says**

#### **Highly recommended read.**

Superbly written and packed with interesting characters and, I am happy to see, a very strong female mc. A gripping story. I look forward to more.

---

### **Louisa Dwyer says**

I liked the idea of the blood bond which felt original and interesting within the vampire fiction genre. The 'baby' villains were a fantastically eerie feature and I always enjoy a bit of steam. It's a hat trick! A great read.

---

### **Kalli Bunch says**

The story begins with the police looking into a series of gruesome murders. But then it gets right into the meat of it.

I think that Morgan and Taz are definitely characters I can root for. And the fact that they seem to be two sides of the same coin. The perfect mixture of sweet and sour together. Taz is deadly fire, and Morgan is vicious Ice. Together they make the perfect assassin couple.

I definitely think the characters feel real and three-dimensional, with distinct voices, flaws, and virtues. Each character has their own insecurities, vulnerabilities, and when they put themselves out there and find themselves on the ass end of a rejection or a perceived rejection, they lash out just as we would. (Or maybe in the more extreme way lol)

I think the relationship between Taz and Morgan is very believable in the sense that they both railed against it, while at the same time being inexplicably drawn to each other. They couldn't stay away from each other, no matter how much they wanted to (or claimed to want to). It is a stellar supernatural romance. I am in love with the fact that it isn't the fall all over your face, damsel in distress, muscled guy saves girl, same old story every other book is. Nope, this is a one of a kind book. Bonded In Blood is the book readers WANT to read. The main girl shoots her love interest rather than give in, omg I loved that!!

The plot twists in this book are amazing. I LOVED this book. I loved going into this book knowing absolutely NOTHING!! The idea of having children as the big bad was a fantastic idea!! It's not the same as every other story. Imagine a child (or a hundred of them), a psychotic, animalistic, tiny little serial killer with the basic functions...on the 1 hand, it elicits your emotions and makes you want to spare them, hug them, help them in any way...which, let's face it, works against you, and on the other hand, they're 50,000 times creepier because they're children and you're pretty much screwed!! Who's not going to read that and love

it?? You MIGHT have nightmares, but then you have those swoon-worthy scenes with Taz and Morgan to take your mind off of it. So I have to say, if I had to grade this book from 1-5, 5 getting the highest rating, and 1 getting the lowest? 5 stars!! I'll be waiting in the corner for book two!!

---

### **Laid-back Book Bitches says**

I really enjoyed this book. I couldn't put it down once I started it. I'm usually not in to vampire books, but I loved Underworld meets evil Twilight. This book was so enjoyable! I had to know what was going to happen, which had me flipping the pages even faster. I loved that this book gives you just enough for your imagination to wonder. I recommend this book to everyone. I can not wait for more <3 . I love this author's writing, everything blended so good to make the perfect story. I loved the tension and chemistry between Morgan and Taz. I fell in love the characters right away which is always great. I usually don't feel a lot for the side characters, this author makes you fall in love with all her characters....  
GO GET THIS BOOKS YOU WONT BE SORRY!

---

### **Sandy says**

Well damn, that sucked. :) I forgot I only got a sample and not the whole story. Now I'm gonna go buy it because I'm hooked. This story is awesome. So far I've met Taz I'Ane, and damn he's cocky, and also the Prince of Vampires. His sort of girlfriend, Kayla, who's human & knows nothing about Vampires, & she's a television newscaster. Then there's Morganna, and ooh I like her. Tuff, and takes no prisoners. Just got a touch on Lord Zuron, Taz's father, and King. Hammish, Morganna's father and head of security. Then barely touched on the cops. I can't wait to get my grubby paws on the rest of this story. When I do & finish, I will update my review.

UPDATE: Wow. Like when I read the sample & now the full story, just Wow. This is a gr8 story. It answers all these questions; who is Morgan really? Who is Taz really? Is he a playboy prince, or does he have depth? Do they really care for each other, or is it just lust? What is blood bonding? Is it sexual or not? What are Zuron & Hamish up to, if anything?

So much going on yet this story really makes sense. I love Morgan, & how tough she is. Oh and Taz, playboy prince or not, he's hot & funny. This story has so many twists & turns it keeps you so enraptured. I recommend this read. 5 Thumbs up. I'm looking forward to the next story.

---

### **Miranda says**

I 100% recommend this book to anyone who loves vampires and assassin's. I absolutely loved this book and can't wait for more!

The writing style of these two authors blended together perfectly creating a wonderful story with a great plot. The use of the prologue and epilogue to introduce what I'm hoping will be a future character that we see more of was, a small bit confusing at first but also brilliant.

I really enjoyed the way chemistry and tension between the main characters Morgan and Taz. there is plenty of side characters as well to help keep things interesting while not taking away too much focus from the main characters.

I Also have to say I love the scheming old men and I hope we eventually get to see more of them and see the

reaction to the car lol.

---

## **Nicola Rose says**

### **Good vampire read!**

This book got off to a cracking start! I really enjoyed the characters and the take on vampire society.

My interest waned slightly in the middle, but not for lack of action, I think mainly because I got confused with who was who and why things were happening. But then, that's kind of the point, no one knows.

It's a romance with an action packed detective element! The writing itself is so good that it kept the pages turning. Great banter and dialogue, and of course I love the angst of two characters trying to deny their feelings for each other!

---
