## **Too Late... I Love You** Kiki Archer

Too Late... I Love You is the new novel from best-selling, award-winning author Kiki Archer.

Connie Parker isn't convinced by this falling in love lark. Falling hurts, you end up with bruises and scars.

She has the perfect answer: she'll write about love instead. But what happens when the novel-in-progress describes more about Connie's own dull existence than she wants to admit? And when will she realise that her hero is beginning to resemble her new best friend Maria – a woman who seems to turn every simple outing with their 3-year-olds into a fun-filled adventure for them all?

In trying to make sense of the puzzle of her life, Connie learns there is no perfect person. Just that person who'll fit you perfectly.

"The twists and turns and surprises just keep coming - read it now!" - Diana Simmonds, Curve Magazine.

Though Kiki is obviously a very talented writer, and popular in the genre, some of her books are a little hit and miss for me. This one, however, has to be my favourite so far.

It took it's time, building slowly, giving the characters depth (though not getting too bogged down in their history or past drama), adding tension, a few chuckles, a bit of passion, and then wrapping up almost perfectly.

I say almost because it felt as though the book ended a bit abruptly. We'd just discovered something monumental after a bit of a shaky last quarter of the book, and I feel it could have benefited from another chapter or two. Also, a little more emotion at this point from some of the characters might have added to the overall success of the story I think. I'm all for really explosive encounters after some angst.

Having said that, both characters were likeable, fairly realistic, with realistic intentions and reactions to events. The dialog worked, the setting worked. A few things that irked me a bit were a few too many scenes from Kurt's perspective, and Noah's baby-talk, which felt a bit off for some reason. That's nothing major, obviously, and as a whole I certainly enjoyed this book. A good solid 4 stars for me.

Too Late...I Love You is a well written fun book. It has the right mix of drama, humor and romance. The main characters are well written and their chemistry is strong and as a reader you can really feel it. It is a easy and quick book to read but is still very enjoyable. Kiki Archer is very good at fun dialogues and comical situations, which make you laugh out loud a few times.

I like all of her previous books so if you enjoyed those, you will definitely enjoy this one as well.

Detailed score 2.5

This novel presents as an attempted romantic comedy with some more flowery romance words thrown in under the guise of one of our main protagonists writing a romance novel.

Clearly, given the multitude of high ratings this book has received, I'm in the minority but, for me, the 'comedy' aspect fell flat -- I've seen it done much better in other lesroms (ref Melissa Brayden's novels, also London Calling).

I found Ryan stereotypically and almost insultingly camp and Connie, one of our main characters annoyingly insecure (I think it was meant to be endearing but I didn't buy it). I didn't really buy the chemistry between Connie and Maria - it all felt very one dimensional to me. Plus there were SO many co-incidences. I'm usually pretty tolerant for suspending disbelief for the sake of a story but there were just too many in this

book and it was distracting.

Ultimately for lesroms you have to fall in love with the characters a bit - and I just didn't with these two. Also a minor quibble but it annoyed me - slight (view spoiler)

Overall it was a fine enough way to spend a rainy Sunday arvo but there are more enjoyable reads out there.

I think this might be one of my favourite Kiki Archer books. I spent much of my time reading it literally laughing out loud both at the witty banter and the situations the main characters find themselves in.

This is a captivating, sweet and fun story, which I didn't want to end. The only issue I have with the book is I didn't really like the twist but I can see why it was included. That being said I will re read this book again because I enjoyed it so much. I would definitely recommend it, go out and buy it!!

I stopped reading this one at 20% because I'd gone into it looking for lesbian fiction. Only to find heterosexual fiction, with the added bit where one of the characters wrote heterosexual fiction romances. There's probably lesbians in the book somewhere, but I couldn't continue to find them.

Well ... I read the other reviews and thought ooh I so need to read this book. Now the big BUT. In parts it's really good and funny, but other parts are a lot of blabla and too much made up drama (like the mother in law story). So I'd give it 2.5 stars, I know Kiki's other books and there are better ones. This one is definitely overrated.

### **Zingari says**

I loved this book... until the ending. 3.5 stars because of that. The "problem" or "issue" that usually comes up to separate the main characters was so lame. Maria's reason for not being with Connie was so bad, because it honestly had nothing to do with their relationship or would affect their relationship in the least. Honestly I loved the beginning of the book, and no matter how much the author tried saving Karl and Louise, I didn't much like either of them by the end of it. And the ending was so confusing. Is was like. "I'm leaving you because your best friend is my sperm donor", then Karl the arse gets hit by a motorcycle, and he's holding their child when it happens, then "Oh, it seems your sperm donor is mine too since I slept with my gay best-friend after catching my boyfriend kissing Ms. Teeth and Tits". Not only that, but the end made it seem as though Karl accepted the child as not his, but still wanted responsibility. The entire novel this man had basically nothing to do with their son Noah, and he sure didn't seem the type to take the fact that this wasn't his son so calmly. More likely he'd ask Connie for all the money he spent taking care of them back and even going as far as to legally go after her.

I did find myself laughing so hard at times, and there would be lulls of nothing, but the moments i laughed made up for them, but that ending... I'm sorry, but I can't. It was... frustrating.

I still recommend you give it a read though. It was entertaining and there were moments when you had to smile.

3.5 stars.

I liked the story and the slow burning romance. The ending is sweet and I wasn't expecting it, which was nice. There's subtle humour too that made me giggle out loud, which is always a bonus.

Good book

It took me a long time to write up my thoughts properly, because for a long time I wasn't sure whether I wanted to share them or not. And, in hindsight, after mulling it over, I've reduced my rating.

Romance novels really shouldn't leave you feeling that the heroine would judge you and your family, and bitch about you behind your back.

Another nice story by Miss Archer. Well done!

Okay, let's do a lil bit of revision. Connie was a stay at home mum to a 3 year old Noah. She and Noah's dad, Karl were not in love but decided to live and raised Noah together. Between raising Noah and attending all sorts of activities with him, Connie was on her way to become an author. Btw, Karl's mom was a nightmare, not the Freddy Kruger type more like Jack Nicholson in The Shining.

Through one of the mum+child activities, she met Maria and the friendship button was clicked instantly,

---

their kids bonded really well too.

Maria had a 3 year old daughter, Alice.

Ms.Archer's ability of making extremely interesting connections between the main and secondary characters was really commendable. There was a plot twist closed to the end of the book that had my jaw dropped then screaming " No Way".

I'm a generous person so here's the spoiler for those who are interested.

(view spoiler)

What a shocker, right?

The romance was good, I enjoyed the scene where Connie was nervous about having sex with Maria for the first time and got Ryan's help which was no help whatsoever.

An enjoyable read, worth a reread or twice especially when I am in the mood to laugh as this book has those moments.

I really loved this book. Kiki Archer is great at comedy. I specially liked the way she portrayed Connie and her endearing flaws. In contrast Mary seemed way too perfect, but it was a fun read nonetheless.

The never-ending coincidences were really too much for me and, for this reason, I could not give it 4 stars.

### **Bobbi says**

Too Late...I Love You is a well written book with a nice mix of, drama, romance, and humor. Connie a stay-at-home writer meets Maria a beautiful business owner through their kids. They hit it off and from some pushing by Connie's friend Ryan become fast friends. The chemistry between the two is well written and really jumps off the pages. They are complete opposites, Connie is a bit shy and socially awkward and Maria is confident and sassy, so they play off of each other well which makes their interaction fun to read. The humor parts of the book fits in well with the playful mood of the book, though I felt some parts were a bit too much or over-the-top.

Overall another great book from Kiki Archer.

If I had to name the first words that come to my mind after reading „Too late... I love you“, I'd have to say: Children, coffee, big boobs and Ann Summers (and what else do we need anyway?). The first two might warm you up, the latter two will definitely leave you in stitches.

But, of course, there is more to „Too late... I love you“. It's an Archer, so we get a romantic love story between two lovely women, we get slowly building up erotic tension, and of course we get numerous comical situations and dialogues. So throughout the book and in between fits of laughter you'll probably hear yourself saying things like „Awww“ and „Oh, hellooooo!“.

If you liked the other books by the author, you're definitely also going to like this one.
